

Contents

1	Definitions and Basic Results	1
1.1	Regular Functions	1
1.2	Affine Representation	4
1.3	Extension Results	8
1.4	Algebraic Structure	10
2	Regular Power Series	15
2.1	The Distance σ	17
2.2	Convergence of Power Series Centered at p	19
2.3	Series Expansion at p and Analyticity	21
3	Zeros	25
3.1	Basic Properties of the Zeros	25
3.2	Algebraic Properties of the Zeros	26
3.3	Topological Properties of the Zeros	28
3.4	On the Roots of Quaternions	29
3.5	Factorization of Polynomials	32
3.6	Multiplicity	38
3.7	Division Algorithm and Bezout Theorem	42
3.8	Gröbner Bases for Quaternionic Polynomials	46
4	Infinite Products	51
4.1	Infinite Products of Quaternions	51
4.2	The Quaternionic Logarithm	52
4.3	Infinite Products of Functions Defined on $\mathbb{H}$	57
4.4	Convergence of an Infinite $*$ -Product	61
4.5	Convergence-Producing Regular Factors	64
4.6	Weierstrass Factorization Theorem	69
5	Singularities	75
5.1	Regular Reciprocal and Quotients	75
5.2	Laurent Series and Expansion	77
5.3	Classification of Singularities	82

5.4	Poles and Quotients	84
5.5	Casorati–Weierstrass Theorem	88
6	Integral Representations	91
6.1	Cauchy Theorem and Morera Theorem	91
6.2	Cauchy Integral Formula	92
6.3	Pompeiu Formula	94
6.4	Derivatives Using the Cauchy Formula	95
6.5	Coefficients of the Laurent Series Expansion	96
6.6	Argument Principle	97
7	Maximum Modulus Theorem and Applications	103
7.1	Maximum and Minimum Modulus	103
7.2	Open Mapping Theorem	105
7.3	Real Parts of Regular Functions	106
7.4	Phragmén–Lindelöf Principles	112
7.5	An Ehrenpreis–Malgrange Lemma	117
8	Spherical Series and Differential	127
8.1	Spherical Series and Expansions	127
8.2	Integral Formulas and Cauchy Estimates	131
8.3	Symmetric Analyticity	132
8.4	Differentiating Regular Functions	134
8.5	Rank of the Differential	137
9	Fractional Transformations and the Unit Ball	141
9.1	Transformations of the Quaternionic Space	141
9.2	Regular Fractional Transformations	142
9.3	Transformations of the Quaternionic Riemann Sphere	145
9.4	Schwarz Lemma and Transformations of the Unit Ball	147
9.5	Rigidity and a Boundary Schwarz Lemma	150
9.6	Borel–Carathéodory Theorem	154
9.7	Bohr Theorem	157
10	Generalizations and Applications	163
10.1	Slice Regularity in Algebras Other than $\mathbb{H}$	163
10.1.1	The Case of Octonions	163
10.1.2	The Case of $\mathbb{R}_3$	166
10.1.3	The Monogenic Case	170
10.2	Quaternionic Functional Calculus	171
10.3	Orthogonal Complex Structures Induced by Regular Functions ...	174
