

Contents

1.	Principles of Hyperthermia	14
1.1.	Definition of Hyperthermia (Manfred Schmidt).....	14
1.1.1.	Different Temperature Regimes.....	14
1.1.2.	Heating Techniques.....	15
1.1.3.	References.....	15
1.2.	Physical Basics and Hyperthermia Applications (Manfred Schmidt).....	15
1.2.1.	Electromagnetic Irradiation.....	15
1.2.2.	Interaction of Non-Ionizing Electromagnetic Radiation with Matter.....	16
1.2.3.	Practical Realizations.....	18
1.2.4.	Planning and Optimization.....	21
1.2.5.	Harmful Effects of Non-Ionizing Radiation.....	22
1.2.6.	Further Heating Techniques.....	22
1.2.7.	Heat Transport.....	23
1.2.8.	References.....	23
1.3.	Biological Rationale of Hyperthermia (Udo S. Gaipl, Petra Schildkopf, Valeria Milani).....	23
1.3.1.	Biological Rationale and Mode of Action of Hyperthermia (HT).....	23
1.3.2.	Interaction of Hyperthermia (HT) and Chemotherapeutic Agents.....	24
1.3.3.	Interaction of Hyperthermia (HT) and Ionizing Radiation (RT).....	25
1.3.4.	Immune Modulation by Hyperthermia.....	26
1.3.5.	References.....	27
2.	Techniques, Clinical Use and Quality Assurance	30
2.1.	Hyperthermia Treatment Techniques (Oliver J. Ott, Andreas Jordan, Lars H. Lindner).....	30
2.1.1.	Classical Techniques.....	30
2.1.2.	New Developments.....	32
2.1.3.	References.....	33
2.2.	Practical Recommendations (Sultan Abdel-Rahman, Tungte Wang, Margareta Santl, Lars H. Lindner).....	35
2.2.1.	Treatment Planning.....	37
2.2.2.	Treatment.....	37
2.2.3.	Treatment Documentation.....	38
2.2.4.	Requirements and Characterization of Equipment.....	38
2.2.5.	Safety Aspects.....	39
2.2.6.	Hyperthermia Staff Requirements.....	39
2.2.7.	References.....	39
2.3.	Quality Assurance (Johanna Gellermann).....	39
2.3.1.	Heat Dosimetry.....	39
2.3.2.	Thermometry and Verification.....	40
2.3.3.	Hyperthermia Treatment Planning.....	42
2.3.4.	Future Aspects.....	44
2.3.5.	References.....	44

3.	Clinical Results of Quality-Assured Hyperthermia	48
3.1.	Hyperthermia as Sole Modality (Oliver J. Ott)	48
3.2.	Chemotherapy and Hyperthermia (Rolf D. Issels, Lars H. Lindner)	48
3.2.1.	References	49
3.3.	Radiotherapy and Hyperthermia (Oliver J. Ott)	50
3.3.1.	Breast Cancer	51
3.3.2.	Rectal Cancer	52
3.3.3.	Cervical Carcinoma	53
3.3.4.	Further Results	54
3.3.5.	References	54
3.4.	Radiochemotherapy and Hyperthermia (Oliver J. Ott)	55
3.4.1.	Rectal Cancer	55
3.4.2.	Anal Cancer	55
3.4.3.	Esophageal Carcinoma	56
3.4.4.	Further Fields of Research	56
3.4.5.	References	56
4.	The Role of Hyperthermia in Pediatric Oncology (Rüdiger Wessalowski)	60
4.1.	Indications	60
4.2.	Locoregional Hyperthermia in Children and Adolescents	60
4.2.1.	Application of Hyperthermia and Thermometry	60
4.2.2.	Analysis of Temperatures	62
4.2.3.	Hyper-PEI Treatment Schedule	62
4.3.	Limitations	63
4.4.	Results	64
4.4.1.	Experimental Studies	64
4.4.2.	Clinical Studies	65
4.5.	Perspectives	68
4.5.1.	Technical Approach	68
4.5.2.	Clinical Aspects	69
4.6.	References	69
5.	Current and Future Clinical Trials (Rolf D. Issels, Oliver J. Ott)	72
5.1.	Chemotherapy and Hyperthermia	72
5.2.	Radiotherapy and Hyperthermia	73
5.3.	References	75
6.	Summary (Oliver J. Ott, Rolf D. Issels, Rüdiger Wessalowski)	78
	Index	79
