2.1	Introduction	9
2.1.1	D'' and the Lowermost Mantle	9
2.1.2	Seismic Anisotropy	10
2.1.3	Shear Wave Splitting	12
2.2	Measuring Seismic Anisotropy	13
2.2.1	Correcting for the Upper Mantle	14
2.2.2	SH-SV Traveltime Analysis	16
2.2.3	Global Inversion for Anisotropy	20
2.2.4	Regional Full-Waveform Inversion	22
2.2.5	Waveform Analysis	22
2.2.6	Measurements of Shear Wave Splitting	22
2.3	Chemistry and Mineralogy of the Lower Mantle	26
2.3.1	Composition and D'' Mineralogy	26
2.3.2	Single-Crystal Elasticity of D'' Minerals	30
2.3.3	Lattice Preferred Orientation and Slip Systems in D'' Phases	35
2.4	Shape-Preferred Orientation	40
2.5	Geodynamics	41

2.6	Linking Observations to Physical Processes	43
2.6.1	Inferring SPO and TTI	43
2.6.2	Implications of SPO and TTI	45
2.6.3	Inferring Orthorhombic and Higher Symmetries	47
2.6.4	Inferring Deformation in D''	48
2.7	Conclusions and Future Directions.	50
	References	51
3	Mantle Anisotropy Beneath the Earth's Mid-Ocean Ridges	61
3.1	Introduction	61
3.2	Methods and Data	63
3.2.1	Shear Wave Splitting.	63
3.2.2	SKS UM Splitting Corrections	63
3.2.3	Testing the Use of Receiver Corrections	64
3.2.4	Event Locations and Focal Mechanisms.	69
3.2.5	Dataset	69
3.3	Results.	71
3.3.1	East Pacific Rise.	71
3.3.2	Mid-Atlantic Ridge	71
3.3.3	Gakkel Ridge	77
3.3.4	Southwest and Southeast Indian Ridges	81
3.4	Interpretation	81
3.4.1	Doldrums FZ Observations.	81
3.4.2	Comparison of EPR Observations with Model Predictions	83
3.4.3	Inversion for Elliptical Anisotropy Parameters	88
3.5	Discussion	89
3.6	Conclusions	92
	References	93
4	Deformation of the Lowermost Mantle from Seismic Anisotropy	99
4.1	Introduction	99
4.2	Methods and Data	100
4.2.1	S–ScS Differential Splitting	100
4.2.2	Correcting for Upper Mantle Anisotropy	101
4.2.3	Testing SKS Splitting Measurements as Upper Mantle Anisotropy Corrections	104
4.2.4	Source-Side Anisotropy Estimates.	106
4.2.5	Source Polarisation Measurements	107
4.2.6	S–ScS Splitting from Deep Versus Shallow Earthquakes	108
4.2.7	Mineral Slip System Fitting	109

4.3	Results and Discussion	110
4.3.1	LPO in Post-Perovskite	112
4.3.2	LPO in MgSiO ₃ -Perovskite and (Mg, Fe)O	118
4.3.3	Shape-Preferred Orientation	119
4.4	Conclusion	119
	References	120
5	Predicting Lowermost Mantle Anisotropy Using Models of Mantle Flow	123
5.1	Introduction	123
5.1.1	Global Mantle Flow Modelling	124
5.1.2	Texture Modelling	125
5.1.3	Ppv Slip Systems and Flow Models	126
5.1.4	Global VTI Patterns	126
5.1.5	Multi-Azimuth Shear Wave Splitting Predictions	126
5.2	Data and Methods	128
5.2.1	Previous Observations	128
5.2.2	Elastic Constants	130
5.2.3	Shear Wave Splitting Calculation	132
5.3	Results and Discussion	136
5.3.1	Circular Misfit	139
5.3.2	Variation of Splitting Along Paths	141
5.3.3	Comparison with VTI Patterns	145
5.3.4	Discussion	146
