

# Table of Contents

## Keynotes

The Darmstadt Model: A First Step towards a Research Framework for Computer Science Education in Schools . . . . .	1
<i>Peter Hubwieser</i>	
Computer Science in Secondary Schools in the UK: Ways to Empower Teachers . . . . .	15
<i>Sue Sentance, Mark Dorling, and Adam McNicol</i>	

## From Computer Usage to Computational Thinking

Informatics in the French Secondary Curricula: Recent Moves and Perspectives . . . . .	31
<i>Françoise Tort and Béatrice Drot-Delange</i>	
Informatics for All High School Students: A Computational Thinking Approach . . . . .	43
<i>Maciej M. Sysło and Anna Beata Kwiatkowska</i>	

## Algorithmic and Computational Thinking

Novice Difficulties with Interleaved Pattern Composition . . . . .	57
<i>David Ginat, Eti Menashe, and Amal Taya</i>	
Blind Pupils Begin to Solve Algorithmic Problems . . . . .	68
<i>Ludmila Jašková</i>	

## Games

Location-Based Games in Informatics Education . . . . .	80
<i>Gabriela Lovászová and Viera Palmárová</i>	
Using Computer Games as Programming Assignments for University Students and Secondary School Pupils . . . . .	91
<i>Monika Tomcsányiová</i>	

## Informatics in the Context of Other Disciplines

The Context-Based Approach IniK in Light of Situated and Constructive Learning Theories . . . . .	103
<i>Maria Knobelsdorf and Josh Tenenber</i>	

“Archaeology of Information” in the Primary School.....	115
<i>Diana Bitto and Claudio Mirolo</i>	
The Contribution of Computer Science to Learning Computational Physics .....	127
<i>Rivka Taub, Michal Armoni, and Mordechai Ben-Ari</i>	
Computer Modeling with Delphi: Constructionism and IBL in Practice and Motivation for Studying STEM .....	138
<i>Jan Benacka and Jaroslav Reichel</i>	
Learning Fields in Vocational IT Education – How Teachers Interpret the Concept .....	147
<i>Simone Opel and Torsten Brinda</i>	
 <b>Competence-Based Learning and Retention of Competencies</b>	
Competence Measurement and Informatics Standards in Secondary Education.....	159
<i>Johannes Magenheim, Jonas Neugebauer, Peer Stechert, Laura Ohrndorf, Barbara Linck, Sigrid Schubert, Wolfgang Nelles, and Niclas Schaper</i>	
On Competence-Based Learning and Neuroscience .....	171
<i>Peter K. Antonitsch and Barbara Sabitzer</i>	
Categorization of Pictures in Tasks of the Bebras Contest .....	184
<i>Monika Tomcsányiová and Martina Kabátová</i>	
Research-Based Learning Revisited: On Using a Delphi Process in Informatics Teacher Education .....	196
<i>Holger Danielsiek, Ludger Humbert, and Jan Vahrenhold</i>	
<b>Author Index .....</b>	<b>209</b>
