1	Introduction	1
1.1	Research Background	1
1.2	Justification of the Research	3
1.3	Literature Review	3
1.4	Research Objectives and Research Questions	4
1.5	Methodology	5
1.6	Problems and Difficulties of the Study	6
1.7	Structure of the Book	7
2	Status Quo of Land Contamination in China: Causes, Effects and Features	9
2.1	Introduction	9
2.2	Several Key Concepts	10
2.2.1	Contaminated Land	10
2.2.2	Soil Pollution and Land Contamination	11
2.3	Causes of Land Contamination in China	11
2.3.1	Agricultural Nonpoint Sources Pollution (NSP)	12
2.3.2	Heavy Metals Pollution	20
2.3.3	Radioactive Pollution	28
2.3.4	Urban Land Contamination: Former Industry Sites	29
2.3.5	Other Sources	30
2.4	Effects of Present Land Contamination in China	32
2.4.1	Health Damage to People and Ecosystem	32
2.4.2	Tremendous Economic Loss	33
2.4.3	Endangered Food Security	34
2.4.4	Endangered Food Quality Safety	36
2.4.5	Endangered Social Stability	37
2.5	Conclusion	38

3	The Regulatory Frameworks to Address Land Contamination in China	41
3.1	Introduction	41
3.2	The Institutional Framework of Environmental Legislation in China	42
3.2.1	Background Information	42
3.2.2	NPC	43
3.2.3	MEP	44
3.2.4	Relevant Ministries	46
3.2.5	EPBs	47
3.3	Regulatory Frameworks on Addressing Contaminated Land Issues	48
3.3.1	The 1982 Constitution	49
3.3.2	1989 Environmental Protection Law	50
3.3.3	Other National Wide Laws and Regulations	50
3.3.4	Decrees Issued by MEP (Former SEPA)	54
3.3.5	Local Legislation	55
3.3.6	Environmental Standards	56
3.4	Existing Land Contamination Control Regimes	57
3.4.1	Land Contamination Monitoring Systems	57
3.4.2	Site Assessment and Reporting	62
3.4.3	Contaminated Land Treatment and Remediation	63
3.4.4	Land Contamination Liability Regime	65
3.5	Political Responses to Land Contamination Problem	68
3.5.1	Scientific Outlook on Development and State Council Decisions	68
3.5.2	Survey on Soil Pollution	70
3.5.3	National Teleconference on Rural Environmental Protection Work	71
3.5.4	The First National Census on Pollution Sources	71
3.5.5	The Comprehensive Plan for Prevention and Control of Heavy Metal Pollution (2010–2015)	72
3.5.6	National Environment and Health Action Plan (2007–2015)	73
3.6	Concluding Remarks	74
3.6.1	No National Integrated Legislation with Clear Policy Objectives and Principles	74
3.6.2	Inadequate Technologies Supports	75
3.6.3	The Absence of Financial Incentives and Financial Support	75
3.6.4	Unsolved Overlapping Mandates	75
3.6.5	No Solution for the Weak Enforceability at Local Governmental Level	76

4	Contaminated Land Liability Scheme in the US: Lessons for China?	79
4.1	Overview	79
4.2	Operative Concepts of CERCLA Liability Scheme	80
4.2.1	The Liability Standard of CERCLA	80
4.2.2	Responsible Parties	84
4.2.3	Secondarily Liable Potentially Responsible Parties	92
4.2.4	Triggers of Liability	99
4.2.5	Other Issues to Address the CERCLA Liability Mechanism	103
4.3	Critique of the CERCLA Liability Scheme	106
4.3.1	Limited Coverage of Claims	107
4.3.2	Limit Statutory Defences	108
4.3.3	Neglected Fairness Issue	108
4.3.4	Continued Debate over CERCLA's Effectiveness	109
4.4	Criteria for an Ideal Liability System: Cost-Benefit Analysis	110
4.4.1	A Liability-Based Approach Should Generate Low Transaction Costs	110
4.4.2	A Liability Mechanism Should Balance Stakeholder Interactions	111
4.4.3	Fair Methods	112
4.4.4	Limitations of Cost-Benefit Analysis	113
4.5	Conclusion	114
5	Contaminated Land Liability Regime in the UK: General Concerns for Developing Contaminated Land Liability System in China	117
5.1	Introduction	117
5.2	Liability Basis: Defining Contaminated Land	121
5.2.1	The Statutory Definition of Contaminated Land	121
5.2.2	Establishment of the Concept of 'Pollutant Linkage'	122
5.2.3	The Concepts of 'Substances' and 'Land'	122
5.2.4	Criteria for 'Harm' and the 'Significant Possibility of Harm'	123
5.2.5	Stages for Identifying Liability	125
5.2.6	The Role of the Enforcing Authorities	126
5.3	Liability Regime for the Contaminated Land	127
5.3.1	Liable Parties: The Appropriate Person	127
5.3.2	The Second Rank of Appropriate Persons: 'Class B'	131
5.3.3	Exclusions and Exemptions of Liability	132
5.3.4	The Liability Standard of Part IIA	136
5.4	Types of Appropriate Persons	138
5.4.1	Liability of Owners and Occupiers	139
5.4.2	Company's Liability Associated with Contaminated Land	140
5.4.3	Banks, Other Lenders and Similar Entities	143
5.4.4	Environmental Consultants and Contractors	147
5.4.5	Local Authorities and Governmental Bodies	147
5.5	Conclusion	148

6 Contaminated Land Remediation: Legal Issues and Recommendations for China 151

6.1 Introduction 151

6.2 Why Remediate Contaminated Land? Cost-Benefit Analysis for Remediation Decisions 154

6.2.1 Costs of Contaminated Land Remediation 155

6.2.2 Benefits of Contaminated Land Remediation 156

6.2.3 Cost-Benefit Analysis for Remediation Decision: Critical Remarks 157

6.3 How to Remediate Contaminated Sites? Legal Frameworks in the US and UK 159

6.3.1 Essential Issues of the Remediation Mechanism in the US 159

6.3.2 Blue Print for Remediation: National Contingency Plan (NCP) 160

6.3.3 Contaminated Sites Information Management Mechanism Under the CERCLA 160

6.3.4 Contaminated Sites Ranking and Listing Under the CERCLA 164

6.3.5 Authoritative Departments of Implementing Remediation 166

6.3.6 Essential Elements of the Remediation Mechanism in the UK 166

6.4 Technological Issues Related to Contaminated Land Remediation in the US and UK 170

6.4.1 Remedial Technologies Applied in the US 170

6.4.2 Remedial Technologies Applied in the UK 173

6.4.3 Review for Current Contaminated Land Remediation Mechanism 173

6.5 How Clean is Clean? Questions on Contaminated Land Remediation Standards 176

6.5.1 Remediation Standards in the UK 177

6.5.2 Contaminated Land Cleanup Standards in the US 179

6.6 Recommended Principles for Sustainable Contaminated Land Remediation in China 184

6.7 Conclusion 189

7 The Role of Environmental Liability Insurance in Contaminated Land Legislation of China: Theories and Case Study 191

7.1 Introduction 191

7.2 Environmental Risk and Environmental Insurance 194

7.3 Functions of Environmental Insurance 195

7.4 Insurability of Contaminated Land Related Risks 196

7.5 Features of Environmental Insurance Policies 200

7.6	Contaminated Land Related Insurance in US and UK	200
7.6.1	Insurance Response to Environmental Liability in US	200
7.6.2	Insurance Response to Environmental Liability in UK	202
7.6.3	Types (Coverage) of Environmental Insurance	203
7.6.4	Changes and Developments	204
7.6.5	Appropriative Coverage of Insurance for Contaminated Land	205
7.6.6	Trigger Issues	209
7.6.7	Stakeholder Analysis for Contaminated Land Related Environmental Insurance	211
7.7	Environmental Liability Insurance in China	212
7.7.1	Contemporary Environmental Liability Insurance in China	212
7.7.2	Challenges Facing China	214
7.7.3	Case Study: The First Environmental Insurance Case in China	216
7.8	Conclusion: Legislative Recommendations	217
8	Financing Mechanisms for Contaminated Land Remediation and Redevelopment	221
8.1	Introduction	221
8.2	Contaminated Land Redevelopment Funding Mechanisms in the UK	224
8.2.1	Frameworks for Funding Mechanisms Under the Environmental Protection Act 1990	224
8.2.2	English Partnerships (former) Operated Programs	226
8.2.3	Regional Development Agencies and the Single Regeneration Budget	227
8.2.4	Other Key Funding Programs	229
8.3	Funding Mechanisms for Brownfield Redevelopment in the US	231
8.3.1	Federal and State Grants under the EPA Brownfields Programs	232
8.3.2	The US Department of Housing and Urban Development's Brownfields Grants	233
8.3.3	Brownfield Trust Funds	234
8.3.4	Real Estate Investment Trust (REIT)	235
8.3.5	Tax as Brownfield Financing Instruments	236
8.3.6	Designated Federal and State Clean-Up Funds	239
8.4	Comparison of US and UK Contaminated Land Funding Mechanisms	240

8.5	Main Concerns for Establishing Contaminated Land Funding Mechanisms in China	242
8.5.1	Objectives of Contaminated Land Funding Mechanisms	242
8.5.2	The Role of the Local Government	242
8.5.3	Key Factors for an Ideal Contaminated Land Funding Mechanism	243
8.6	Conclusion	245
9	Conclusion and Recommendations	247
9.1	Challenges and Problems Faced by China	247
9.2	Review of China's Current Response to an Explosion in Contaminated Land Cases	248
9.2.1	Lack of a Directly Responsible Authority	248
9.2.2	Lack of Accepted Scientific Data	249
9.2.3	Lack of State and Local Authorities Resources to Handle Emergency Situations	249
9.2.4	Lack of a Single Scientific Director in Charge of Relevant Issues	250
9.2.5	Insensitivity of Local Authorities	250
9.3	The Need for Specific Contaminated Land Legislation	250
9.4	Recommendations for Establishing a Contaminated Land Liability System in China	251
9.4.1	Establishing a Contaminated Land Remediation Regime in China	253
9.4.2	Establishing an Environmental Liability Insurance Regime in China	255
9.4.3	Adopting Various Financial Incentives	256
9.5	Other Recommendations	256
9.5.1	Enhancing Public Participation in Contaminated Land Management	256
9.5.2	Establishing Contaminated Land Information Management Mechanism	257
9.5.3	Conducting Environmental Education and Using Consultation for Contaminated Land Case	258
9.5.4	Promoting Public Interests Litigation on Contaminated Land Cases	258
9.5.5	Enhancing NGO Capacity on Dealing with Land Contaminated Land Issue	259
	Appendix I Terms and Glossaries for US CERCLA	261
	Appendix II Terms and Glossaries for UK Contaminated Land Law	271
	References	275
