## Keynote Invited Talks

|                                                                                                                                                                               |    |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Outline of a Restriction-Centered Theory of Reasoning and Computation in an Environment of Uncertainty, Imprecision and Partiality of Truth (Video Tape Lecture)</b> ..... | 1  |
| <i>Lotfi A. Zadeh</i>                                                                                                                                                         |    |
| <b>On Structure of Uncertainties</b> .....                                                                                                                                    | 5  |
| <i>Michio Sugeno</i>                                                                                                                                                          |    |
| <b>Advances in Evolutionary Multi-objective Optimization</b> .....                                                                                                            | 7  |
| <i>Kay Chen Tan</i>                                                                                                                                                           |    |
| <b>On the Applications of Fuzzy Implication Functions</b> .....                                                                                                               | 9  |
| <i>Michał Baczynski</i>                                                                                                                                                       |    |
| <b>Information Theoretic Security by the Laws of Classical Physics (Plenary Paper)</b> .....                                                                                  | 11 |
| <i>R. Mingesz, L.B. Kish, Z. Gingl, C.G. Granqvist, H. Wen, F. Peper, T. Eubanks, G. Schmera</i>                                                                              |    |
| <b>Soft Computing and Fusion Algorithms in Biometrics</b>                                                                                                                     |    |
| <b>The Biometric Menagerie – A Fuzzy and Inconsistent Concept</b> .....                                                                                                       | 27 |
| <i>Nicolaie Popescu-Bodorin, Valentina Emilia Balas, Iulia Maria Motoc</i>                                                                                                    |    |
| <b>A Multi-algorithmic Colour Iris Recognition System</b> .....                                                                                                               | 45 |
| <i>Petru Radu, Konstantinos Sirlantzis, Gareth Howells, Sanaul Hoque, Farzin Deravi</i>                                                                                       |    |

|                                                                                                                                         |     |
|-----------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Examples of Artificial Perceptions in Optical Character Recognition and Iris Recognition</b> . . . . .                               | 57  |
| <i>Cristina Madalina Noaica, Robert Badea, Iulia Maria Motoc, Claudiu Gheorghe Ghica, Alin Cristian Rosoiu, Nicolae Popescu-Bodorin</i> |     |
| <b>Noise Influence on the Fuzzy-Linguistic Partitioning of Iris Code Space</b> . . . .                                                  | 71  |
| <i>Iulia Maria Motoc, Cristina Madalina Noaica, Robert Badea, Claudiu Gheorghe Ghica</i>                                                |     |
| <b>Fuzzy Theory, Control and Applications</b>                                                                                           |     |
| <b>Excluded Middle and Graduation</b> . . . . .                                                                                         | 83  |
| <i>Dragan G. Radojević</i>                                                                                                              |     |
| <b>Models for Ranking Students: Selecting Applicants for a Master of Science Studies</b> . . . . .                                      | 93  |
| <i>Payle Milošević, Ivan Nešić, Ana Poledica, Dragan G. Radojević, Bratislav Petrović</i>                                               |     |
| <b>Modeling Candlestick Patterns with Interpolative Boolean Algebra for Investment Decision Making</b> . . . . .                        | 105 |
| <i>Ivan Nešić, Payle Milošević, Aleksandar Rakicevic, Bratislav Petrović, Dragan G. Radojević</i>                                       |     |
| <b>Using Fuzzy Logic to Determine If the Traffic Is Constant or Not in DTF Method</b> . . . . .                                         | 117 |
| <i>Emanuel Ciprian Sasu, Octavian Prostean</i>                                                                                          |     |
| <b>Design an Optimal Fuzzy PID Controller for Herbal Machine Harvester with Gripping-Belt Speed</b> . . . . .                           | 129 |
| <i>Behnam Yavari, Seyed Hamidreza Abbasi, Faridoon Shabaninia</i>                                                                       |     |
| <b>Comparative Study between Tank's Water Level Control Using PID and Fuzzy Logic Controller</b> . . . . .                              | 141 |
| <i>Davood Mohammadi Souran, Seyed Hamidreza Abbasi, Faridoon Shabaninia</i>                                                             |     |
| <b>Design of MIMO Mamdani Fuzzy Logic Controllers for Wall Following Mobile Robot</b> . . . . .                                         | 155 |
| <i>Nasim Paykari, Seyed Hamidreza Abbasi, Faridoon Shabaninia</i>                                                                       |     |
| <b>The Single-Allocation Hierarchical Hub-Median Problem with Fuzzy Flows</b> . . . . .                                                 | 165 |
| <i>Soheil Davari, Mohammad Hossein Fazel Zarandi</i>                                                                                    |     |

## Modelling and Control Applications

|                                                                                                                                                         |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Experimental Application of a Pragmatic Method to Design Control Strategy for Low Power Wind Energy Conversion System</b> .....                      | 183 |
| <i>Radu Boraci, Cristian Vasar</i>                                                                                                                      |     |
| <b>Model Predictive Control for Inside Temperature of an Energy Efficient Building</b> .....                                                            | 197 |
| <i>Cosmin Koch-Ciobotaru</i>                                                                                                                            |     |
| <b>Optimization of the Power Transfer Control between the Ports of a Double Bridge DC – DC Power Converter Type Gyrator</b> .....                       | 209 |
| <i>Ildiko Tatai, Marian Greconici</i>                                                                                                                   |     |
| <b>Maximization of the Energy and Flattening of Fluctuations for the Power Generated into the Network at a Wind Driven Electro Energetic System</b> ... | 217 |
| <i>Ovidiu Gana, Octavian Prostean, Marius Babescu</i>                                                                                                   |     |
| <b>A Brief Outline of Computational Limitations on Actual Wireless Sensor Networks</b> .....                                                            | 237 |
| <i>Gabriel Gîrban, Mircea Popa</i>                                                                                                                      |     |
| <b>The Quality of Following the Welding Path with Arc Sensors</b> .....                                                                                 | 251 |
| <i>Gheorghe Sima</i>                                                                                                                                    |     |
| <b>Modeling of the Electric Arc Behavior of the Electric Arc Furnace</b> .....                                                                          | 261 |
| <i>Manuela Panoiu, Caius Panoiu, Loredana Ghiormez</i>                                                                                                  |     |
| <b>Live Steam Temperature Control Loop for 1035 t/h Benson Boiler</b> .....                                                                             | 273 |
| <i>Onisifor Olaru, Marius Bîzgă</i>                                                                                                                     |     |
| <b>Dynamic Modeling and Computer Simulation of 3D Objects Grasping</b> .....                                                                            | 283 |
| <i>Rim Boughdiri, Hala Bezine, Nacer K. M'Sirdi, Aziz Naamane, Adel M. Alimi</i>                                                                        |     |
| <b>Steps towards Intelligent Circuits</b>                                                                                                               |     |
| <b>Optimization of the Binary Adder Architectures Implemented in ASICs and FPGAs</b> .....                                                              | 295 |
| <i>Bojan Jovanović, Milun Jevtić</i>                                                                                                                    |     |
| <b>Memristor-Based Phase-Lead Controller Circuit Design</b> .....                                                                                       | 309 |
| <i>Tsung-Chih Lin, Wei-Nan Liao, Valentina Emilia Balas</i>                                                                                             |     |
| <b>CMOS-Integrated Temperature Relay Based on Widlar Mirror</b> .....                                                                                   | 319 |
| <i>Mircea A. Ciugudean, Marius M. Bălaș</i>                                                                                                             |     |
| <b>A FPGA Floating Point Interpolator</b> .....                                                                                                         | 331 |
| <i>Marius M. Bălaș, Marius Socaci, Onisifor Olaru</i>                                                                                                   |     |

## Knowledge-Based Technologies for Web Applications, Cloud Computing and Security Algorithms

|                                                                                                                              |     |
|------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Achieving Semantic Integration of Medical Knowledge for Clinical Decision Support Systems</b> .....                       | 337 |
| <i>Daniel Dragu, Valentin Gomoï, Vasile Stoicu-Tivadar</i>                                                                   |     |
| <b>Similarity Measurement of Web Sites</b> .....                                                                             | 349 |
| <i>Doru Anastasiu Popescu, Dragos Nicolae</i>                                                                                |     |
| <b>Transmission of Unsolicited E-mails with Hidden Sender Identity</b> .....                                                 | 357 |
| <i>Ioan Virag, Antoanela Naaji, Marius Popescu</i>                                                                           |     |
| <b>Evaluation of Experiments on Detecting Distributed Denial of Service (DDoS) Attacks in Eucalyptus Private Cloud</b> ..... | 367 |
| <i>Alina Mădălina Lonea, Daniela Elena Popescu, Octavian Prostean, Huaglory Tianfield</i>                                    |     |
| <b>Private Cloud Set Up Using Eucalyptus Open Source</b> .....                                                               | 381 |
