1	Physiological Sensor Signals Analysis to Represent Cases in a Case-Based Diagnostic System	1
	<i>Shahina Begum, Mobyen Uddin Ahmed, Peter Funk</i>	
1	Introduction	1
2	Application Domain: Stress	3
2.1	Physiological Parameters to Measure Stress	4
3	Methods and Approaches	7
3.1	Case-Based Reasoning	7
3.2	Fuzzy Logic	10
3.3	Fast Fourier Transformation	11
3.4	Sensitivity and Specificity Analysis	13
4	Knowledge-Based Stress Diagnostic System	14
4.1	Data Collection	14
4.2	Feature Extraction	15
4.3	Feature Extraction from Finger Temperature Sensor Signals	18
5	Evaluation	19
6	Conclusions	22
	References	23
2	Breast Cancer Histological Image Classification with Multiple Features and Random Subspace Classifier Ensemble	27
	<i>Yungang Zhang, Bailing Zhang, Wenjin Lu</i>	
1	Introduction	27
2	Image Dataset	28
3	Feature Extraction	29
3.1	Curvelet Transform for Breast Cancer Histological Image	29
3.2	Features Extracted from Gray Level Co-occurrence Matrix	30

3.3	Completed Local Binary Patterns for Texture Description	30
3.4	Combined Feature	32
4	Random Subspace Ensemble of Neural Networks	32
4.1	Random Subspace Ensemble and Multi-layer Perceptron	33
4.2	Theoretical Analysis of the Ensemble Classifier	34
5	Experiments and Results	36
5.1	Evaluation of Individual Classifiers	37
5.2	Evaluation of MLP Random Subspace Ensemble	38
6	Conclusion	40
	References	41
3	Image Processing and Reconstruction of Cultured Neuron Skeletons	43
	<i>Donggang Yu, Tuan D. Pham, Jesse S. Jin, Suhuai Luo, Hong Yan, Denis I. Crane</i>	
1	Introduction	44
2	Segmentation of Cultured Neurons Using Logical Analysis of Grey and Distance Difference	44
2.1	Neuronal Cell Culture and Image Acquisition	48
2.2	Logical Level Technique	48
2.3	Logical Level Technique with Difference Analysis of Grey Region	49
2.4	Use of Filtering Window with Constrained Condition	52
2.5	Experiment Results	54
2.6	Discussion	55
3	Reconstruction and Extraction of Neuron Skeletons	62
3.1	Smoothing of Neuron Skeletons	62
3.2	Reconstruction of Neuron Skeletons	63
3.3	Analysis and Calculation of Reconstructed Neuron Skeletons	68
4	Experiments and Conclusion	72
	References	77
4	Protein Structure Prediction: Are We There Yet?	79
	<i>Ashish Runthala, Shibasish Chowdhury</i>	
	Abbreviations	79
1	Introduction	80
2	CASP	81
3	Protein Modelling Algorithms	83
3.1	<i>ab-initio</i> Approach	83
3.2	Comparative Modelling	87

4	Predicting New Folds	105
5	Applications	107
6	Future Research Directions	108
7	Conclusion	110
	References	111
	Appendix of Computational Methods	115
5	Text Mining for Neuroscience: A Co-morbidity Case Study	117
	<i>Christopher C. Lapish, Naveen Tirupattur, Snehasis Mukhopadhyay</i>	
1	Introduction	117
2	Background Literature	119
3	Methodology	121
4	Results and Discussion	123
4.1	Feasibility- Application across Three Neuroscience Domains	123
4.2	Alcoholism and Schizophrenia Co-morbidity	129
5	Conclusions	133
	References	134
6	Robust Algorithmic Detection of Cardiac Pathologies from Short Periods of RR Data	137
	<i>Valeriy V. Gavrishchaka, Olga V. Senyukova</i>	
1	Introduction	137
2	Importance and Challenges of HRV-Based Cardiac Diagnostics from Short RR Time Series	139
3	Generic Framework for the Discovery of Robust Multi-component Indicators	143
4	Meta-indicators for HRV-Based Diagnostics	145
5	Meta-classifiers for Multiple Abnormality Detection	147
6	Diagnostics of Complex and Rare Events	149
7	Conclusions	152
	References	152
7	Studies on Five Senses Treatment	155
	<i>Sadaka Sato, Tiejun Miao, Mayumi Oyama-Higa</i>	
1	Introduction	156
2	Experiment Method	157
2.1	Experiment 1	157
2.2	Experiment 2	158
3	Analysis Method	159
3.1	Chaos Analysis of Time Series	159
3.2	Recurrence Quantitative Analysis	160
4	Results	161
4.1	Results of Chaos Analysis of Voice	161
4.2	Results of RQA Analysis	162
4.3	Chaos and Power Spectrum in Scalp EEG	163

4.4	Lyapunov Exponent Distribution over Scalp EEG	166
4.5	Changes of Plethysmogram in Relation to EEG	168
5	Case Study	169
5.1	Method of Five Senses Therapy	169
5.2	Patients and Study Design	171
5.3	Result of Therapy	172
6	Discussion and Conclusion	173
	References	174
8	Fuzzy Knowledge-Based Subspace Clustering for Life Science Data Analysis	177
	<i>Theam Foo Ng, Tuan D. Pham, Xiuping Jia, Donald Fraser</i>	
1	Introduction	177
2	Soft Subspace Clustering	181
2.1	FWSC Algorithms	182
2.2	EWSC Algorithms	183
3	Non-additive Measures and Choquet Integral	185
3.1	Fuzzy Measures	185
3.2	Signed Fuzzy Measures	187
3.3	The Choquet Integral	187
4	Subspace Clustering-Based Choquet Integral	188
4.1	Framework for FISC	189
4.2	Framework for PFISC	193
5	Experimental Results	198
5.1	Analysis of Feature Interaction	202
5.2	Performance Evaluation	206
6	Conclusions	208
	References	209
	Author Index	215
