

1	Numbers	1
1.1	The Real Numbers	1
1.2	Order Relation and Arithmetic on $\mathbb{R}$	5
1.3	Machine Numbers	8
1.4	Rounding	10
1.5	Exercises	11
2	Real-Valued Functions	13
2.1	Basic Notions	13
2.2	Some Elementary Functions	17
2.3	Exercises	22
3	Trigonometry	25
3.1	Trigonometric Functions at the Triangle	25
3.2	Extension of the Trigonometric Functions to $\mathbb{R}$	29
3.3	Cyclometric Functions	31
3.4	Exercises	34
4	Complex Numbers	37
4.1	The Notion of Complex Numbers	37
4.2	The Complex Exponential Function	40
4.3	Mapping Properties of Complex Functions	41
4.4	Exercises	43
5	Sequences and Series	45
5.1	The Notion of an Infinite Sequence	45
5.2	The Completeness of the Set of Real Numbers	51
5.3	Infinite Series	53
5.4	Supplement: Accumulation Points of Sequences	57
5.5	Exercises	60
6	Limits and Continuity of Functions	63
6.1	The Notion of Continuity	63
6.2	Trigonometric Limits	67
6.3	Zeros of Continuous Functions	68
6.4	Exercises	71

7	The Derivative of a Function	73
7.1	Motivation	73
7.2	The Derivative	75
7.3	Interpretations of the Derivative	79
7.4	Differentiation Rules	82
7.5	Numerical Differentiation	87
7.6	Exercises	92
8	Applications of the Derivative	95
8.1	Curve Sketching	95
8.2	Newton's Method	100
8.3	Regression Line Through the Origin	105
8.4	Exercises	108
9	Fractals and L-Systems	111
9.1	Fractals	111
9.2	Mandelbrot Sets	117
9.3	Julia Sets	119
9.4	Newton's Method in $\mathbb{C}$	120
9.5	L-Systems	122
9.6	Exercises	125
10	Antiderivatives	127
10.1	Indefinite Integrals	127
10.2	Integration Formulae	130
10.3	Exercises	133
11	Definite Integrals	135
11.1	The Riemann Integral	135
11.2	Fundamental Theorems of Calculus	141
11.3	Applications of the Definite Integral	143
11.4	Exercises	146
12	Taylor Series	149
12.1	Taylor's Formula	149
12.2	Taylor's Theorem	153
12.3	Applications of Taylor's Formula	154
12.4	Exercises	157
13	Numerical Integration	159
13.1	Quadrature Formulae	159
13.2	Accuracy and Efficiency	164
13.3	Exercises	166
14	Curves	169
14.1	Parametrised Curves in the Plane	169
14.2	Arc Length and Curvature	177
14.3	Plane Curves in Polar Coordinates	183

14.4	Parametrised Space Curves	185
14.5	Exercises	187
15	Scalar-Valued Functions of Two Variables	191
15.1	Graph and Partial Mappings	191
15.2	Continuity	193
15.3	Partial Derivatives	194
15.4	The Fréchet Derivative	198
15.5	Directional Derivative and Gradient	202
15.6	The Taylor Formula in Two Variables	204
15.7	Local Maxima and Minima	206
15.8	Exercises	209
16	Vector-Valued Functions of Two Variables	211
16.1	Vector Fields and the Jacobian	211
16.2	Newton's Method in Two Variables	213
16.3	Parametric Surfaces	215
16.4	Exercises	217
17	Integration of Functions of Two Variables	219
17.1	Double Integrals	219
17.2	Applications of the Double Integral	225
17.3	The Transformation Formula	227
17.4	Exercises	230
18	Linear Regression	233
18.1	Simple Linear Regression	233
18.2	Rudiments of the Analysis of Variance	239
18.3	Multiple Linear Regression	242
18.4	Model Fitting and Variable Selection	245
18.5	Exercises	249
19	Differential Equations	251
19.1	Initial Value Problems	251
19.2	First-Order Linear Differential Equations	253
19.3	Existence and Uniqueness of the Solution	259
19.4	Method of Power Series	262
19.5	Qualitative Theory	264
19.6	Exercises	266
20	Systems of Differential Equations	267
20.1	Systems of Linear Differential Equations	267
20.2	Systems of Nonlinear Differential Equations	278
20.3	Exercises	283
21	Numerical Solution of Differential Equations	287
21.1	The Explicit Euler Method	287
21.2	Stability and Stiff Problems	290

21.3	Systems of Differential Equations	292
21.4	Exercises	293
22	Appendix A: Vector Algebra	295
22.1	Cartesian Coordinate Systems	295
22.2	Vectors	295
22.3	Vectors in a Cartesian Coordinate System	296
22.4	The Inner Product (Dot Product)	299
22.5	The Outer Product (Cross Product)	300
22.6	Straight Lines in the Plane	301
22.7	Planes in Space	303
22.8	Straight Lines in Space	304
23	Appendix B: Matrices	307
23.1	Matrix Algebra	307
23.2	Canonical Form of Matrices	311
24	Appendix C: Further Results on Continuity	317
24.1	Continuity of the Inverse Function	317
24.2	Limits of Sequences of Functions	318
24.3	The Exponential Series	320
24.4	Lipschitz Continuity and Uniform Continuity	325
25	Appendix D: Description of the Supplementary Software	329
	References	331
