

<b>1</b>	<b>Introduction</b>	
1.1	Perspectives from the Past to the Present .....	1
1.2	Plasticity and Homeostasis.....	2
1.3	Present Concept of INIM and Significance for the Ovary .....	2
1.4	Ovarian Events Under Potential INIM Control.....	3
1.5	Material, Methods, and Aims .....	5
1.6	Scheme for Follicle Growth and Corpus Luteum Life Cycle.....	6
	References.....	6
<b>2</b>	<b>Follicle Stages and Follicular Atresia</b>	
2.1	Follicles as a Compartment of Cell Proliferation.....	12
2.1.1	Intact Follicles .....	12
2.1.2	Cell Proliferation.....	13
2.1.3	Inadequate Growth .....	14
2.2	Follicular Atresia.....	15
2.2.1	Preantral Follicles with Pathway A .....	15
2.2.2	Preantral Follicles with Advanced Pathway A.....	16
2.2.3	Antral Follicles with Pathway B .....	17
2.2.4	1,200-R Whole-body X-irradiation.....	18
2.2.5	Effect I After 1,200-R Whole-body X-irradiation .....	19
2.2.6	Effect II After 1,200-R Whole-body X-irradiation .....	20
2.3	Scheme of Pathways A and B .....	21
	References.....	22
<b>3</b>	<b>Follicular Atresia as a Proliferative and Inflammatory Event</b>	
3.1	Cell Proliferation in the Regressing Follicle Compartment .....	24
3.2	Transformation into the Interstitial Cortical Tissue and Resumption of Meiosis.....	25
3.3	Inflammatory Responses in Antral Follicle Atresia .....	26
3.4	Suggested Immunoresponses of the Theca .....	27
3.5	Granulosa Cell Subtypes .....	28
	References.....	29
<b>4</b>	<b>The Cortex and Cellular Stromatolysis</b>	
4.1	Architecture of the Cortex .....	33
4.2	Interstitial Gland Cell Types.....	34
4.3	Cytoplasmic Shedding.....	35
4.4	Scheme for Life Cycle of Interstitial Gland Cells.....	37
	References.....	37

<b>5 The Ovulatory Period as Acute Inflammatory Response to Oxidative Stress and Follicle Cell Harvest</b>	
5.1 Preovulatory Follicles and Superovulations in Species with a Short Estrous Cycle .....	42
5.1.1 Fibrinolytic Activity .....	42
5.1.2 Meiotic Division.....	43
5.1.3 Microvessel Corrosion Casts.....	44
5.2 Oocytes of Mouse Follicle Cultures After Treatment with Low-Density Lipoprotein (oxLDL) and Endoplasmic-Derived Multilamellar Bodies (EMBs) .....	47
5.2.1 Preantral Follicle Oocytes at 20 h of 100 µg/ml oxLDL Treatment .....	47
5.2.2 Preantral Follicle Oocytes at 48 h of 100 µg/ml oxLDL Treatment .....	48
5.2.3 Oocytes in Cumulus–Oocyte Complex Ovulated In Vitro 18 h After Stimulation by hCG/rEGF and Obtained from Preantral Follicles Cultured in the Presence of 100 µg/ml oxLDL for 13 Days .....	49
5.3 Preovulatory Follicles from Species with a Long Ovarian Cycle .....	50
5.3.1 Intact and Freshly Ruptured Follicles .....	50
5.3.2 Microvessels and Leukocytes In Situ Before Rupture .....	51
5.3.3 Microvessels and Leukocytes In Situ After Rupture.....	52
5.3.4 Follicle Cell Harvests and Different Granulosa Cell Death Forms.....	53
5.3.5 Different Granulosa Cell Death Forms in Follicle Cell Harvests .....	54
5.3.6 Cytokeratin-Positive Granulosa Cell Cultures .....	55
5.3.7 Progenitor Cells In Vitro .....	56
5.3.8 Progenitor Cells In Vitro and Ultrastructure .....	57
References.....	58
<b>6 Corpus Luteum Life Cycle with Focus on Capillary Sprouting and Regression, Eosinophils, and KIT-Positive Cells</b>	
6.1 Acute Structural Luteolysis in Superovulated Golden Hamster Ovaries .....	64
6.1.1 Microvessel Corrosion Casts.....	64
6.1.2 Corpus Luteum Stages and the Microvascular Bed: Histology .....	65
6.1.3 Ultrastructure of Capillary Sprouts .....	67
6.2 Bovine Ovaries with Extended Structural Luteolysis .....	70
6.2.1 Overview of Corpus Luteum Stages .....	70
6.2.2 Leukocytes and Microvessels.....	72
6.2.3 Eosinophils and Substance P-like Immunoresponse .....	74
6.2.4 KIT-Positive Cells .....	76
6.2.5 KIT-Positive Cells and CD45 Colocalization .....	78
References.....	79
<b>7 Intraovarian Oocyte Release (IOR) with Severe Tissue Damage</b>	
7.1 IOR in Cyclic and Immature Ovaries.....	83
7.1.1 Incomplete and Complete IOR: Histology .....	83
7.1.2 Granulosa Cell Subtypes in IOR .....	84
7.1.3 Herniated Granulosa Cells: Ultrastructure .....	85
7.1.4 IOR Oocyte and Microvessels: Ultrastructure .....	86
7.1.5 After Effects of IOR in the Cortical Stroma and in Corpora Lutea .....	87
7.2 Increase in IOR Through Superovulations and Side Effects .....	89
7.2.1 Severe Tissue Damage in Ovaries of Rabbits as Induced Ovulators .....	89
7.2.2 Severe Tissue Damage in Rat Ovaries .....	90
7.2.3 Thrombi in Golden Hamster Ovaries .....	92

7.3 Pharmacological Interference.....	93
7.3.1 IOR Increase by Melatonin .....	93
7.3.2 IOR Inhibition by Arginine-Vasotocin PMSG.....	95
7.3.3 IOR Inhibition by Repeated Superovulations .....	96
References.....	97
<b>8 Vascular Stromatolysis and Vascular Luteolysis for Bulk Tissue Removal</b>	
8.1 Vascular Stromatolysis in Histology .....	101
8.2 Vascular Stromatolysis in Ultrastructure.....	102
8.3 Vascular Luteolysis with Prolapse of Luteal Tissue.....	103
8.4 Vascular Luteolysis with Luteal Cell Thrombi.....	104
8.5 Extended Structural Luteolysis with Fatty Degeneration of Luteal Cells.....	105
8.6 Persistent Corpora Lutea with Hemosiderin Deposits .....	106
References.....	107
<b>9 Polycystic and Postmenopausal Ovaries with Negligible Mast Cells</b>	
9.1 Polycystic Rat Ovaries After Dehydroepiandrosterone (DHEA) Treatment ....	110
9.2 Mast Cells and Leukocytes in Human Ovaries .....	111
9.3 Membrane–Membrane Contacts Between Mast Cells and S100-Positive Nerve Fibers .....	112
9.4 Different Densities of S100-Positive Nerve Fibers .....	113
References.....	114
<b>10 Cytokeratin-Positive Cells as Dendritic-Like Cells and Potential Albumin Coexpression in Follicles and CL</b>	
10.1 CK-Positive Cells in the Fetal Ovary .....	118
10.2 Transient Disappearance During Follicular Growth .....	119
10.3 Scheme of CK-Positive Cell Occurrence in Follicles Between Fetal Life and Ovulatory Period.....	120
10.4 Full Expression of CK-Positive Cells in the Developing Corpus Luteum.....	121
10.5 Different Phenotypes of Cell Cultures from the Corpus Luteum.....	122
10.6 Scheme of CK-Positive Cell Occurrence in the Corpus Luteum and Concept of the Origin of Cell Culture Types 1 and 5 .....	123
10.7 Albumin-Positive Cells in Follicles and Corpus Luteum.....	124
10.8 Up-regulation of Albumin-Positive Cells in IOR .....	125
References.....	126
<b>11 Aspects of Immunological Control, Novel Concepts, Challenges, and Clinical Perspectives</b>	
11.1 Immunological Control and Novel Concepts .....	127
11.2 Challenges and Clinical Perspectives .....	128
11.3 Scheme for CK-Positive Cells as a Danger Sensor in the Microvascular Bed: Novel Concept of a Luteovascular Unit.....	130
11.4 Spiral as a Symbol of the Ovary.....	131
References.....	132
