

1 Mathematics (M)**9**

1.1 Units of measurement	
SI base quantities and base units	10
Derived quantities and their units	11
Non-SI units	12
1.2 Formulas	
Formula symbols, mathematical symbols ..	13
Formulas, equations, graphs	14
Transformation of formulas	15
Quantities and units	16
Calculation with quantities	17
Percentage and interest calculation	17
1.3 Angels and triangel	
Types of angels, sum of angels in a triangle	18
Theorem of intersecting lines, Pythagorean theorem	18
Functions of right triangles	19
Functions of oblique triangles	19

1.4 Lengths	
Division of lengths	20
Spring wire lengths	21
Rough lengths	21
1.5 Areas	
Angular areas	22
Triangle, polygon, circle	23
Circular sector, circular segment	24
Ellipse	24
1.6 Volume and surface area	
Cube, cylinder, pyramid	25
Truncated pyramid, cone, Truncated cone, sphere	26
Volumes of composite solids	27
1.7 Mass	
General calculations	27
Linear mass density	27
Area mass density	27
1.8 Centroids	
Centroids of lines	28
Centroids of plane areas	28

2 Physics (P)**29**

2.1 Motion	
Uniform and accelerated motion	30
Speeds on machines	31
2.2 Forces	
Representation, addition and resolution of forces	32
Types of forces	33
Torque and levers, torque in gear drives ..	34
2.3 Work, power, efficiency	
Mechanical work	34
Simple machines and energy	35
Potential and kinetic energy	35
Power and efficiency	36
2.4 Friction	
Friction force	37
Coefficients of friction	37
Coefficients of rolling friction	37
2.5 Pressure in liquids and gases	
Pressure, definition and types	38
Buoyancy	38
Hydraulic power transmission	38
Pressure intensification, flow velocity	39
Changes of state in gases	39

2.6 Strength of materials	
Load cases, types of loading	40
Material properties, stress limits	40
Strength calculation, safety factors	41
Allowable stresses, modulus of elasticity	41
Tensile and compressive stress, surface pressure	42
Shear, bending and torsional stress	43
Moments of area, section moduli	44
2.7 Thermodynamics	
Temperature, linear expansion, shrinkage	45
Quantity of heat	45
Heat flux, heat of combustion	46
Net calorific values	46
2.8 Electricity	
Quantities and units	47
Ohm's law, electrical resistance	47
Current density, resistor circuit	48
Types of current	49
Electrical work and power	50

3 Technical Drawing (TD)**51**

3.1 Graphs	
Cartesian coordinate system	52
Graph types	53
3.2 Basic geometric constructions	
Lines and angles	54
Tangents, circular arcs	55
Inscribed circles, ellipses	56
Cycloids, involute curves, parabolas	57
3.3 Elements of drawing	
Fonts	58
Preferred numbers, radii, scales	59
Drawing layout, bills of materials	60
Line types	62
3.4 Representation	
Projection methods	64
Views	66
Sectional views	68
Hatching	70
3.5 Dimensioning drawings	
Dimensioning lines, dimension values	71
Dimensioning rules	72
Elements of drawing	73
Tolerance specifications	75
Types of dimensioning	76
Simplified presentation in drawings	78

3.6 Machine elements, representation	
Gear types	79
Roller bearings	80
Seals	81
Retaining rings, springs	82
3.7 Object elements	
Bosses, object edges	83
Thread runouts, thread undercuts	84
Threads, screw joints	85
Center holes, knurls, undercuts	86
3.8 Welding and soldering	
Graphical symbols	88
Dimensioning examples	91
3.9 Surfaces	
Hardness specifications in drawings	92
Form deviations, roughness	93
Surface testing, surface indications	94
3.10 ISO tolerances and fits	
Fundamentals	98
Basic hole system, basic shaft system	102
General tolerances	106
Roller bearing fits	106
Fit recommendations	107
Geometric tolerancing	108

4 Materials Science (MS)**111**

4.1 Materials	
Material characteristics of solids	112
Material characteristics of liquids and gases	113
Periodic table of the elements	114
4.2 Steels, designation system	
Definition and classification of steel	116
Standardization of steel products	117
Designation system for steels	118
4.3 Steels, steel types	
Overview of steel products	123
Unalloyed steels	126
Case hardened steels, quenched & tempered steels	129
Nitriding steels, free cutting steels	131
Tool steels, stainless steels	132
Steels for bright steel products	137
4.4 Steels, finished products	
Sheet and strip metal, tubes	138
Profiles	142
Linear mass density and area mass density	151

4.5 Heat treatment	
Iron-carbon phase diagram	152
Heat treatment of steels	153
Hardening of aluminium alloys	156
4.6 Cast iron materials	
Designation and material codes	157
Classification	158
Cast iron	159
Malleable cast iron, cast steel	160
4.7 Foundry technology	161
4.8 Light alloys	
Overview of aluminum alloys	163
Wrought aluminum alloys	165
Aluminum profiles	168
Magnesium and titanium alloys	171
4.9 Heavy non-ferrous metals	
Overview and designation system	172
Copper and refined zinc alloys	174
4.10 Other metallic materials	176
4.11 Plastics	
Overview and designation	178
Thermoset plastics	181
Thermoplastics, elastomers	182
Plastics processing, testing of plastics	186

4.12 Material testing	
Overview, tensile test	189
Rotary bending test	192
Hardness test	193

4.13 Corrosion, hazardous materials	
Corrosion	196
Hazardous materials	197

5 Machine Elements (ME)

201

5.1 Threads	
Types of threads, overview	202
Metric ISO threads	202
Other types of threads	205
Thread tolerances	207
5.2 Bolts and screws	
Overview, designations, property classes	208
Hexagon head bolts & screws	211
Other bolts & screws	214
Screw joint calculations	220
Locking fasteners, bolt and screw drive systems	221
5.3 Countersinks	
Countersinks for countersunk head screws	223
Counterbores for cap screws	224
5.4 Nuts	
Overview	225
Designations, property classes	226
Hexagon nuts	228
Other nuts	230
5.5 Washers	
Overview, flat washers	232
Washers for HV bolts	234

5.6 Pins and clevis pins	
Overview	235
Grooved pins, grooved drive studs, clevis pins	237
5.7 Shaft-hub connections	
Keys, gib-head keys	238
Feather keys, splined shaft joints	239
Metric tapers, morse tapers, steep tapers	240
Tool holding fixtures	241
5.8 Other machine elements	
Tension, compression and disc springs	242
Grub screws, thrust pads, knobs	245
T-slots and accessories	247
Quick-release drilling fixture	248
5.9 Drive elements	
Belts	250
Gears	253
Transmission ratios	256
5.10 Bearings	
Plain bearings, overview	257
Plain bearing bushings	258
Antifriction bearings, overview	259
Ball bearings	261
Roller bearings	262
Sealing elements	266
Lubricating oils	267
Lubricating greases	268

6 Production Engineering (PE)

269

6.1 Quality management	
Standards, terminology	270
Quality planning, quality testing	272
Statistical analysis	273
Statistical process control	275
Quality management of processes	276
6.2 EC Machinery Directive	
EC Machinery Directive	278
CE marking	279
6.3 Production organization	
Overview; product breakdown structure	280
Work planning	282
Cost accounting	286

6.4 Maintenance, repair & overhaul (MRO)	
Maintenance, inspection, repair, improvement	289
MRO concepts	290
Documentation system	292
6.5 Machining processes	
Overview; forces and power	293
Drilling	298
Turning	301
Milling	305
Indexable inserts	308
Cooling lubrication	311
Cutting tool materials	315
Grinding, honing	317
6.6 Removal operations	
Electric discharge machining	323
Process parameters in EDM erosion	324

6.7 Separation by cutting		6.10 Joining	
Cutting force	325	Welding processes	343
Cutting tool	326	Weld preparation	345
6.8 Forming		Gas-shielded welding	346
Bending	330	Arc welding	348
Deep drawing	334	Beam cutting	350
6.9 Injection molding		Gas cylinders, identification	352
Injection molding tools	338	Brazing, bonded joints	354
Shrinkage, cooling, batching	341	6.11 Workplace and environmental protection	
		Safety colors	359
		Warning signs, safety signs	360
		Sound and noise	366

7 Automation and Information Technology (A) 367

7.1 Control engineering, basic terminology		7.5 Hydraulics, pneumatics	
Basic terminology, code letters, symbols	368	Circuit symbols	393
Analog controllers	370	Proportional valves	395
Discontinuous and digital controllers	371	Circuit diagrams	396
Binary logic	372	Pneumatic control	397
Numbering systems	373	Electro-pneumatic control	398
Information processing	374	Electro-hydraulic control	399
7.2 Electrical circuits		Hydraulic fluids	400
Circuit symbols	375	Pneumatic cylinders	401
Designations in circuit plans	377	Hydraulic pumps	402
Circuit diagrams	378	Tubes	403
Sensors	379	7.6 Handling and robot systems	
Safety precautions	380	Coordinate systems and axes	404
7.3 GRAFCET		Robot designs	405
Important basic terms	382	Grippers, job safety	406
Steps, transitions	383	7.7 CNC technology	
Actions	384	Coordinate axes	407
Branchings	386	Program structure	408
7.4 Programmable logical controllers PLC		Tool offset and cutter compensation	409
PLC programming languages, overview	388	Program structure according to DIN	410
Ladder diagram (LD)	389	Program structure according to PAL	412
Instruction list (IL)	390	PAL functions for lathes	413
PLC programming languages,		PAL cycles for lathes	414
comparison	391	PAL functions for milling machines	417
Programming example	392	PAL cycles for milling machines	418

8 Material Chart, Standards (S) 425–434

8.1 International material comparison chart	425	8.2 Index of cited standards and other regulations	430
--	-----	---	-----

Subject Index 435–444
