Part I Keynote Addresses

On the State of the Art of Info-metrics	3
<i>Amos Golan</i>	
1 Background, Objective and Motivation	3
2 Information	5
2.1 Information - A Qualitative Discussion	5
2.2 Information - A Quantitative Discussion	6
3 The Basic Information Theoretic Model	8
3.1 The Classical Maximum Entropy Framework	8
3.2 The Generic IT Framework	10
4 The Generalized Information Theoretic Model	11
5 Open Questions	13
References	14
A Test for Strict Stationarity	17
<i>Luiz Renato Lima, Breno Neri</i>	
1 Introduction	17
2 A Test for Strict Stationarity	21
3 Monte Carlo Experiment	22
3.1 Size	23
3.2 Power against Alternatives with Unit Root	24
3.3 Power against Alternatives with Unconditional Heteroskedasticity	25
3.4 Power against Alternative with Time-Varying Kurtosis	26
4 An Empirical Illustration	27
5 Conclusion	29
References	29

Part II Fundamental Theory

Statistical Inference from Ill-known Data Using Belief Functions	33
<i>Thierry Denœux</i>	
1 Introduction	33
2 Belief Functions	34
2.1 Belief Functions on Finite Domains	35
2.2 Dempster’s Rule	36
2.3 Random Real Intervals	37
3 Modeling Statistical Evidence	38
3.1 Least Committed Solution Based on Likelihoods	39
3.2 Discussion	39
3.3 Illustrative Example	41
4 Inference from Uncertain Data	42
4.1 Representation of Uncertain Statistical Evidence	43
4.2 Independence Assumptions	44
5 Conclusion	46
References	46
 Brief Introduction to Probabilistic Compositional Models	 49
<i>Radim Jiroušek</i>	
1 Introduction	49
2 Notation and Basic Concepts	50
3 Compositional Models	52
3.1 Perfect Sequences	52
3.2 Decomposable Sequences	53
4 Conditioning	54
5 Local Computations	55
6 Heuristics for Model Construction	56
7 Conclusions	59
References	60
 Some Aspects of Information Theory in Gambling and Economics	 61
<i>Hai Q. Dinh</i>	
1 Information Theory	61
1.1 Coding Theory	62
1.2 Information Theory without Optimum Coding	65
2 Information Theory and Gambling	66
2.1 Kelly Gambling Strategy	66
2.2 Directed Information and Causal Conditioning	68
2.3 Gambling with Causal Side Information	69
3 Information Theory and Economics	70
3.1 Portfolio Theory	71
3.2 Stock Market	71
3.3 Constant Rebalanced Portfolios	71
3.4 Side Information	72

3.5	State-Constant Rebalanced Portfolios	72
3.6	Universal Portfolios	73
3.7	Universal Portfolios with Side Information	75
	References	76

Why Clayton and Gumbel Copulas: A Symmetry-Based Explanation . . . 79

Vladik Kreinovich, Hung T. Nguyen, Songsak Sriboonchitta

1	Formulation of the Problem	79
2	Why Symmetries	80
3	Invariant Functions Corresponding to Basic Symmetries	82
4	Why Scalings and Shifts Can Be Applied to Probabilities	83
5	Archimedean Copulas with Whose Generators Are Either Invariant or Compositions of Two Invariant Functions	85
6	Proofs	86
	References	90

Size Distortion in the Analysis of Volatility and Covolatility Effects 91

Christian Gourieroux, Joann Jasiak

1	Introduction	91
2	Invertibility Tests	94
2.1	The Unconstrained Model	94
2.2	Wald Test Statistic	94
2.3	The Degenerate Case	95
2.4	Critical Values	96
2.5	Symmetric Matrix A of Dimension $(2,2)$	98
3	Constrained Estimation of A	99
3.1	The Example of BEKK Model	99
3.2	The Constrained Estimator	101
3.3	Asymptotic Distribution of the Constrained Estimator	102
4	Positivity Test	106
4.1	A Unconstrained	106
4.2	A of Reduced Rank	107
5	Finite Sample Properties	109
6	Concluding Remarks	112
	Appendix	113
	References	117

Maximum Entropy Test for Autoregressive Models 119

Sangyeol Lee, Siyun Park

1	Introduction	119
2	Maximum Entropy Test	120
3	Autoregressive Models	121
4	Simulation Results	124
5	Real Data Analysis	125

6	Concluding Remarks	125
	Appendix	126
	References	127
Choice of Copulas in Explaining Stock Market Contagion		129
<i>Kian-Guan Lim</i>		
1	Introduction	129
2	Maximum Likelihood Estimation	132
3	Loss Tail Model	135
4	Estimation Results on the Copulas	137
5	Conclusions	139
	References	140
A Bayesian Perspective on Mixed GARCH Models with Jumps		141
<i>Cathy W.S. Chen, Edward M.H. Lin, Yi-Ru Lin</i>		
1	Introduction	141
2	The Mixed GARCH-Jump Model	143
3	Bayesian Inference	144
4	Model Selection	146
5	Simulation Study	147
6	Empirical Study	149
7	Conclusion and Future Research	152
	References	153
Risk Measures and Asset Pricing Models with New Versions of Wang Transform		155
<i>Baokun Li, Tonghui Wang, Weizhong Tian</i>		
1	Introduction	155
2	Two Types of Distortion Risk Measures	156
	2.1 Coherent Distortion Risk Measures	156
	2.2 Tail-Preserving Distortion Risk Measures	157
3	Two Forms of Skew-Normal Distributions	158
4	New Versions of Wang Transform	159
5	Risk Measures with New Versions of Wang Distortion Functions	160
6	Skew Normal Distortion Function for CAPM	163
	References	166
Part III Applications		
Purchasing Power Parity Puzzle and the Australian Dollar Real Exchange Rate		171
<i>Khorshed Chowdhury</i>		
1	Introduction	171
2	Past Studies of Unit-Root of RER of Australia	173
3	Time-Series Properties of RER in the Presence of Structural Breaks	175

3.1	Data and Data Source	175
3.2	Lee and Strazicich (2003) (LS) Unit-Root Test	177
3.3	Endogenously Determined Structural Break Dates	177
4	Summary and Conclusion	178
	Appendix	178
	References	182
 An Empirical Analysis of Price Behavior of Natural Rubber Latex: A Case of Central Rubber Market Hat Yai, Songkhla, Thailand		185
<i>Hari Sharma Neupane, Peter Calkins</i>		
1	Historical Background of Rubber Production and Marketing	186
2	Problems of Price Volatility and Market Concentration	187
3	Natural Rubber Production and Export in Thailand	188
4	The Study Site and Purpose of Study	188
5	Data Sources and Methods	192
5.1	Source and Nature of the Data	192
5.2	Theoretical Setup and Models	193
6	Empirical Results	196
7	Conclusion	198
	References	199
 Trade Liberalisation, Labour Productivity Growth and Skilled Labour Complement: Evidence from the Thai Manufacturing Sector ...		203
<i>Piyapong Sangkaew, Kankeu Jayanthakumaran</i>		
1	Introduction	203
2	Trade Liberalization and Labour Productivity	204
3	Method and Data	206
4	Empirical Results	208
5	Conclusion	210
	Appendix	211
	References	212
 Modeling Dependence Dynamics of Air Pollution: Time Series Analysis Using a Copula Based GARCH Type Model		215
<i>He Zhanqiong, Songsak Sriboonchitta, Dai Jing</i>		
1	Introduction	215
2	Model	217
2.1	DCC-GARCH Model	217
2.2	Copula Concept	218
2.3	The Models for the Marginal Distributions	218
2.4	Copula Models	219
3	Data Description	220
4	Results	220
5	Conclusions	225
	References	225

Estimating Time-Varying Systematic Risk by Using Multivariate GARCH	227
<i>Muttalath Kridsadarat</i>	
1 Introduction	227
2 Methodology and Data	229
3 Results	231
4 Conclusion	237
References	238
 Forecasting Using Nonlinear Long Memory Models with Artificial Neural Network Expansion	241
<i>Chaleampong Kongcharoen</i>	
1 Introduction	241
2 Model and Method	242
2.1 Nonlinear-Long Memory Models	242
2.2 Time Domain MLE	244
2.3 Semiparametric Estimations	245
3 Simulation Study	245
3.1 Monte Carlo Setup	245
3.2 Long Memory Parameter Estimations	247
3.3 Forecasting	248
4 Empirical Application	249
5 Conclusion	249
Appendix	250
References	252
 Modeling Dependency of Crude oil Price and Agricultural Commodity Prices: A Pairwise Copulas Approach	255
<i>Phattanan Boonyanuphong, Songsak Sriboonchitta, Chukiat Chaiboonsri</i>	
1 Introduction	255
2 Econometrics Models	258
2.1 Copula Models	258
2.2 Marginal Models	259
2.3 Estimation Method	259
3 Data	260
4 Empirical Results	261
4.1 Results for the Marginal Models	261
4.2 Results for Copula Models	262
5 Discussion	264
6 Conclusion	265
References	266

Charitable Giving Behavior in Northeast Thailand and Mukdaharn Province: Multivariate Tobit Models	269
<i>Jintanee Jintranun, Peter Calkins, Songsak Sriboonchitta</i>	
1 The Real-World Problem	270
2 The Goals of the Study	270
3 Review of Literature	270
4 Multivariate Tobit Model	271
5 The Hypotheses of the Study	271
6 Methods of Modeling and Estimation	272
7 Empirical Results	273
8 Hypothesis Testing	274
9 Conclusions and Policy Implications	276
Appendix	277
References	281

Analysis of Volatility and Dependence between the Tourist Arrivals from China to Thailand and Singapore: A Copula-Based GARCH Approach	283
<i>Jianxu Liu, Songsak Sriboonchitta</i>	
1 Introduction	283
2 Econometrics Model	285
2.1 Skewed Student- <i>t</i> Distribution	285
2.2 ARMA-GARCH Model	285
2.3 Copulas	286
3 Data and Empirical Results	288
3.1 The Data	288
3.2 Results for ARMA-GARCH Model	289
3.3 Results for KS and Box-Ljung Test	290
3.4 Results for Static Copulas and Goodness of Fit Test	290
3.5 Results for Time-Varying Copulas	292
4 Policy Implication	293
5 Conclusions	293
References	294

A Quantile Regression Analysis of Price Transmission in Thai Rice Markets	295
<i>Aree Wiboonpongse, Yaovarate Chaovanapoonphol, George E. Battese</i>	
1 Introduction	295
2 Rice Sector in Thailand	297
3 Literature Review	298
4 Data and Methodology	299
5 Empirical Results	300
6 Conclusions	302
References	304

**Analyzing Dependence Structure of Obesity and High Blood Pressure:
A Copula Approach** 307

Jing Dai, Cheng Zi, Songsak Sriboonchitta, Zhanqiong He

1 Introduction 308

2 Methods 309

2.1 Archmedean Copulas and Their Properties 309

2.2 Model Formulation 311

3 Data 313

4 Estimation Results 314

5 Concluding Remarks 317

References 317
