

Table of Contents

40 Years of SQUIDS in Biomagnetism: Highlights of Heart and Brain Research

Forty Years of Magnetocardiology	1
<i>Gerhard Stroink</i>	
Highlights of 40 Years of SQUID-Based Brain Research and Clinical Applications	9
<i>Cheryl J. Aine</i>	

Instrumentation: MEG

Development of a Whole-Head Child MEG System	35
<i>Y. Adachi, M. Miyamoto, J. Kawai, M. Kawabata, M. Higuchi, D. Oyama, G. Uehara, H. Ogata, H. Kado, Y. Haruta, G. Tesan, S. Crain</i>	
Characteristics of the Helium Circulation System on the 440 CH Vector Type MEG	39
<i>Tsunehiro Takeda, Masayoshi Okamoto, Keishi Katagiri</i>	
Correction of Disturbances Caused by Temporary and Continuous Head Movements	43
<i>J. Nenonen, J. Nurminen, D. Kičić, R. Bikmullina, P. Lioumis, V. Jousmäki, S. Taulu, L. Parkkonen, M. Putaala, S. Kähkönen</i>	
Video-MEG: Integration of Digital Video to MEG Epilepsy Recordings	47
<i>Juha Wilenius, Andrey Zhdanov, Erik Larismaa, Lauri Parkkonen, Matti Kajola, Jaakko Lyytinen, Antti Ahonen, Ossi Miikkulainen, Jyrki P. Mäkelä, Ritva Paetau</i>	
Demodulated Effect of SQUID to Magnetic Signal Outside Frequency Bandwidth	50
<i>Daisuke Oyama, Masanori Higuchi, Jun Kawai, Yoshiaki Adachi, Gen Uehara, Hisashi Kado</i>	
Asymmetric Three-Dimensional Finite Element Analysis of a Magnetically Shielded Room with Access Ports	54
<i>Broc A. Burke, Solomon G. Diamond</i>	

Instrumentation: MCG

Mapping the Cardiomagnetic Field with 19 Room Temperature Second-Order Gradiometers	58
<i>A. Weis, G. Bison, N. Castagna, S. Cook, A. Hofer, M. Kasprzak, P. Knowles, J.-L. Schenker</i>	
Towards Clinical MCG with Room-Temperature Sensors	62
<i>Gertrud Lembke, Markus Stumpf, Sergio Nicola Ern�, Georg Bison</i>	
Improvement of Small-Channel MCG System for Unshielded Environment	66
<i>Mykola M. Budnyk, Oleksandr V. Zakorcheny, Vitaly C. Koshelnyk, Vitaly M. Budnyk, Volodymyr V. Lukashyk, Yuriy D. Minov, Pavlo G. Sutkovyi, Tetyana M. Ryzhenko</i>	

Instrumentation: Multi-modal Integration - MEG, Low-Field MRI, EEG, fMRI, TMS, NIRS	
Magnetoresistive Hybrid Sensors for Simultaneous Low-Field MRI and Biomagnetic Measurements	70
<i>Natalia Sergeeva-Chollet, Hadrien Dyvorne, Hedwige Polovy, Myriam Pannetier-Lecoeur, Claude Fermon</i>	
Safety in Simultaneous Ultra-Low-Field MRI and MEG: Forces Exerted on Magnetizable Objects by Magnetic Fields	74
<i>Juhani Dabek, Fredrik Sannholm, Jaakko O. Nieminen, Panu T. Vasanen, Risto J. Ilmoniemi</i>	
Hybrid MEG-MRI: Geometry and Time Course of Magnetic Fields Inside a Magnetically Shielded Room	78
<i>P.T. Vasanen, J.O. Nieminen, J. Dabek, R.J. Ilmoniemi</i>	
Magnetic Resonance Relaxometry at Low and Ultra Low Fields	82
<i>P. Volegov, M. Flynn, R. Kraus, P. Magnelind, A. Matlashov, P. Nath, T. Owens, H. Sandin, I. Savukov, L. Schultz, A. Urbaitis, V. Zotev, M. Espy</i>	
Characterizing Cerebral and Extracerebral Components in TMS-Evoked Near-Infrared Spectroscopy Signals	88
<i>Hanna Mäki, Tiina Näsi, Kalle Kotilahti, Ilkka Nissilä, Pekka Meriläinen, Risto J. Ilmoniemi</i>	
Real-Time Spatial Localization System of Brain Regions for TMS Application by Co-registration with fMRI	92
<i>A.S.C. Peres, V.H.O. Souza, E.M. Rodrigues, C.E.G. Salmon, D.B. de Araujo, O. Baffa</i>	
Multimodal Integration: Constraining MEG Localization with EEG and fMRI	97
<i>Richard N.A. Henson</i>	
MEG Modeling and Spatio-temporal Source Localization	
Academic Software Toolboxes for the Analysis of MEG Data	101
<i>S. Baillet, F. Tadel, R.M. Leahy, J.C. Mosher, A. Delorme, S. Makeig, R. Oostenveld, M. Hämäläinen, S.S. Dalal, J. Zumer, M. Clerc, C.H. Wolters, S. Kiebel, O. Jensen</i>	
The Adjoint Method for General EEG and MEG Sensor-Based Lead Field Equations	105
<i>Théodore Papadopoulou, Sylvain Vallaghé, Maureen Clerc</i>	
The Symmetric BEM: Bringing in More Variables for Better Accuracy	109
<i>Maureen Clerc, Alexandre Gramfort, Emmanuel Olivi, Theo Papadopoulou</i>	
From Classical to Bayesian Estimators in the Interpretation of MEG and EEG	113
<i>Jukka Sarvas, Risto J. Ilmoniemi</i>	
Skull Thickness versus Mesh Density — A Study on BEM Discretization Error	117
<i>Pascal Werner, Matti Stenroos</i>	
Domain Decomposition for Coupling Finite and Boundary Element Methods in EEG	120
<i>Emmanuel Olivi, Maureen Clerc, Théodore Papadopoulou</i>	

Multi-condition M/EEG Inverse Modeling with Sparsity Assumptions: How to Estimate What Is Common and What Is Specific in Multiple Experimental Conditions	124
<i>Alexandre Gramfort</i>	
MEG-Clinic: A Comprehensive Software Solution for Routine MEG Analysis	128
<i>Elizabeth Bock, Sylvain Baillet</i>	
MEG-SIM Portal: Reconstructions from Realistic Simulations of Sensory and Cognitive Processing	132
<i>Lori Sanfratello, Julia M. Stephen, Douglas Ranken, Elaine Best, Theodore Wallace, Jason MacArthur, Katie Gilliam, Cheryl J. Aine</i>	
Time-Frequency Source Estimation from MEG Data	136
<i>R.E. Greenblatt, A. Ossadtchi, L. Kurelowech, D. Lawson, J. Criado</i>	
Array-Gain Constraint Minimum-Norm Spatial Filter with Recursively Updated Gram Matrix for Biomagnetic Source Reconstruction	140
<i>Kensuke Sekihara, Isamu Kumihashi</i>	
Multiple Constrained Minimum-Variance Beamformers for Reconstruction of Induced and Evoked Neural Activity	144
<i>Alexander Moiseev</i>	
Speeding-Up MEG Beamforming Source Imaging by Correlation between Measurement and Lead-Field Vector	148
<i>Jun Hee Hong, Sung Chan Jun</i>	
A Method for MEG Data That Obtains Linearly-Constrained Minimum-Variance Beamformer Solution by Minimum-Norm Least-Squares Method	152
<i>Toshiaki Imada</i>	
Current Dipole Estimation in MEG by Spatial Interpolation of Magnetic Sensors	155
<i>Hiroshi Fukuda, Masato Odagaki, Atsushi Kodabashi, Toshiro Fujimoto, Osamu Hiwaki</i>	
The Compressible Estimate (CE) of MEG Current Sources	159
<i>Wei-Tang Chang, Fa-Hsuan Lin</i>	
Single-Trial Analysis for Empirical MEG Data	163
<i>Jun Hee Hong, Minkyu Ahn, Sung Chan Jun</i>	
Development of Human Brainwave Simulating Device for Magnetoencephalography and the Corresponding Dipole Localization Study	167
<i>Jeff Liu, Yoshinao Kishimoto, Teresa Cheung, Ash M. Parameswaran, Kenji Amaya</i>	
Neural Signal Processing	
MEG Virtual Channel Methods for Movement Prediction and Training	171
<i>T. Yeager, T.D. Ard, F.W. Carver, T. Holroyd, R. Coppola</i>	
An Algebraic Method for Eye Blink Artifacts Detection in Single Channel EEG Recordings	175
<i>Zoran Tiganj, Mamadou Mboup, Christophe Pouzat, Lotfi Belkoura</i>	

Relevant Observations for Averaging Stimulus Evoked Magnetic Fields across Trials and across Subjects	179
<i>Norman Zacharias, Cezary Sielużycki, Artur Matysiak, Reinhard König, Peter Heil</i>	
Quantification of the Time and Frequency Signatures of Visual Cortical Activation in the Developing Brain: A Study with MEG and Wave-Cross Spectrogram	183
<i>Xinyao Guo, Jing Xiang, Yangmei Chen, Lu Meng, Xiaoshan Wang, Yingying Wang</i>	
Cluster-Based Algorithm for ROI Analysis and Cognitive State Decoding Using Single-Trial Source MEG Data	187
<i>Gustavo Sudre, Yang Xu, Rob Kass, Doug J. Weber, Wei Wang</i>	
Decoding Subjective Simultaneity from Neuromagnetic Signals	191
<i>Kohske Takahashi, Shohei Hidaka, Katsumi Watanabe</i>	
Functional Connectivity of the Brain	
Methods for Determination of Functional Connectivity in Brain	195
<i>Katarzyna J. Blinowska</i>	
Estimating Directions of Information Flow between Cortical Activities Using Phase-Slope Index	199
<i>Kensuke Sekihara, Julia Owen, Hagai Attias, David Wipf, Srikantan S. Nagarajan</i>	
Estimating Causality Measures from Reconstructed Source Time Courses When Large Background Activities Exist	203
<i>Kensuke Sekihara, Julia Owen, Hagai Attias, Srikantan S. Nagarajan</i>	
Constructing Surrogate Data to Control for Artifacts of Volume Conduction for Functional Connectivity Measures	207
<i>Forooz Shahbazi, Arne Ewald, Andreas Ziehe, Guido Nolte</i>	
Neural Oscillations	
MEG Detects Alpha-Power Modulations in Pulvinar	211
<i>Yohan Attal, Jerome Yelnik, Eric Bardinet, Marie Chupin, Sylvain Baillet</i>	
Characterization of Spontaneous Neuromagnetic Brain Rhythms Using Independent Component Analysis of Short-Time Fourier Transforms	215
<i>Pavan Ramkumar, Aapo Hyvärinen, Lauri Parkkonen, Riitta Hari</i>	
Prestimulus Oscillatory Brain Activity Influences the Perception of the McGurk Effect	219
<i>Julian Keil, Niklas Ihssen, Nathan Weisz</i>	
Relating Motor Cortical Oscillations to Motor γ-Aminobutyric Acid (GABA)	223
<i>William Gaetz, James C. Edgar, D.-J. Wang, Timothy P.L. Roberts</i>	
Fetal and Neonatal Biomagnetism	
Connectivity in the Human Fetal Brain	227
<i>I. Kostovic, M. Pletikos</i>	

Table of Contents	XV
Electrical Brain Function of Prematurely Born Babies	230
<i>Sampsa Vanhatalo</i>	
Early Development of Sensory Systems in Prematurely Born Babies	234
<i>Sampsa Vanhatalo</i>	
Maturation of the Cortical Somatosensory Processing as Studied by MEG	238
<i>Päivi Nevalainen, Leena Lauronen, Elina Pihko</i>	
Pediatric CNS Pathophysiology	242
<i>Julia M. Stephen, Sven Braeutigam, Paul L. Furlong, Urs Ribary, Timothy P.L. Roberts, Nazin Virji-Babul</i>	
Fetal Development Assessed by Self-Organization Indices	246
<i>Dirk Hoyer, Uwe Schneider</i>	
Altered Long-Range Phase Synchronization and Cortical Activation in Children Born Very Preterm	250
<i>Sam M. Doesburg, Urs Ribary, Anthony T. Herdman, Teresa Cheung, Alexander Moiseev, Hal Weinberg, Michael F. Whitfield, Anne Synnes, Mario Liotti, Daniel Weeks, Ruth E. Grunau</i>	
The Frequency Profile of Somatosensory Evoked Magnetic Fields in the Developing Brain	254
<i>Y. Wang, J. Xiang, D.F. Rose, T. Holroyd, E. Harris, T.J. deGruuw</i>	
Detecting Gross Fetal Movements Using Fetal Magnetocardiography	258
<i>Peter Van Leeuwen, Daniel Geue, Silke lange, Dietrich H.W. Grönemeyer</i>	
Fetal Maternal Heart Rate Entrainment under Controlled Maternal Breathing	262
<i>Peter Van Leeuwen, Daniel Geue, Marko Thiel, Silke Lange, D. Cysarz, Mamen C. Romano, Jürgen Kurths, Dietrich H.W. Grönemeyer</i>	
Magnetomyography Combined with Fetal Magnetocardiography in the Registration of Uterine Contractions	266
<i>Peter Van Leeuwen, Wolfgang Hatzmann, Sven Schiermeier, and Dietrich H.W. Grönemeyer</i>	
Characterizing Fetal Sympatho-Vagal Balance through Multivariate Time-Varying Autoregressive Modeling of Magnetocardiographic Data	270
<i>D. Gutiérrez, F.M. García-Guevara, I. Kiefer, R. Draganova, H. Preissl</i>	
MEG: Sensory Systems	
Objective Assessments of Bone-Conducted Ultrasonic (BCU) Hearing by Auditory Evoked Fields	274
<i>Seiji Nakagawa</i>	
Observing Mismatch Fields from Human Auditory Discrimination of Heavily Damped Frequency Component Adjustments	278
<i>S. Gardeen, A. Leuthold, J.H. Broadhurst</i>	
Cortical Dynamics Underlying the Visual Perception of Stationary and Moving Stimuli	282
<i>Wenqi Sun, Alexander Moiseev, Faisal Beg, Urs Ribary, Naznin Virji-Babul</i>	

Neural Interactions between Dorsal and Ventral Visual Subsystems While Perceiving 3-D Structure from 2-D Motion	286
<i>Sunao Iwaki, John W. Belliveau</i>	
Objective Detection of the Flicker Fusion Threshold with Pupil Diameter and Visual Evoked Magnetic Field	290
<i>Nobuyoshi Harada, Sunao Iwaki, Mitsuo Tonoike</i>	
Effects of Adaptation on Visual Sensitivity and MEG Responses to the Envelope of AM Flicker	294
<i>Yosuke Okamoto, Seiji Nakagawa</i>	
Long-Range Coupling of Prefrontal Cortex and Visual (MT) or Polysensory (STP) Cortical Areas in Motion Perception	298
<i>Lucia Maria Vaina, Finnegan Calabro, Fa-Hsuan Lin, Matti S. Hämäläinen</i>	
In Search of Neural Signatures of Visual Binding : A MEG/SSVEF Study	302
<i>Charles Aissani, Benoit Cottureau, Anee-Lise Paradis, Jean Lorenceau</i>	
Repeatability of AEF and SEF from Static and Moving Head Positions	306
<i>Jukka Nenonen, Lauri Parkkonen, Liisa Helle, Samu Taulu, Antti Ahonen</i>	
Functional Motor Mapping Using Corticokinetic Coherence	310
<i>Mathieu Bourguignon, Xavier De Tiège, Marc Op de Beeck, Benoît Pirotte, Patrick Van Bogaert, Serge Goldman, Riitta Hari, Veikko Jousmäki</i>	
Neurocognition	
Face Processing in Children: Novel MEG Findings	314
<i>Margot J. Taylor, Travis Mills, Linda Zhang, Elizabeth W. Pang</i>	
Bottom-Up and Top-Down Driven Attentional Effects on Auditory Evoked Fields	318
<i>Hidehiko Okamoto, Henning Stracke, Lothar Lagemann, Christo Pantev</i>	
Attention and Processing of Relevant Visual Information While Simulated Driving: A MEG Study	322
<i>A. Fort, R. Martin, S. Daligault, A. Jacquet-Andrieu, C. Delpuech</i>	
Temporal Dissection of Stimulus-Driven and Task-Driven Processes during Perceptual Decision about 3D SFM Stimuli	326
<i>Agnieszka Miskiewicz, Stéphane Buffat, Jean Lorenceau, Anne-Lise Paradis</i>	
MEG Study of Amygdala Responses during the Perception of Emotional Faces and Gaze	330
<i>Thibaud Dumas, Yohan Attal, Marie Chupin, Roland Jouvent, Stéphanie Dubal, Nathalie George</i>	
Dynamic Brain Responses to Semantic Incongruencies in the Visually Presented Language Streams	334
<i>Kouichi Sutani, Sunao Iwaki</i>	
Time Course and Neural Network for Comparing Written and Spoken Words: A MEG and DTI Study	338
<i>Lu Meng, Jing Xiang, Douglas Rose, Rupesh Kotecha, Jennifer Vannest, Anna Byars, Ton Degrauw</i>	

Neuronal Effects of the SpeechEasy Treatment for Stuttering	342
<i>S.M. Bowyer, J. Peacock, N. Tepley, J.E. Moran</i>	
MEG Detection of Attention and Memory Processes in Individuals with Dyslexia	346
<i>S.M. Bowyer, L. Pawluk, A. Olszewski, M.L. Gallaway, A. Mansour, D. Jacobson, L. Erdodi, P. Lewandowski-Powley, J. Moran, N. Tepley, R. Lajiness-O'Neill</i>	
Oscillatory Activity in Prefrontal Cortex during Implicit Letter-Location Binding	350
<i>Claudia Poch, Pablo Campo, Fabrice B.R. Parmentier, Jane V. Elsley, Francisco del Pozo, Fernando Maestú</i>	
Spectral Power of Brain Activity Associated with Emotion — A Pilot MEG Study	354
<i>George Zouridakis, Udit Patidar, Nikhil S. Padhye, Luca Pollonini, Antony Passaro, Andrew C. Papanicolaou</i>	
Fair Play in the Brain – Cortical Activity in Response to Fair and Unfair Offers of a Fictitious Partner in a Gambling Design	358
<i>Astrid C. Steffen, Gerald Schneider, Brigitte Rockstroh</i>	
MEG: Brain-Computer Interface	
rtMEG: A Real-Time Software Toolbox for Brain-Machine Interfaces Using Magnetoencephalography	362
<i>Gustavo Sudre, Wei Wang, Tao Song, Matti Kajola, Ramana Vinjamuri, Jennifer Collinger, Alan Degenhart, Anto Bagic, Doug J. Weber</i>	
Source Space Based Brain Computer Interface	366
<i>Minkyu Ahn, Jun Hee Hong, Sung Chan Jun</i>	
Exploiting Prior Neurophysiological Knowledge to Improve Brain Computer Interface Performance	370
<i>Arne Ewald, Andreas Ziehe, Forooz Shahbazi, Guido Nolte</i>	
MEG: Clinical Applications	
Neural Dynamics of Alcohol Effects on Cognitive Control: Eriksen Flanker Task	374
<i>Ksenija Marinkovic, Sheeva Azma</i>	
From Auditory Change Detection to Reading and Word Processing: Impairments in Children with Intractable Epilepsy	378
<i>Milena Korostenskaja, Maria Pardos, Ki Hyeon Lee, Hisako Fujiwara, Teija Kujala, Jing Xiang, Jennifer Vannest, Yingying Wang, Nat Hemasilphin, Ton deGrauw, Douglas Rose</i>	
Hemispheric Differences in Neural Activation during Gaze Cueing in Autism Spectrum Disorder (ASD) Measured by Magnetoencephalography (MEG)	381
<i>R. Lajiness-O'Neill, A.M. Chase, A. Olszewski, M.A. Boyle, L. Pawluk, A. Mansour, D. Jacobson, M.L. Gallaway, P. Lewandowski-Powley, B. Gorka, J. Moran, S.M. Bowyer</i>	
Cortico-Motor Coherence during Deep Brain Stimulation for Parkinson's Disease	385
<i>Chun Kee Chung</i>	

MEG Slow Wave Dipole Density (SWDD) in Presurgical Evaluation of Epilepsy Patients: Preliminary Results of a Prospective Study	389
<i>Martin Kaltenhäuser, Stefan Rampp, Tanja Ehrenfried, Marcel Heers, Hermann Stefan</i>	
Brain Network Connectivity Dynamics during Voluntary Finger Movement in Right Handed Adults with Down Syndrome: Evidence for Contralateral and Ipsilateral Dominance	393
<i>N. Moiseeva, A. Moiseev, I. Lott, R. Haier, K. Head, U. Ribary, N. Virji-Babul</i>	
White Matter Abnormalities in Children with Temporal Lobe Epilepsy: A DTI and MEG Study	397
<i>Lu Meng, Jing Xiang, Douglas Rose, Rupesh Kotecha, Jennifer Vannest, Anna Byars, Ton Degrauw</i>	
Obtaining Auditory M100 Responses: Success Rates in Children with Autism Spectrum Disorders	401
<i>Sarah Y. Khan, J. Christopher Edgar, Justin F. Monroe, Kate M. Cannon, Lisa Blaskey, Saba Qasmieh, Sue E. Levy, Timothy P.L. Roberts</i>	
Early ERF Responses to Final Words in a Sentence Context during Reading in Individuals with Autism Spectrum Disorders: An MEG Study	405
<i>Banu Ahtam, Sven Braeutigam, Anthony J. Bailey</i>	
MEG Abnormalities in Creutzfeldt-Jakob Disease, a Case Report	409
<i>Eero Pekkonen, Juha Wilenius, Jukka Lyytinen, Anders Paetau, Maarit Palomäki, Jyrki P. Mäkelä</i>	
MCG: Modeling and Clinical Applications	
Nondipolar Content of Cardiac Magnetic Field Maps in Patients after ST Elevation Myocardial Infarction	413
<i>Peter Van Leeuwen, Birgit Hailer, Gregor Eiling, Dietrich H.W. Grönemeyer</i>	
Magnetic Reconstruction of Circulating Excitation	417
<i>Taysia Sosnytska, Pavlo Sutkovyy, Volodymyr Sosnytsky, Ekaterina Koronovska</i>	
Comparison of Cardiac Activation Models Using 3D MCG Data	420
<i>Massimo De Melis, Yoshinori Uchikawa</i>	
Development of Pattern Recognition Method for Diagnosis of Myocardial Ischemia and Noncoronarogenic Myocardial Diseases Based on Current Density Distribution Maps	424
<i>I.A. Chaykovskyy, M.M. Budnyk, M.A. Najafian, S.S. Martynenko, A.S. Dovbysh, O.S. Kovalenko</i>	
Evaluation of Electrophysiological Alteration Created by Local Autonomic Dysfunction Using Magnetocardiography	428
<i>Taysia Sosnytska, Leonyd Stadnyuk, Volodymyr Sosnytsky</i>	
Magnetocardiography Study of Cardiac Anomalies	431
<i>K. Gireesan, S. Sengottuvel, C. Parasakthi, Rajesh Patel, M.P. Janawadkar, T.S. Radhakrishnan, K.S.R. Murthy, A. Vijaya</i>	
Magnetic Field Map Orientation in Patients after ST Elevation Myocardial Infarction	436
<i>Peter Van Leeuwen, Birgit Hailer, A. Beck, Waleid Sherifa, Gregor Eiling, Dietrich Grönemeyer</i>	

Biosusceptometry, Nanoparticles and Effects of Magnetic Fields

AC Biosusceptometry as a Tool for Monitoring the Gastrointestinal Transit of Multiparticulate Drug Delivery System	440
<i>G.F. Oliveira, P.C. Ferrari, L.A. Corá, U. Andreis, J.R.A. Miranda, R.C. Evangelista</i>	
A New Technique for Magnetic Nanoparticle Imaging Using Magnetoencephalography Frequency Data	443
<i>Teresa Cheung, Karen L. Kavanagh, Urs Ribary</i>	
Magnetic Detection of the Sentinel Lymph Node in Ex Vivo Tissue with Colorectal Cancer	447
<i>B. ten Haken, M. Visscher, J.J. Pouw, J.M. Klaase, Q.A. Pankhurst, J. Galindo-Millan, A.H. Velders, H. Rogalla</i>	
Effects of Magnetic Fields on Nervous Cells	450
<i>J.C. Hernandez-Pavon, T. Cordova, S. Solorio, G. Barbosa-Sabanero, M. Sabpanero-Lopez, M. Sosa</i>	
Author Index	455
