

Contents

1	Introduction	1
1.1	Chaos and Lasers	1
1.2	Historical Perspectives of Chaos in Semiconductor Lasers	3
1.3	Outline of This Book	7
	References	9
2	Chaos in Laser Systems	13
2.1	Laser Model and Bloch Equations	13
2.1.1	Laser Model in a Ring Resonator	13
2.1.2	Light Emission and Absorption in Two-Level Atoms	15
2.1.3	Maxwell–Bloch Equations	16
2.2	Lorenz–Haken Equations and Laser Thresholds	17
2.2.1	Lorenz–Haken Equations	17
2.2.2	First Laser Threshold	19
2.2.3	Second Laser Threshold	21
2.3	Classifications of Lasers	23
2.3.1	Classes of Lasers	23
2.3.2	Class C Lasers	23
2.3.3	Class B Lasers	26
2.3.4	Class A Lasers	27
	References	27
3	Semiconductor Lasers and Theory	29
3.1	Semiconductor Lasers	29
3.2	Oscillation Conditions of Semiconductor Lasers	31
3.2.1	Laser Oscillation Conditions	31
3.2.2	Laser Oscillation Frequency	32
3.2.3	Dependence of Oscillation Frequency on Carrier Density	33

3.3	Derivation of Rate Equations	34
3.3.1	Gain at Laser Oscillation	34
3.3.2	Rate Equation for the Field	35
3.3.3	Linewidth Enhancement Factor	36
3.3.4	Laser Rate Equations	38
3.4	Linear Stability Analysis and Relaxation Oscillation	42
3.4.1	Linear Stability Analysis	42
3.4.2	Relaxation Oscillation	44
3.5	Langevin Noises	46
3.5.1	Rate Equations Including Langevin Noises	46
3.5.2	Langevin Noises	47
3.5.3	Implementation of Noise Terms for Numerical Calculations	49
3.5.4	Noise Spectrum	51
3.5.5	Relative Intensity Noise	52
3.5.6	Phase Noise and Spectral Linewidth	53
3.6	Modulation Characteristics	56
3.6.1	Injection Current Modulation	56
3.6.2	Intensity Modulation Characteristics	57
3.6.3	Phase Modulation Characteristics	59
3.7	Waveguide Models of Semiconductor Lasers	60
3.7.1	Index- and Gain-Guided Structures	60
3.7.2	Waveguide Models	62
3.7.3	Spatial Modes of Gain- and Index-Guided Lasers	63
3.7.4	Effects of Spontaneous Emission in Gain- and Index-Guided Lasers	65
3.7.5	Laser Types	67
	References	71
4	Theory of Optical Feedback in Semiconductor Lasers	75
4.1	Theory of Optical Feedback	75
4.1.1	Optical Feedback Effects and Classifications of Optical Feedback Phenomena	75
4.1.2	Theoretical Model	78
4.2	Linear Stability Analysis for Optical Feedback Systems	80
4.2.1	Linear Stability Analysis	80
4.2.2	Linear Mode, and Stability and Instability in Semiconductor Lasers	85
4.2.3	Gain Reduction Due to Optical Feedback	87
4.2.4	Linewidth in the Presence of Optical Feedback	88
4.3	Feedback from a Grating Mirror	89
4.4	Phase-Conjugate Feedback	91
4.5	Incoherent Feedback	94
4.6	Polarization-Rotated Optical Feedback	95

4.7	Filtered Feedback	97
	References	98
5	Dynamics of Semiconductor Lasers with Optical Feedback	103
5.1	Optical Feedback from a Conventional Reflector	103
5.1.1	Optical Feedback Effects	103
5.1.2	Potential Model in Feedback-Induced Instability.	104
5.1.3	Optical Spectrum in Stable and Unstable Feedback Regimes	107
5.1.4	Chaos in Semiconductor Lasers with Optical Feedback.	108
5.1.5	Chaotic Bifurcations	111
5.1.6	Dynamics for Injection Current Variations.	113
5.2	Dependence of Chaotic Dynamics on the External Mirror Position.	117
5.2.1	Periodic Stability Enhancement for Variations of the External Cavity Length	117
5.2.2	Origin of Periodic Stability Enhancement	120
5.2.3	Effects of Linewidth Enhancement Factor	122
5.2.4	Sensitivity of the Optical Phase	125
5.2.5	Chaotic Dynamics for a Small Change of the External Cavity Length	126
5.3	Low-Frequency Fluctuations	129
5.3.1	Low-Frequency Fluctuation Phenomena	129
5.3.2	Low-Frequency Fluctuation Characteristics	131
5.3.3	Origin of Low-Frequency Fluctuations	133
5.4	Chaotic Dynamics in Short External Cavity Limit	136
5.4.1	Stable and Unstable Conditions in Short External Cavity	136
5.4.2	Regular Pulse Package Oscillations in Short External Cavity	138
5.4.3	Bifurcations of Regular Pulse Package	141
5.5	Dynamics in Semiconductor Lasers with Grating Mirror Feedback	142
5.6	Dynamics in Semiconductor Lasers with Phase-Conjugate Mirror Feedback	145
5.6.1	Linear Stability Analysis	145
5.6.2	Dynamics Induced by Phase-Conjugate Feedback.	146
5.6.3	Dynamics in the Presence of Frequency Detuning.	148
5.6.4	Finite and Slow Response Phase-Conjugate Feedback.	149
5.7	Dynamics of Incoherent Optical Feedback	151

5.8	Dynamics of Polarization-Rotated Optical Feedback	153
5.8.1	TE–TM Mode Dynamics in Polarization-Rotated Optical Feedback	153
5.8.2	Square-Wave Generation in Polarization-Rotated Optical Feedback	157
5.9	Dynamics of Filtered Optical Feedback	159
5.9.1	Filtered Optical Feedback	159
5.9.2	External Cavity Modes	160
5.9.3	Frequency Oscillations and Chaotic Dynamics	161
	References	165
6	Dynamics in Semiconductor Lasers with Optical Injection	169
6.1	Optical Injection	169
6.1.1	Optical Injection Locking	169
6.1.2	Injection Locking Condition	172
6.2	Stability and Instability in Optical Injection Systems	175
6.2.1	Rate Equations	175
6.2.2	Chaotic Bifurcations by Optical Injection	177
6.2.3	Chaos Map in the Phase Space of Frequency Detuning and Injection	180
6.2.4	Coexistence of Chaotic Attractors in Optically Injected Semiconductor Lasers	184
6.3	Enhancement of Modulation Bandwidth and Generation of High Frequency Chaotic Oscillation by Strong Optical Injection	187
6.3.1	Enhancement of Modulation Bandwidth by Strong Optical Injection	187
6.3.2	Origin of Modulation Bandwidth Enhancement	192
6.3.3	Modulation Response by Strong Optical Injection	196
6.3.4	Suppression of Frequency Chirping by Strong Optical Injection	197
6.3.5	Generation of High-Frequency Chaotic Oscillation by Strong Optical Injection	199
	References	202
7	Dynamics of Semiconductor Lasers with Optoelectronic Feedback and Modulation	205
7.1	Theory of Optoelectronic Feedback	205
7.1.1	Optoelectronic Feedback Systems	205
7.1.2	Pulsation Oscillations in Optoelectronic Feedback Systems	207
7.2	Linear Stability Analysis for Optoelectronic Feedback Systems	209
7.2.1	Linear Stability Analysis	209

7.2.2	Characteristics of Semiconductor Lasers with Optoelectronic Feedback	213
7.3	Dynamics and Chaos in Semiconductor Lasers with Optoelectronic Feedback	215
7.3.1	Chaotic Dynamics in Negative Optoelectronic Feedback	215
7.3.2	Chaotic Dynamics in Positive Optoelectronic Feedback	217
7.4	Optoelectronic Feedback with Wavelength Filter	220
7.4.1	System of Optoelectronic Feedback with Wavelength Filter	220
7.4.2	Dynamics of Optoelectronic Feedback with Wavelength Filter	223
7.5	Chaotic Dynamics of Semiconductor Lasers Induced by Injection Current Modulation	226
7.5.1	Instabilities of a Modulated Semiconductor Laser	226
7.5.2	Linear Stability Analysis	228
7.5.3	Chaotic Dynamics in Modulated Semiconductor Lasers	229
7.6	Nonlinear Dynamics of Various Combinations of External Perturbations	231
7.6.1	Optically Injected Semiconductor Laser Subject to Optoelectronic Feedback	231
7.6.2	Semiconductor Lasers with Optical Feedback and Modulation	234
	References	236
8	Instability and Chaos in Various Laser Structures	239
8.1	Multimode Lasers	240
8.1.1	Multimode Operation of Semiconductor Lasers	240
8.1.2	Theoretical Model of Multimode Lasers	241
8.1.3	Dynamics of Multimode Semiconductor Lasers with Optical Feedback	245
8.2	Self-Pulsating Lasers	246
8.2.1	Theory of Self-Pulsating Lasers	246
8.2.2	Instabilities at Solitary Oscillations	250
8.2.3	Instability and Chaos by Optical Feedback	253
8.2.4	Instability and Chaos by Injection Current Modulation	256
8.3	Vertical-Cavity Surface-Emitting Lasers	259
8.3.1	Vertical-Cavity Surface-Emitting Lasers	259
8.3.2	Spatial-Mode Expansion Model	260
8.3.3	Spin-Flip Model	262
8.3.4	Two-Gain Model	267

8.3.5	Characteristics of VCSELs in Solitary Oscillations	269
8.3.6	Spatio-Temporal Dynamics in VCSELs	271
8.3.7	Optical Feedback Effects in VCSELs	275
8.3.8	Short Optical Feedback in VCSELs	279
8.3.9	Optical Injection Dynamics in VCSEL	281
8.4	Broad-Area Semiconductor Lasers	285
8.4.1	Theoretical Model of Broad-Area Semiconductor Lasers	285
8.4.2	Dynamics of Broad-Area Semiconductor Lasers at Solitary Oscillations	289
8.4.3	Optical Feedback Effects in Broad-Area Semiconductor Lasers	296
8.4.4	Effects of Optical Injection in Broad-Area Semiconductor Lasers	300
8.5	Laser Arrays	301
8.6	Quantum-Dot Semiconductor Lasers	303
8.6.1	Quantum-Dot Semiconductor Lasers	303
8.6.2	Quantum-Dot Semiconductor Lasers in Solitary Oscillations	308
8.6.3	Optical Feedback Effects in Quantum-Dot Semiconductor Lasers	310
8.6.4	Optical Injection Effects in Quantum-Dot Semiconductor Lasers	312
8.7	Quantum-Cascade Semiconductor Lasers	314
8.7.1	Quantum-Cascade Semiconductor Lasers	314
8.7.2	Linewidth Enhancement Factor of Quantum-Cascade Semiconductor Lasers	316
8.7.3	Rate Equations of Quantum Cascade Semiconductor Lasers	317
8.7.4	Nonlinear Interactions in Quantum-Cascade Semiconductor Lasers	318
8.7.5	Effects of Optical Feedback in Quantum-Cascade Semiconductor Lasers	322
	References	322
