

Contents

1	Screening of Pig Glycosyltransferase Genes Related to Xenoantigens and Their Masking.....	1
	<i>Kwon-Ho Song, Cheorl-Ho Kim</i>	
1	Introduction.....	1
2	Materials and Methods.....	3
2.1	Local BLAST.....	3
2.2	Cell Culture.....	3
2.3	Isolation of Pig Sialyltransferases and iGb3S Gene.....	3
2.4	Reverse Transcription Polymerase Chain Reaction (RT-PCR)...	4
3	Results.....	4
3.1	Screening and Cloning of Pig Sialyltransferase Genes.....	4
3.2	Isolation of the Partial Pig iGb3S Gene.....	8
3.3	Expression of Pig Glycosyltransferase Genes in Pig Tissues.....	9
4	Discussion.....	10
2	Cloning and Tissue Specific Expression of <i>pcmah</i> and Its Alternative Transcripts.....	11
	<i>Kwon-Ho Song, Cheorl-Ho Kim</i>	
1	Introduction.....	11
2	Materials and Methods.....	12
2.1	Rapid Amplification of cDNA Ends (RACE).....	12
2.2	Reverse Transcription Polymerase Chain Reaction (RT-PCR).....	13
3	Results.....	14
3.1	Isolation of <i>pcmah</i> and Its Alternative Transcript.....	14
3.2	Expression Pattern of the pCMAH mRNAs in Various Pig Tissues.....	17
4	Discussion.....	18
3	Functional Characterization of pCMAH in the Synthesis of N-Glycolylneuraminic Acid as the Xenoantigenic Determinant in Pig-to-Human Xenotransplantation.....	19
	<i>Kwon-Ho Song, Cheorl-Ho Kim</i>	
1	Introduction.....	19
2	Materials and Methods.....	20
2.1	Cell Culture.....	20
2.2	Construction of the <i>pcmah</i> Expression Vector.....	20
2.3	Establishment of Stable Transfectants.....	20

2.4	Establishment of pCMAH-Silenced Stable PK15 Cell Lines by shRNA	20
2.5	HPLC Analysis	21
2.6	HPAEC-PAD Analysis	21
2.7	Lactate Dehydrogenase (LDH) Release Assay	21
2.8	FACS Analysis	22
2.9	Western Blot Analysis	22
3	Results	22
3.1	Induced Constitutive Expression of NeuGc in pcmah-Transfected PK15 Cells	22
3.2	Silencing of pCMAH in PK15 Cells	24
3.3	Overexpression of pcmah Inhuman Endothelial ECV304 Cells	25
4	Discussion	26
4	Identification of Two Alternative Promoters of the Pig CMP-N-Acetylneuraminic Acid Hydroxylase Gene	27
	<i>Kwon-Ho Song, Cheorl-Ho Kim</i>	
1	Introduction	27
2	Materials and Methods	29
2.1	Cell Culture	29
2.2	Reverse Transcription-Polymerase Chain Reaction (RT-PCR)	29
2.3	Construction of Plasmids	29
2.4	Generation of Mutations in the pcmah Promoter	29
2.5	Transfection and Luciferase Assay	30
2.6	Electrophoretic Mobility Shift Assays (EMSA)	30
3	Results	32
3.1	Expression of Two Alternative Transcripts, 5'pcmah-1 and -2 in Various Pig Cell Lines	32
3.2	Identification of Two Distinct pcmah Promoter Regions, P1 and P2	33
3.3	Characterization of Regulatory Elements of the pcmah Promoter	35
3.4	Sp1 Is Required for the Basal Promoter Activity of P1 and P2	36
4	Discussion	40
5	Screening for Xenoantigenic Determinants Formed by Sialyltransferases	43
	<i>Kwon-Ho Song, Cheorl-Ho Kim</i>	
1	Introduction	43
2	Materials and Methods	45
2.1	Cell Culture	45
2.2	Construction of Recombinant Expression Vectors	45
2.3	Establishment of Human Sialyltransferase Transfectants	45
2.4	Western Blot Analysis	46
2.5	Lactate Dehydrogenase (LDH) Release Assay	46

2.6	Immunofluorescence Microscopy Analysis	46
2.7	FACS Analysis.....	47
3	Results.....	47
3.1	Establishment of PK15 Cell Lines Transfected by Human Sialyltransferase Genes.....	47
3.2	Human Serum-Mediated Cytotoxicity on Sialyltransferase-Transfected PK15 Cell Lines	48
3.3	Establishment of hST6GalNAc IV-Transfected ECV304 Cells	49
3.4	Human Serum-Mediated Cytotoxicity of hST6GalNAc IV-Transfected PK15 and ECV304 Cell Lines.....	51
3.5	Binding of IgG and IgM to hST6GalNAc IV-Transfected PK15 and ECV304 Cell Lines	52
3.6	NK Cell-Mediated Cytotoxicity	53
4	Discussion	54
