Preface	v
---------------	---

Part I Lagrangian aspects

1 Lagrangian modeling and properties of particles with inertia <i>F. Toschi, L. Biferale, E. Calzavarini, E. L��v��que and A. Scagliarini</i> ..	3
2 Effect of Fax��n forces on acceleration statistics of material particles in turbulent flow <i>E. Calzavarini, R. Volk, M. Bourgo��n, E. L��v��que, J.-F. Pinton and F. Toschi</i>	11
3 Lagrangian analysis of turbulent convection <i>J. Schumacher and M. S. Emran</i>	15
4 Linear and angular dynamics of an inertial particle in turbulence <i>Y. Gasteuil and J.-F. Pinton</i>	19
5 Collision rate between heavy particles in a model turbulent flow <i>L. Ducasse and A. P��mir</i>	23
6 From cloud condensation nuclei to cloud droplets: a turbulent model <i>A. Celani, A. Mazzino, and M. Tizzi</i>	27
7 Lagrangian statistics of inertial particles in turbulent flow <i>M. Bourgo��n, N. Qureshi, C. Baudet, A. Cartellier, and Y. Gagne</i>	31
8 Lagrangian statistics of two-dimensional turbulence in a square container <i>B. Kadoch, W.J.T. Bos, and K. Schneider</i>	35

9 Measurement of Lagrangian particle trajectories by digital in-line holography*G. Gülker, T. Homeyer and J. Peinke* 39**10 3-D Particle Tracking Velocimetry (PTV) in gas flows using coloured tracer particles***D. Tarlet, C. Bendicks, R. Bordás, B. Wunderlich, D. Thévenin, and B. Michaelis* 43**11 Two-particle dispersion in 2D inverse cascade turbulence and its telegraph equation model***A. Mizuta, S. Toh, and T. Matsumoto* 47**12 Numerical simulations of particle dispersion in stratified flows***G. Brethouwer and E. Lindborg* 51**Part II Instability and Transition****13 Experimental study of the von Kármán flow from $Re = 10^2$ to 10^6 : spontaneous symmetry breaking and turbulent bifurcations***P.-P. Cortet, S. Atis, A. Chiffaudel, F. Daviaud, B. Dubrulle, and F. Ravelet* 59**14 Flow reversals in a vertical channel***J.-C. Tisserand, M. Creyssels, M. Gibert, B. Castaing, and F. Chilla* 63**15 Linear instability of streamwise corner flow***F. Alizard, U. Rist, J.-C. Robinet* 67**16 DNS of turbulent plane Couette flow with emphasis on turbulent stripe***T. Tsukahara, Y. Kawaguchi, and H. Kawamura* 71**17 Geometry of state space in plane Couette flow***P. Cvitanović and J.F. Gibson* 75**18 Linear and nonlinear instabilities of sliding Couette flow***K. Deguchi and M. Nagata* 79**19 Localization in plane Couette edge dynamics***T.M. Schneider, D. Marinc, and B. Eckhardt* 83**20 Nonlinear optimal perturbations in plane Couette flow***L. Brandt, Y. Duguet, and R. Larsson* 85

21 Order parameter in laminar-turbulent patterns	
<i>L.S. Tuckerman, D. Barkley, D. Moxey, and O. Dauchot</i>	89
22 Pattern formation in low Reynolds number plane Couette flow	
<i>Y. Duguet, P. Schlatter, and D.S. Henningson</i>	93
23 Quasi-stationary and chaotic convection in low rotating spherical shells	
<i>B. Fütterer and C. Egbers</i>	97
24 Linear stability of 2D rough channels	
<i>F. Fabiani, P. Orlandi, and S. Leonardi</i>	103
25 Transient turbulent bursting in enclosed flows	
<i>K. Hochstrate, M. Avila, J. Abshagen, and G. Pfister</i>	107
26 On new localized vortex solutions in the Couette-Ekman layer	
<i>M. Withalm and N.P. Hoffmann</i>	111
27 Shear instabilities in Taylor-Couette flow	
<i>A. Mesequer, F. Mellibovsky, F. Marques, and M. Avila</i>	115
28 Particle Tracking Velocimetry in transitional plane Couette flow	
<i>B. Lüthi, M. Holzner, M. Kinzel, A. Liberzon, and A. Tsinober</i>	119
29 Experimental study of coherent structures in turbulent pipe flow	
<i>A. de Lozar and B. Hof</i>	123
30 Forced localized turbulence in pipe flows	
<i>M. Avila and B. Hof</i>	125
31 From localized to expanding turbulence	
<i>B. Hof and A. de Lozar</i>	129
32 Influence of test-rigs on the laminar-to-turbulent transition of pipe flows	
<i>F. Durst, K. Haddad, and Ö. Ertunç</i>	131
33 Interaction of turbulent spots in pipe flow	
<i>D. Samanta, A. de Lozar, and B. Hof</i>	135
34 Large-scale transitional dynamics in pipe flow	
<i>F. Mellibovsky, A. Mesequer, T.M. Schneider, and B. Eckhardt</i>	137

35 Nonlinear coherent structures in a square duct <i>H. Wedin, A. Bottaro, and M. Nagata</i>	141
36 Quantitative measurement of the life time of turbulence in pipe flow <i>D.J. Kuik, C. Poelma, B. Hof, and J. Westerweel</i>	145
37 Experimental investigation of turbulent patch evolution in spatially steady boundary layers <i>J.H.M. Fransson</i>	149
38 Interaction of noise disturbances and streamwise streaks <i>P. Schlatter, L. Brandt, and R. de Lange</i>	151
39 Linear generation of multiple time scales by 3D unstable perturbations <i>S. Scarsoglio, D. Tordella, and W.O. Criminale</i>	155
40 Convection at very high Rayleigh number: signature of transition from a micro-thermometer inside the flow <i>J. Salort, F. Gauthier, B. Chabaud, O. Bourgeois, J.-L. Garden, R. du Puits, A. Thess, and P.-E. Roche</i>	159
41 Estimating local instabilities for irregular flows in the differentially heated rotating annulus <i>U. Harlander, R. Faulwetter, K. Alexandrov, and C. Egbers</i>	163
42 Search for the ultimate state in turbulent Rayleigh-Bénard convection <i>E. Bodenschatz, D. Funfschilling, and G. Ahlers</i>	167
43 Rayleigh-Taylor instability in two dimensions and phase-field method <i>A. Celani, A. Mazzino, P. Muratore-Ginanneschi, and L. Vozella</i>	169
44 Split energy cascade in quasi-2D turbulence <i>G. Boffetta, A. Celani, and S. Musacchio</i>	173
45 Stability and laminarisation of turbulent rotating channel flow <i>S. Wallin, O. Grundestam, and A.V. Johansson</i>	177
46 The vortical flow pattern exhibited by the channel flow on a rotating system just past transition under the influence of the Coriolis force <i>V. I. Vasanta Ram, B. Müller, and F. Azhari</i>	179

47 Transient evolution and high stratification scaling in horizontal mixing layers	
<i>C. Arratia, S. Ortiz, and J.-M. Chomaz</i>	183

Part III Control of turbulent flows

48 Toward cost-effective control of wall turbulence for skin friction drag reduction	
<i>N. Kasagi, Y. Hasegawa, and K. Fukagata</i>	189
49 Active control of turbulent boundary layer using an array of piezo-ceramic actuators	
<i>HL Bai, and Y. Zhou</i>	201
50 Flat plate turbulent boundary-layer control using vertical LEBUs	
<i>V.I. Kornilov and A.V. Boiko</i>	205
51 Estimation of the spanwise wall shear stress based on upstream information for wall turbulence control	
<i>B. Frohnäpfel, Y. Hasegawa, N. Kasagi, and S. Große</i>	209
52 Interactions between vortex generators and a flat plate boundary layers. Application to the control of separated flows.	
<i>T. Duriez, B. Thiria, T. Cambonie, J.E. Wesfreid and J.L. Aider</i>	213
53 Modulated global mode of a controlled wake	
<i>V. Parezanović, and O. Cadot</i>	217
54 Swirl effects in turbulent pipe flow	
<i>F. Nygård and H.I. Andersson</i>	221
55 Control of an axisymmetric turbulent wake by a pulsed jet	
<i>J.F. Morrison and A. Qubain</i>	225
56 Direct Numerical Simulations of turbulent mixed convection in enclosures with heated obstacles	
<i>O. Shishkina, and C. Wagner</i>	229
57 On drag reduction in turbulent channel flow over a superhydrophobic surfaces	
<i>C. Peguero and K. Breuer</i>	233
58 Response of periodically modulated turbulence	
<i>H.E. Cekli and W. van de Water</i>	237

59 Turbulent drag reduction by feedback: a Wiener-filtering approach

F. Martinelli, M. Quadrio, and P. Luchini 241

Part IV Vortex dynamics and structure formation

60 A driving mechanism of turbulent puff in pipe flow

M. Shimizu and S. Kida 249

61 Wavelet tools to study vortex bursting and turbulence production

M. Farge, J. Ruppert-Felsot, and P. Petitjeans 253

62 The minimum-enzrophy principle for decaying 2D turbulence in circular domains

G.H. Keetels, H.J.H. Clercx, G.J.F. van Heijst 257

63 Direct numerical simulation of a turbulent vortex ring

P.J. Archer, T.G. Thomas, and G.N. Coleman 261

64 Reconnection of vortex bundles

S. Alamri, A.J. Youd, and C. F. Barenghi 265

65 Turbulent energy cascade caused by vortex stretching

S. Goto 269

66 Instabilities and transient growth of trailing vortices in stratified fluid

C. Donnadieu, J.-M. Chomaz, and S. Ortiz 273

67 Implementation of vortex stretching into the two-dimensional Navier-Stokes Equations via arbitrary external straining

F. Sabetghadam, S.A. Ghaffari, and M. Dadashi 277

68 Turbulent cascade of quantum fluid at finite temperature

E. Lévêque, C.F. Barenghi, P. Diribarne, and P.-E. Roche 281

69 Visualization of quantum turbulence in $^3\text{He-B}$ by thermal excitations

Y.A. Sergeev, C.F. Barenghi, and N. Suramlishvili 285

70 The 3D structure of a dipole in a shallow two-layer fluid

R.A.D. Akkermans, L.P.J. Kamp, H.J.H. Clercx, and G.J.F. van Heijst 289

71 The 3D character of decaying turbulence in a shallow fluid layer	
<i>A.R. Cieslik, L.P.J. Kamp, H.J.H. Clercx, and G.J.F. van Heijst</i>	293
72 Vortex dynamics in a Karman street behind a heated cylinder: defects and potentialities of acoustic diagnostics	
<i>V.V. Chernov, P.L. Soustov, P.R. Gromov, A.B. Ezersky, and P. Paranthoen</i>	297
73 Asymmetric vortex shedding in the turbulent wake of a flat plate in a rotating fluid	
<i>H.A. Khaledi, M. Barri, and H.I Andersson</i>	301
74 Stability of steady vortices and new equilibrium flows from Imperfect-Velocity-Impulse diagrams	
<i>P. Luzzatto-Fegiz and C.H.K. Williamson</i>	305
75 The effect of freestream turbulence on far axisymmetric wakes	
<i>E. Rind, and I.P. Castro</i>	309
76 Application of the deterministic turbulence method to study of LEBU-device mechanism	
<i>V.I. Borodulin, Y.S. Kachanov, and A.P. Roschekhtayev</i>	313
77 The role of the intense vorticity structures in the turbulent structure of the jet edge	
<i>R.J.N. Reis, C.B. da Silva, J.C.F. Pereira</i>	317
78 Large scale dynamics of a jet in a counter flow	
<i>C. Duwig and J. Revstedt</i>	321
79 Dynamics of vortex filaments in turbulent flows and their impact on particle dispersion	
<i>A. Scagliarini, L. Biferale, and F. Toschi</i>	325
80 The effect of coherent structures on the secondary flow in a square duct	
<i>A. Sekimoto, A. Pinelli, M. Uhlmann, and G. Kawahara</i>	329

Part V Multiphase and non-Newtonian flows

81 How to discriminate between light and heavy particles in turbulence	
<i>H.I. Andersson, P.H. Mortensen, J.J.J. Gillissen, L.H. Zhao, and B.J. Boersma</i>	335

82 Anisotropic clustering and particles velocity statistics in shear turbulence	
<i>P. Gualtieri, F. Picano, G. Sardina, and C.M. Casciola</i>	339
83 Direct numerical simulation of inertial particle accelerations in near-wall turbulence: effect of gravity	
<i>V. Lavezzo, S. Gerashchenko, Z. Warhaft, L. Collins and A. Soldati</i>	343
84 Simulating fibre suspensions: Lagrangian versus statistical approach	
<i>L.H. Zhao, H.I. Andersson, J.J.J. Gillissen, and B.J. Boersma</i>	347
85 Inertial particles in a turbulent pipe flow: spatial evolution	
<i>F. Picano, G. Sardina, and C.M. Casciola</i>	351
86 Heat transfer mechanisms in bubbly Rayleigh-Benard convection	
<i>P. Oresta, R. Verzicco, D. Lohse and A. Prosperetti</i>	355
87 Scaling of polymer drag reduction with polymer and flow parameters in turbulent channel flow	
<i>D. H. Lee and R. Akhavan</i>	359
88 DNS study on diameter effect of drag reduction in viscoelastic-fluid flow	
<i>T. Ishigami, T. Tsukahara, and Y. Kawaguchi</i>	363
89 Modifications of the turbulent structure in a bubbly boundary layer	
<i>B. Jacob, M. Miozzi, A. Olivieri, E-F. Campana and R. Piva</i>	367
90 Budgets of polymer free energy in homogeneous turbulence	
<i>E. de Angelis, C.M. Casciola, and R. Piva</i>	371
91 Shear-induced self-diffusion in a Couette flow of a dilute suspension	
<i>E.S. Asmolov</i>	375

Part VI Atmospheric turbulence

92 Turbulent flow over rough walls	
<i>I.P. Castro</i>	381

93 Top-down and bottom-up eddy motion in wall bounded turbulence	
<i>P. Carlotti and F. Laddhari</i>	389
94 A study of turbulent Poiseuille-Ekman flow at different rotation rates using DNS	
<i>A. Mehdizadeh, and M. Oberlack</i>	393
95 Experimental study of forced stratified turbulence	
<i>P. Augier, P. Billant, E. Negretti, and J.-M. Chomaz</i>	397
96 DNS of the turbulent cloud-top mixing layer	
<i>J.P. Mellado, H. Schmidt, B. Stevens, and N. Peters</i>	401
97 Modelling and simulation of momentum and heat transfer in the atmospheric boundary layer over rough surface: study with improved turbulence model	
<i>A.F. Kurbatskiy and L.I. Kurbatskaya</i>	405
98 Wind direction effects on urban like roughness: an LES Study	
<i>J.M. Claus, I.P. Castro, and Z.-T. Xie</i>	409

Part VII Geophysical and astrophysical turbulence

99 Anisotropy in turbulent rotating convection	
<i>R.P.J. Kunnen, H.J.H. Clercx, and B.J. Geurts</i>	415
100 Nonlocal interactions and condensation in forced rotating turbulence	
<i>L. Bourouiba, and D. Straub</i>	419
101 Structural features of rotating sheared turbulence	
<i>F. Jacobitz, W.J.T. Bos, K. Schneider, and M. Farge</i>	423
102 Structure functions and energy transfers in a decaying rotating turbulence experiment	
<i>F. Moisy, L. Agostini, and G. Tan</i>	427
103 Table-top rotating turbulence: an experimental insight through particle tracking	
<i>L. Del Castello, H.J.H. Clercx, R.R. Trieling, A. Tsinober,</i>	431
104 On the structure of rapidly-rotating, decaying turbulence	
<i>P.A. Davidson and P.J. Staplehurst</i>	435

105 Large-eddy simulations of gravity current flows past submerged cylinders <i>E. Gonzalez-Juez, E. Meiburg, G. Constantinescu, and T. Tokyay</i>	439
106 Large scale quasi-2D structures and the problem of nonlinear bottom friction <i>A.A. Khapaev, S.V. Kostrykin, and I.G. Yakushkin</i>	443
107 Double-period oscillation of passive scalar flux in stratified turbulence <i>H. Hanazaki, T. Miyao, and T. Okamura</i>	447
108 Energy spectra of stably stratified turbulence <i>Y. Kimura, and J.R. Herring</i>	449
109 The wind-driven turbulent oscillating channel flow subjected to a stable stratification <i>W. Kramer, V. Armenio, and H.J.H. Clercx</i>	453
110 Numerical studies of turbulence in breaking internal waves <i>S.N. Yakovenko, T.G. Thomas, and I.P. Castro</i>	457
111 Vortex self-similarity and the evolution of unforced inviscid two-dimensional turbulence <i>D.G. Dritschel, R.K. Scott, C. Macaskill, G.A. Gottwald, and C.V. Tran</i>	461
112 Large Eddy Simulation of compressible magnetohydrodynamic turbulence in the local interstellar medium <i>A.A. Chernyshov, K.V. Karelsky and A.S. Petrosyan</i>	465

Part VIII Transport and mixing

113 Experimental studies of turbulent Rayleigh-Bénard convection <i>K.-Q. Xia</i>	471
114 Various flow amplitudes in 2D non-Oberbeck-Boussinesq Rayleigh-Bénard convection in water <i>E. Calzavarini, S. Grossmann, D. Lohse, K. Sugiyama</i>	479
115 A comparison of turbulent thermal convection between conditions of constant temperature and constant heat flux boundaries <i>H. Johnston and C.R. Doering</i>	483

116 Diffusion of heavy particles in turbulent flows <i>A.S. Lanotte, J. Bec, L. Biferale, M. Cencini, A. Scagliarini, and F. Toschi</i>	485
117 Quantification of heavy particle segregation in turbulent flows: a Lagrangian approach <i>E. Meneguz, M.W. Reeks, and A. Soldati</i>	489
118 The dispersion of lines written in a turbulent jet flow <i>M. Mirzaei, N.J. Dam, J.J. ter Meulen, and W. van de Water</i>	493
119 PDF modeling of vapour micromixing in turbulent evaporating sprays <i>G. Anand and P. Jenny</i>	497
120 Forces on light particles in stratified turbulence <i>M. van Aartrijk, and H.J.H. Clercx</i>	501
121 Renormalized transport of inertial particles <i>M. Martins Afonso, A. Celani, A. Mazzino, and P. Olla</i>	505
122 Turbulence modification in the vicinity of a solid particle <i>A. Naso and A. Prosperetti</i>	509
123 Particle transport in turbulent wakes behind spherical caps <i>N.G.W. Warncke, R. Delfos, and J. Westerweel</i>	513
124 Turbulent heat transfer and large-scale flow in convection cells with aspect ratio $\Gamma > 1$ <i>M.S. Emran, J. Bailon-Cuba, and J. Schumacher</i>	517
125 Shot noise of thermal plumes : Evidence of a boundary layer instability consistent with the onset of Kraichnan's regime of convection <i>F. Gauthier, and P.-E. Roche</i>	521
126 Scalar mixing in turbulent confined flow <i>D. Kolomensky, B. Kadoch, W.J.T. Bos, K. Schneider, and P. Angot</i> ..	525
127 Prandtl-, Rayleigh-, and Rossby-number dependence of heat transport in turbulent rotating Rayleigh-Bénard convection <i>R.J.A.M. Stevens, J.-Q. Zhong, H.J.H. Clercx, R. Verzicco, D. Lohse and G. Ahlers</i>	529
128 Oscillations of large-scale structures in turbulent mixed convection in a rectangular enclosure <i>A. Westhoff, D. Schmeling, J. Bosbach, and C. Wagner</i>	533

129 Interaction between slope flows and an urban heat island <i>M. Giorgilli, M. Moroni, P. Monti, and A. Cenedese</i>	537
130 Origin of the small-scale anisotropy of the passive scalar fluctuations <i>J. Kalda and A. Morozenko</i>	541
131 Mixing asymmetry in variable density turbulence <i>D. Livescu and J.R. Ristorcelli</i>	545
132 Turbulent transport close to a wall <i>G. Boffetta, F. de Lillo, and A. Mazzino</i>	549
133 Persistence of inhomogeneity of the turbulence generated by the static grid structures <i>Ö. Ertunç, N. Özyılmaz, H. Lienhart, and F. Durst</i>	553
134 On the energy decay of grid generated turbulence <i>P.-A. Krogstad and P.A. Davidson</i>	557
135 Turbulent entrainment in jets: the role of the kinetic energy <i>R.M.R. Taveira, C.B. da Silva, and J.C.F. Pereira</i>	561
136 Fast and slow changes of the length of gradient trajectories in homogeneous shear turbulence <i>P. Schäfer, M. Gampert, L. Wang and N. Peters</i>	565

Part IX Wall bounded flows

137 Coherent streaky structures and optimal perturbations of turbulent boundary layers <i>C. Cossu, G. Pujals, and S. Depardon</i>	573
138 Time-mean description of turbulent bluff-body separation in the high-Reynolds-number limit <i>B. Scheichl, A. Kluwick, and F.T. Smith</i>	577
139 Isotropic free-stream turbulence promotes anisotropy in a turbulent boundary layer <i>S. Torres-Nieves, B. Brzek, J. Lebrón, R.B. Cal, H.S. Kang, C. Meneveau, and L. Castillo</i>	581
140 Travelling waves in a straight square duct <i>M. Uhlmann, G. Kawahara, and A. Pinelli</i>	585

141 Thermal boundary layers in turbulent Rayleigh-Bénard convection	
<i>R. du Puits, C. Resagk, and A. Thess</i>	589
142 DNS of turbulent transport of scalar concentration in various thermally stratified boundary layers	
<i>H. Hattori, S. Yamazaki and Y. Nagano</i>	593
143 Wall turbulence without walls	
<i>Y. Mizuno, and J. Jiménez</i>	597
144 Turbulent flow and heat transfer in eccentric annulus	
<i>N.V. Nikitin, S.I. Chernyshenko, and H.L. Wang</i>	601
145 On imperfect hot-wire resolution issues and their effect on mean quantities	
<i>R. Örlü, J.H.M. Fransson, and P.H. Alfredsson</i>	605
146 The diagnostic plot - a new way to appraise turbulent boundary layer data	
<i>P.H. Alfredsson, R. Örlü, T. Kurian, J.H.M. Fransson, A. Segalini, J.-D. Rüedi, and A. Talamelli</i>	609
147 DHMPIV and Tomo-PIV measurements of three-dimensional structures in a turbulent boundary layer	
<i>O. Amili, C. Atkinson, and J. Soria</i>	613
148 LDA measurements of Reynolds stresses in a swirling turbulent pipe flow	
<i>B.Z. Genç, Ö Ertunç, J. Jovanović, and A. Delgado</i>	617
149 Time-resolved stereoscopic PIV of the log-layer in fully developed turbulent pipe flow	
<i>S. Große, D.J. Kuik, and J. Westerweel</i>	621
150 Massive separation in rotating turbulent flows	
<i>M. Barri, G.K. El Khouury, H.I. Andersson and B. Pettersen</i>	625
151 Scaling of torque in turbulent Taylor-Couette flow with background rotation	
<i>R. Delfos, F. Ravelet, and J. Westerweel</i>	629
152 Velocity gradient statistics in a turbulent channel flow	
<i>D. Krasnov, T. Boeck, and J. Schumacher</i>	633
153 Channel flow LES with stochastic modeling of the sub-grid acceleration	
<i>R. Zamansky, I. Vinkovic, and M. Gorokhovski</i>	637

154 DNS of three-dimensional separation in turbulent diffuser flows	
<i>J. Ohlsson, P. Schlatter, P.F. Fischer, and D.S. Henningson</i>	641
155 Optimal amplification of large-scale streaks structures in the turbulent Couette flow	
<i>Y. Hwang, and C. Cossu</i>	645
156 Symmetry of coherent vortices in plane Couette flow	
<i>T. Itano, S.C. Generalis, S. Toh, and J.P. Fletcher</i>	649
157 Universal character of perturbation growth in near-wall turbulence	
<i>N. Nikitin</i>	653
158 Experimental assessment of turbulent drag reduction by wall traveling waves	
<i>M. Quadrio, F. Auteri, A. Baron, M. Belan, and A. Bertolucci</i>	657
159 Effects of very-large roughness in turbulent channel flow	
<i>D.M. Birch, and J.F. Morrison</i>	661
160 Roughness effects in a rotating turbulent channel	
<i>V.D. Narasimhamurthy and H.I. Andersson</i>	665
161 Mean flow and turbulence over rough surfaces	
<i>M. Amir and I.P. Castro</i>	669

Part X Intermittency and scaling

162 DNS of vibrating grid turbulence	
<i>G. Khujadze and M. Oberlack</i>	675
163 Step onset from an initial uniform distribution of turbulent kinetic energy	
<i>D. Tordella and M. Iovieno</i>	677
164 Fractal-generated turbulent scaling laws from a new scaling group of the multi-point correlation equation	
<i>M. Oberlack and G. Khujadze</i>	681
165 Casimir Cascades in two-dimensional turbulence	
<i>J.C. Bowman</i>	685
166 The development of truncated inviscid turbulence and the FPU-problem	
<i>G. Ooms, and B.J. Boersma</i>	689

190 On under-resolved simulation of atmospheric convection <i>Z. Piotrowski, P.K. Smolarkiewicz, S.P. Malinowski, and A.A. Wyszogrodzki</i>	787
191 The multispectral method: progress and prospects <i>M. Roberts, J.C. Bowman, and B. Eckhardt</i>	791
192 Discretization errors and subgrid scale implementations in Large Eddy Simulations <i>A. Viré and B. Knaepen</i>	795
Part XII Magnetohydrodynamical turbulence	
193 Reversals of the magnetic field generated by a turbulent flow <i>S. Fauve, E. Dormy, C. Grissinger and F. Pétrélis</i>	801
194 Direct measurement of turbulent magnetic diffusivity in liquid metal flow <i>P. Frick, S. Denisov, V. Noskov, and R. Stepanov</i>	809
195 Shell models for MHD turbulence <i>T. Lessinnes, D. Carati, M.K. Verma, and F. Plunian</i>	813
196 Turbulence induced by magnetic fields <i>K. Bajer and K.A. Mizerski</i>	817
197 Spin-up in MHD turbulence <i>S. Neffaa, W.J.T. Bos, and K. Schneider</i>	821
198 Influence of helicities on statistical properties of MHD turbulence <i>P. Frick, I. Mizeva, and R. Stepanov</i>	825
199 Transient growth in MHD duct flow <i>T. Boeck, D. Krasnov, M. Rossi, and O. Zikanov</i>	829
200 Optical visualisation of the flow around a cylinder in electrolyte under strong axial magnetic field <i>O. Andreev, A. Kobzev, Yu. Kolesnikov, and A. Thess</i>	833
201 Synthetic turbulence model and DNS for magnetohydrodynamics with rotation <i>B. Favier, F.S. Godeferd, and C. Cambon</i>	837

202 Spectral analysis of energy transfers in anisotropic MHD turbulence*B. Teaca, D. Carati, B. Knaepen, and M.K. Verma* 841

Part XIII Acoustics of turbulence flows

203 Boundary layer influence on cavity noise generation*V. Koschitzky, R. Delfos, B.J. Boersma, and J. Westerweel* 847**204 Instability waves as a source of subsonic jet noise***V. Suponitsky, and N.D. Sandham* 851**205 Experimental study of sound production for constricted channels: application to simplified vocal tract geometries***O. Estienne, A. van Hirtum, H. Bailliet, and X. Pelorson* 855**206 Turbulent pressure statistics in an underwater boundary-layer experiment***J. Abshagen* 859**207 Spectral reconstruction of sound radiated by an organ pipe***M. Abel and K. Ahnert* 863**208 Aerodynamic sound generation by turbulence in shear flows***G. Khujadze, G. Chagelishvili, M. Oberlack, A. Tevzadze, and G. Bodo* 867

Part XIV Reacting and compressible turbulence

209 On implicit turbulence modeling for LES of compressible flows*S. Hickel, and J. Larsson* 873**210 Injection of a plane reacting jet into a supersonic turbulent channel flow***C. Schaupp and R. Friedrich* 877**211 Turbulent premixed flame fronts: fractal scaling and implications for LES modeling***G. Troiani, F. Picano, and C.M. Casciola* 881**212 Large eddy simulation of a lean premixed swirl flame in complex geometry - comparison of two turbulent combustion models***P. Wang, J. Fröhlich and U. Maas* 885

Part XV Posters

213 KS inertial range and validity of Richardson's law <i>F. C. G. A. Nicolleau</i>	891
214 Lagrangian vortex methods in turbulent channel flows <i>R. Yokota, K. Fukagata, and S. Obi</i>	893
215 Unstable and turbulent flows simulated by means of the Boltzmann kinetic equation <i>V.V. Aristov, A.A. Frolova, O.I. Rovenskaya, and S.A. Zabelok</i>	895
216 Natural transition in plane Poiseuille flow <i>H.G. Silva, R.A.C. Germanos, and M.A.F. Medeiros</i>	897
217 Stabilization of the turbulent flows in anisotropic viscoelastic tubes <i>N. Kizilova and M. Hamadiche</i>	899
218 Simulation of induced transition in hypersonic regime: Validation of foot print of the vortical structures <i>F. Pinna, S. Tirtley, O. Chazot, and P. Rambaud</i>	901
219 Active grid generated turbulence <i>P. Knebel, and J. Peinke</i>	903
220 Velocity characterisation of axisymmetric jets from human-sized channels <i>X. Grandchamp, A. Van Hirtum, X. Pelorson</i>	905
221 The role of nonlocality in unsteady turbulence <i>W.J.T. Bos, and R. Rubinstein</i>	907
222 Coherent enstrophy production and dissipation in 2D turbulence with and without walls <i>R. Nguyen van yen, M. Farge, and K. Schneider</i>	909
223 Space-scale analysis of enstrophy transfers in two-dimensional turbulence <i>P. Fischer and Ch. H. Bruneau</i>	911
224 Hydrodynamic stability of a stratified suspension flow in a plane channel <i>S.A. Boronin</i>	913
225 Localization of compact invariant sets of the Lorenz' 1984 model <i>K.E. Starkov</i>	915

226 Large-scale energy dissipation and equatorial superrotation in shallow water turbulence	
<i>R.K. Scott</i>	917
227 The effects of rain on wind-driven turbulent flow	
<i>N. Takagaki, I. Iwano, S. Komori</i>	919
228 New results on grid-generated turbulence	
<i>Thomas Kurian and J.H.M. Fransson</i>	921
229 Gas-liquid interaction under vibration field effect	
<i>V. Kholmer and L. Grinis</i>	923
230 An Invariant Nonlinear Eddy Viscosity Model based on a 4D Modelling Approach	
<i>M. Frewer</i>	925
231 Projection of the turbulence closure problem on the invariant triangle as the basis for improved predictions of complex flows	
<i>J. Jovanović, B. Frohnäpfel, and M. Breuer</i>	927
232 A computational study of the hydrodynamic forces on a rough wall	
<i>C. Braun, M. García-Villalba, and M. Uhlmann</i>	929
233 Turbulent flow structure investigation within target fluidic flowmeter	
<i>F.H. Hannemann, A.F. Nowakowski, F.C.G.A. Nicolleau, and H. Zheng</i>	931
234 The wake of a single 2D roughness element immersed in a turbulent boundary layer	
<i>B.T. Tee, L.K.B. Li, and T.B. Nickels</i>	933
235 High spanwise wall-shear stress events in turbulent duct flow	
<i>S. Große, and W. Schröder</i>	935
236 A POD-based reconstruction method for the flow in the near-wall region	
<i>B. Podvin, Y. Fraigneau, J. Jouanguy, and J.P. Laval</i>	937
237 Near-wall velocity and wall shear stress correlations in a separating boundary layer	
<i>P. Nathan and P.E. Hancock</i>	939

238 Lifetimes of flow topology in a turbulent boundary layer <i>G.E. Elsinga and I. Marusic</i>	941
239 RDT or low wavenumber modes' dynamics ? <i>S.R. Bogdanov</i>	943
240 Intermittency in high resolution direct numerical simulation of turbulence in a periodic box: a wavelet viewpoint <i>K. Yoshimatsu, N. Okamoto, K. Schneider, Y. Kaneda, and M. Farge</i> .	945
241 Detached eddy simulation of turbulence flows in a pipe with fractal shape orifices <i>H.W. Zheng, F.C.G.A. Nicolleau, and N. Qin</i>	947
242 Recovery of subgrid-scale turbulence kinetic energy in LES of channel flow <i>Y. Tang, and R. Akhavan</i>	949
243 Beyond Reynolds stress analysis of quasilaminar flows <i>J. Araya, R.B. Cal, C. Meneveau and L. Castillo</i>	951
244 Anisotropic organised eddy simulation for statistical and hybrid modelling of turbulent flows around bodies <i>R. Bourguet, M. Braza, R. El Akoury and G. Harran</i>	953
245 Experimental vortex generation and instabilities at flow around a magnetic obstacle <i>Yu. Kolesnikov and A. Thess</i>	955
246 A dynamic multiscale subgrid model for MHD turbulence based on Kolmogorov's equation <i>L. Fang, W.J.T. Bos, L. Shao, and J.P. Bertoglio</i>	957
247 Low-Prandtl number MHD cooling in a vertical cylindrical container <i>I.E. Sarris, A.I. Iatridis, C. Dritselis, and N. Vlachos</i>	959
248 Anomalous scaling of passively advected magnetic field in the kinematic MHD Kazantsev-Kraichnan model <i>E. Jurčišinova, M. Jurčišin, and R. Remecky</i>	961
249 A new compressible turbulence model for free and wall-bounded shear layers <i>J.Y. Kim and S.O. Park</i>	963
250 Modelling of turbulent flow in a gas burner <i>K. Kwiatkowski and K. Bajer</i>	965
