

## Contents

<b>Basics</b>	<b>1</b>
<b>Chemistry</b>	
Periodic Table .....	2
Isomerism .....	4
Substance Classes I. ....	6
Substance Classes II. ....	8
Chemical Reactions .....	10
Redox Processes .....	12
Acids and Bases. ....	14
<b>Physical Chemistry</b>	
Energetics.....	16
Thermodynamics.....	18
Catalysis .....	20
Water as a Solvent .....	22
Hydrophobic Interactions .....	24
<b>Biomolecules</b>	<b>27</b>
<b>Carbohydrates</b>	
Chemistry of Sugars. ....	28
Monosaccharides and Disaccharides. ....	30
Polysaccharides. ....	32
Glycoproteins and Glycosaminoglycans. ....	34
<b>Lipids</b>	
Overview .....	36
Fatty Acids and Fats .....	38
Glycolipids .....	40
Sphingolipids. ....	42
Isoprenoids .....	44
Steroids .....	46
<b>Amino Acids</b>	
Properties.....	48
Proteinogenic Amino Acids .....	50
Selenocysteine and Nonproteinogenic Amino Acids.....	52
<b>Peptides and Proteins</b>	
Peptides and Proteins: Overview.....	54
Protein Structures .....	56
Structural Proteins. ....	58
Soluble Proteins .....	60
Protein Modification .....	62
<b>Nucleotides and Nucleic Acids</b>	
Bases and Nucleotides.....	64
RNA .....	66
DNA .....	68
<b>Metabolism</b>	<b>71</b>
<b>Enzymes</b>	
Basics.....	72
Enzyme Catalysis .....	74
Enzyme Kinetics I. ....	76
Enzyme Kinetics II. ....	78
Allosteric Regulation.....	80
Inhibitors .....	82
Enzymatic Analysis .....	84
Coenzymes I. ....	86
Coenzymes II .....	88
Coenzymes III .....	90
Coenzymes IV .....	92
Pathobiochemistry.....	94
<b>Metabolic Pathways</b>	
Intermediary Metabolism I .....	96
Intermediary Metabolism II .....	98
Regulatory Mechanisms I. ....	100
Regulatory Mechanisms II .....	102
<b>Energy Metabolism</b>	
ATP .....	104
Energetic Coupling .....	106
Energy Conservation at Membranes .....	108
Energy Metabolism: Overview .....	110
Oxoacid Dehydrogenases .....	112
Tricarboxylic Acid Cycle: Reactions .....	114
Tricarboxylic Acid Cycle: .....	116
Metabolic Functions .....	116
Mitochondrial Transport .....	118
Respiratory Chain.....	120
ATP Synthesis .....	122
Regulation of Energy Metabolism .....	124
Pathobiochemistry .....	126
<b>Carbohydrate Metabolism</b>	
Overview .....	128
Glycolysis .....	130
Pentose Phosphate Pathway .....	132
Gluconeogenesis.....	134
Glycogen Metabolism .....	136

<b>Regulation of Carbohydrate Metabolism</b>	138	Protein Sorting .....	218
Metabolism I .....	138	Protein Synthesis in the rER .....	220
<b>Regulation of Carbohydrate Metabolism</b>		Protein Maturation.....	222
Metabolism II .....	140	<b>Lysosomes</b>	
Pathobiochemistry.....	142	Lysosomes .....	224
<b>Lipid Metabolism</b>		<b>Peroxisomes</b>	
Overview .....	144	Peroxisomes.....	226
Fatty Acid Degradation: $\beta$ -Oxidation .....	146	<b>Molecular Genetics</b>	229
Minor Pathways of Fatty Acid Degradation.	148	Overview	
Fatty Acid Biosynthesis.....	150	Overview .....	230
Fatty Acid Metabolism: Other Reactions .....	152	<b>Genome</b>	
Biosynthesis of Complex Lipids .....	154	Genes and Genomes .....	232
Biosynthesis of Cholesterol .....	156	<b>Chromatin</b>	
Pathobiochemistry.....	158	Chromatin .....	234
<b>Protein Metabolism</b>		Nucleic Acid-Modifying Enzymes .....	236
Overview .....	160	Replication .....	238
Proteolysis .....	162	Transcription .....	240
Pathways of Nitrogen .....	164	Transcriptional Control.....	242
Transamination and Deamination.....	166	RNA Maturation .....	244
Amino Acid Degradation I .....	168	<b>Genetic Code</b>	
Amino Acid Degradation II.....	170	Genetic Code .....	246
Urea Cycle.....	172	Translation I: Initiation .....	248
Amino Acid Biosynthesis .....	174	Translation II .....	250
Pathobiochemistry.....	176	Antibiotics .....	252
<b>Nucleotide Metabolism</b>		Mutation and Repair .....	254
Overview .....	178	<b>Genetic Engineering</b>	
Nucleotide Degradation .....	180	DNA Cloning .....	256
Purine and Pyrimidine Biosynthesis.....	182	DNA Sequencing .....	258
Nucleotide Biosynthesis .....	184	Polymerase Chain Reaction (PCR) .....	260
Pathobiochemistry.....	186	Genetic Engineering in Medicine.....	262
<b>Porphyrin Metabolism</b>		<b>Tissues and Organs</b>	265
Heme Biosynthesis.....	188	<b>Digestive System</b>	
Heme Degradation.....	190	Overview .....	266
<b>Cell Organelles</b>	193	Digestive Secretions.....	268
<b>Basics</b>		Digestive Processes .....	270
Structure of Cells .....	194	Absorption I.....	272
Cell Components and Cytoplasm .....	196	Absorption II .....	274
<b>Cytoskeleton</b>		Pathobiochemistry.....	276
Components.....	198	<b>Blood</b>	
Structure and Functions.....	200	Blood: Composition and Functions .....	278
Motor Proteins .....	202	Plasma Proteins.....	280
<b>Nucleus</b>		Lipoproteins I .....	282
Nucleus .....	204	Lipoproteins II .....	284
<b>Mitochondria</b>		Hemoglobin and Gas Transport .....	286
Structure and Functions.....	206	Reactive Oxygen Species .....	288
<b>Membranes</b>		Erythrocyte Metabolism .....	290
Structure and Components .....	208	Acid–Base Balance .....	292
Transport Processes.....	210	Blood Clotting .....	294
Transport Proteins .....	212	Inhibition of Blood Clotting, Fibrinolysis ..	296
Endocytosis and Exocytosis.....	214	Blood Groups.....	298
<b>ER and Golgi Apparatus</b>		Pathobiochemistry.....	300
Structure and Function.....	216		

<b>Immune System</b>		<b>Calcium Metabolism</b> .....	386
Immune System .....	302	Iron Metabolism .....	388
Specific Immune Response .....	304	Pathobiochemistry .....	390
T-cell Activation .....	306	<b>Vitamins</b>	
Complement System .....	308	Vitamins I .....	392
Antibodies .....	310	Vitamins II .....	394
Pathobiochemistry .....	312		
<b>Liver</b>		<b>Signaling Systems</b>	397
Functions .....	314	<b>Signal Transduction</b>	
Carbohydrate Metabolism .....	316	Signal Transduction .....	398
Lipid Metabolism .....	318	Membrane Receptors .....	400
Bile Acids .....	320	Ion Channels .....	402
Biotransformation .....	322	GTP-Binding Proteins .....	404
Cytochrome P450 Systems .....	324	Second Messengers I .....	406
Ethanol Metabolism .....	326	Second Messengers II .....	408
Pathobiochemistry .....	328	Protein Kinases and Phosphatases .....	410
<b>Adipose Tissue</b>		Signal Cascades .....	412
Functions .....	330	<b>Hormone Systems</b>	
Pathobiochemistry .....	332	Basics .....	414
<b>Kidney</b>		Plasma Levels and Hormone Hierarchy .....	416
Functions .....	334	<b>Lipophilic Signaling Substances</b>	
Electrolyte and Water Recycling .....	336	Mechanism of Action .....	418
Metabolism .....	338	Corticosteroids .....	420
<b>Muscle</b>		Sex Steroids and the Menstrual Cycle .....	422
Muscle Contraction .....	340	Metabolism of Steroid Hormones .....	424
Control of Muscle Contraction .....	342	Thyroid Hormones .....	426
Muscle Metabolism .....	344	<b>Hydrophilic Signaling Substances</b>	
Pathobiochemistry .....	346	Insulin .....	428
<b>Connective Tissue</b>		Diabetes Mellitus .....	430
Bone and Teeth .....	348	Other Hormones .....	432
Collagens .....	350	Catecholamines .....	434
Extracellular Matrix I .....	352	Tissue Hormones and Mediators .....	436
Extracellular Matrix II .....	354	Eicosanoids .....	438
Pathobiochemistry .....	356	Cytokines .....	440
<b>Brain and Sensory Organs</b>			
Signal Transmission in the Central Nervous System .....	358	<b>Growth and Development</b>	443
Resting Potential and Action Potential .....	360	<b>Cell Proliferation</b>	
Neurotransmitters .....	362	Cell Cycle I .....	444
Receptors for Neurotransmitters .....	364	Cell Cycle II .....	446
Metabolism of the Brain .....	366	Apoptosis .....	448
Sight .....	368	Oncogenes .....	450
Pathobiochemistry .....	370	Tumors .....	452
<b>Integration of Metabolism</b>		Cytostatic Drugs .....	454
Integration of Metabolism I .....	372	Viruses .....	456
Integration of Metabolism II .....	374		
Integration of Metabolism III .....	376		
Integration of Metabolism IV .....	378		
<b>Nutrition</b>	381	<b>Appendix</b>	459
<b>Nutrients</b>		Abbreviations .....	460
Organic Substances .....	382	Quantities and Units .....	462
Minerals and Trace Elements .....	384	Source Credits .....	464
		Further Reading .....	465
		Index .....	467
