Preface	ix
Abbreviations	xi
1 Principles of medical malpractice	1
1.1 Introduction.....	1
1.2 Notes concerning the history of medical malpractice.....	1
1.3 Defining malpractice	4
1.4 Statistical surveys.....	6
1.5 Summary	11
2 Errors, incidents and complications in general surgery	15
2.1 Introduction.....	15
2.2 Medical errors in laparoscopic cholecystectomy.....	15
2.2.1 Historical remarks	15
2.2.2 Statistics for medical complications.....	16
2.2.3 Complications specific to laparoscopic cholecystectomy.....	17
2.2.4 Surgical procedure, and possible causes of errors.....	20
2.2.5 Medical malpractice litigation after laparoscopic cholecystectomy.....	21
2.2.6 Informed consent	25
2.2.7 Real-life examples	25
2.2.8 Summary.....	27
2.3 Risks and possible errors related to minimally invasive or laparoscopic surgery.....	27
2.3.1 Introduction	27
2.3.2 Fundamentals underlying the technical standard and potential errors	27
2.3.3 Real-life examples	31
2.3.4 Summary.....	33
2.4 Complications and possible errors in inguinal hernia treatment.....	33
2.4.1 Introduction	33
2.4.2 Fundamentals of inguinal hernia surgery	34
2.4.3 Informed consent	35
2.4.4 Intra- and postoperative errors and complications	35
2.4.5 Real-life examples	38
2.4.6 Summary.....	40
2.5 Complications and errors in the surgical treatment of benign thyroid disorders.....	41
2.5.1 Introduction	41
2.5.2 Fundamentals of the surgical treatment of struma	41
2.5.3 Informed consent	42

2.5.4	Remarks concerning the surgical technique.....	42
2.5.5	Technical errors and complications	44
2.5.6	Prospects for new minimally invasive techniques	44
2.5.7	Real-life examples	45
2.5.8	Summary	46
2.6	Complications and errors arising in the diagnostics and treatment of acute appendicitis	46
2.6.1	Introduction	46
2.6.2	Fundamentals	46
2.6.3	Remarks concerning the surgical technique.....	48
2.6.4	Errors and complications	49
2.6.5	Real-life examples	50
2.6.6	Summary	50
2.7	Anastomotic insufficiency in the gastrointestinal tract as a frequent source of malpractice claims.....	51
2.7.1	Introduction	51
2.7.2	Fundamental concepts	51
2.7.3	Anastomotic leaks in the upper gastrointestinal tract.....	53
2.7.4	Errors and management of complications	54
2.7.5	Real-life example	55
2.7.6	Anastomotic leakage in the lower gastrointestinal tract – errors and risks	56
2.7.7	Examples of liability issues	57
2.7.8	Summary	59
2.8	Diagnostic and therapeutical errors in the treatment of acute abdomen.....	59
2.8.1	Introduction	59
2.8.2	Fundamentals.....	59
2.8.3	Malpractice claims and complications related to peritonitis and abdominal sepsis	62
2.8.3.1	Peritonitis with abdominal sepsis	62
2.8.4	Real-life examples	64
2.8.5	Ileus	66
2.8.6	Malpractice claims related to surgical ileus treatment.....	68
2.8.7	Real-life examples	68
2.8.8	Mesenteric ischemia.....	70
2.8.8.1	Diagnostic and therapeutic errors related to mesenteric ischemia	70
2.8.9	Real-life example	71
2.8.10	Summary	72
3	Retained surgical foreign bodies	93
3.1	Introduction.....	93
3.2	The issue of retained surgical foreign bodies	93
3.3	Risk management related to the prevention of RSFBs	95
3.4	Real-life examples	96
3.5	Summary	97

4	Quality management related to wrong-site surgery	101
4.1	Introduction.....	101
4.2	Statistical surveys.....	101
4.3	Root cause analysis	103
4.4	Risk management related to the prevention of WSPEs.....	105
4.5	Summary	108
5	Towards a preventive safety culture within the hospital.....	111
5.1	Introduction.....	111
5.2	Safety culture.....	111
5.3	Error management as part of quality management in the hospital.....	112
5.4	Error classification	114
5.5	The JCAHO patient safety event taxonomy.....	115
5.6	Reporting systems as tools to aid safety culture and risk management	116
5.6.1	CIRS as an aspect of risk management.....	123
5.7	Summary	125
6	Ethical aspects of an open safety culture: towards a new physician-patient relationship in 21st century medicine	129
