

Part I Orthodontic Materials

1 An Overview of Research Methods on Orthodontic Alloys and Ceramics	3
Spiros Zinelis and William A. Brantley	
2 Research on Orthodontic Polymers	35
Christos Rahiotis, Theodore Eliades, Nikolaos Silikas, and George Eliades	
3 In Vitro Assessment of Biocompatibility for Orthodontic Materials	61
Harris Pratsinis, Eleni Mavrogonatou, Adamantia Papadopoulos, and Dimitris Kletsas	

Part II Computers in Orthodontic Research

4 Computers in Orthodontic Research	81
Demetrios J. Halazonetis	

Part III Clinical Orthodontic Research

5 Clinical Orthodontic Research	115
Kevin O'Brien	
6 Meta-analyses and Evidence-Based Orthodontic Practice	127
Moschos A. Papadopoulos	
7 Key Issues in Designing Epidemiologic and Clinical Studies in Orthodontics	159
Argy Polychronopoulou	

Part IV Biological Research in Orthodontics

8 Basic Science Research Methods in Orthodontics	185
Dionysios J. Papachristou and Efthimia K. Basdra
