

Contents

1	Basic Concepts	1
1.1	Television Transmission Systems	1
1.1.1	Monochrome Television Systems	1
1.1.2	Analog Color Television Broadcast Systems	3
1.1.3	Digital Color Television Broadcast Systems	7
1.2	Equipment for Broadcasting Television Images	12
1.2.1	Video Cameras	12
1.2.2	Movie Cameras	13
1.2.3	Film-to-Video Transference: Pull-Down Process	14
1.3	The Need of De-Interlacing	17
1.3.1	Review of De-Interlacing Algorithms	18
1.4	Implementation of Video De-Interlacing	25
1.4.1	Consumer Video Processing Chips	27
1.4.2	De-Interlacing Implementations Based on DSPs, FPGAs and IP Cores	30
1.5	The Role of Fuzzy Logic in Video Processing	31
1.5.1	Basic Concepts of Fuzzy Logic Theory	32
1.5.2	CAD Tools for Designing Fuzzy Systems	40
1.6	Conclusions	42
	References	43
2	Fuzzy Motion-Adaptive Algorithm for Video De-Interlacing	49
2.1	Motion-Adaptive De-Interlacing	49
2.2	Van de Ville et al. Proposal	55
2.3	A New Fuzzy Motion-Adaptive De-Interlacing Algorithm	58
2.4	Simulation Results	62
2.4.1	Results on Benchmark Video Sequences	62
2.4.2	Detailed Results on Three Sequences	70

2.5	Conclusions	82
	References	83
3	Design Options of the Fuzzy Motion-Adaptive Algorithm	85
3.1	Convolution Mask Options	85
3.1.1	Simulation Results	87
3.2	Rule Base Options	90
3.2.1	Tuning of Membership Function and Consequent Parameters	92
3.2.2	Simulation Results	95
3.3	Conclusions	103
	Reference	103
4	Fuzzy Motion-Adaptive De-Interlacing with Edge-Adaptive Spatial Interpolation	105
4.1	Basic Fuzzy-ELA Algorithm	107
4.1.1	Determination of the Membership Function Parameters ...	112
4.1.2	Performance of the Basic Fuzzy-ELA Algorithm	117
4.2	Modifications of the Basic Fuzzy-ELA Algorithm	120
4.2.1	Recursive Fuzzy-ELA Algorithm	120
4.2.2	ELA 5+5 and Fuzzy-ELA 5+5 Algorithm	122
4.2.3	Improved Fuzzy-ELA 5+5 Algorithm	124
4.2.4	Comparison of the Fuzzy-ELA Algorithms	128
4.2.5	Robustness of Fuzzy Proposals against Noise	133
4.2.6	Fuzzy Motion Adaptive Algorithm with the ‘Improved Fuzzy-ELA 5+5’ as Spatial Interpolator	137
4.3	Conclusions	141
	References	141
5	Fuzzy Motion-Adaptive De-Interlacing with Smart Temporal Interpolation	143
5.1	A Smart Temporal Interpolator	145
5.1.1	Morphological Operations	148
5.2	Performance of the Proposed Algorithm	149
5.3	Evolution of the Fuzzy De-Interlacing Proposals	153
5.4	Comparison with MC De-Interlacing Methods	156
5.5	Conclusions	166
	References	167
	Glossary	169
	Index	173
