

Contents

1	Generation and Deployment of Transgenic Crop Plants: An Overview	1
	Michael R. Davey, Jaya R. Soneji, M. Nageswara Rao, Sofia Kourmpetli, Anjanabha Bhattacharya, and Chittaranjan Kole	
2	Explants Used for the Generation of Transgenic Plants	31
	A. Piqueras, N. Alburquerque, and K.M. Folta	
3	Gene Transfer Methods	57
	Seedhabadee Ganeshan and Ravindra N. Chibbar	
4	Selection and Screening Strategies	85
	Haiying Liang, P. Ananda Kumar, Vikrant Nain, William A. Powell, and John E. Carlson	
5	Levels and Stability of Expression of Transgenes	145
	Rajib Bandopadhyay, Inamul Haque, Dharmendra Singh, and Kunal Mukhopadhyay	
6	Silencing as a Tool for Transgenic Crop Improvement	187
	Pudota B. Bhaskar and Jiming Jiang	
7	Transgene Integration, Expression and Stability in Plants: Strategies for Improvements	201
	Ajay Kohli, Berta Miro, and Richard M. Twyman	
8	Organelle Transformations	239
	Anjanabha Bhattacharya	
9	Biosynthesis and Biotransformation	251
	Hajiem Mizukami and Hiroaki Hayashi	

10 Metabolic Engineering of Pathways and Gene Discovery	275
Miloslav Juricek, Chandrakanth Emani, Sunee Kertbundit, and Timothy C. Hall	
Index	307
