

# Table of Contents

|                                                                                                             |     |
|-------------------------------------------------------------------------------------------------------------|-----|
| Data Mining for Diagnostic Debugging in Sensor Networks: Preliminary Evidence and Lessons Learned .....     | 1   |
| <i>Tarek Abdelzaher, Mohammad Khan, Hieu Le, Hossein Ahmadi, and Jiawei Han</i>                             |     |
| Monitoring Incremental Histogram Distribution for Change Detection in Data Streams .....                    | 25  |
| <i>Raquel Sebastião, João Gama, Pedro Pereira Rodrigues, and João Bernardes</i>                             |     |
| Situation-Aware Adaptive Visualization for Sensory Data Stream Mining .....                                 | 43  |
| <i>Pari Delir Haghighi, Brett Gillick, Shonali Krishnaswamy, Mohamed Medhat Gaber, and Arkady Zaslavsky</i> |     |
| Unsupervised Plan Detection with Factor Graphs .....                                                        | 59  |
| <i>George B. Davis, Jamie Olson, and Kathleen M. Carley</i>                                                 |     |
| WiFi Miner: An Online Apriori-Infrequent Based Wireless Intrusion System .....                              | 76  |
| <i>Ahmedur Rahman, C.I. Ezeife, and A.K. Aggarwal</i>                                                       |     |
| Probabilistic Analysis of a Large-Scale Urban Traffic Sensor Data Set .....                                 | 94  |
| <i>Jon Hutchins, Alexander Ihler, and Padhraic Smyth</i>                                                    |     |
| Spatio-temporal Outlier Detection in Precipitation Data .....                                               | 115 |
| <i>Elizabeth Wu, Wei Liu, and Sanjay Chawla</i>                                                             |     |
| Large-Scale Inference of Network-Service Disruption upon Natural Disasters .....                            | 134 |
| <i>Supaporn Erjongmanee, Chuanyi Ji, Jere Stokely, and Neale Hightower</i>                                  |     |
| An Adaptive Sensor Mining Framework for Pervasive Computing Applications .....                              | 154 |
| <i>Parisa Rashidi and Diane J. Cook</i>                                                                     |     |
| A Simple Dense Pixel Visualization for Mobile Sensor Data Mining .....                                      | 175 |
| <i>Pedro Pereira Rodrigues and João Gama</i>                                                                |     |

|                                                                                  |     |
|----------------------------------------------------------------------------------|-----|
| Incremental Anomaly Detection Approach for Characterizing Unusual Profiles ..... | 190 |
| <i>Yi Fang, Olufemi A. Omitaomu, and Auroop R. Ganguly</i>                       |     |
| Spatiotemporal Neighborhood Discovery for Sensor Data .....                      | 203 |
| <i>Michael P. McGuire, Vandana P. Janeja, and Aryya Gangopadhyay</i>             |     |
| <b>Author Index</b> .....                                                        | 227 |
