

Table of contents

1. Introduction	1
<i>1.1 Objectives of the study</i>	3
2. Literature review	5
<i>2.1 Study species: The blue-eyed black lemur</i> <i>(Eulemur flavifrons, GRAY 1867)</i>	5
<i>2.2 Habitat use</i>	6
<i>2.3 Cathemerality</i>	9
<i>2.4 Endo- and ectoparasites</i>	10
3. Material and Methods	13
<i>3.1 Study site</i>	13
<i>3.1.1 Habitat structure and forest characteristics</i>	15
<i>3.2 Habitat use</i>	16
<i>3.2.1 Forest cover and home range size</i>	17
<i>3.2.2 Statistics</i>	17
<i>3.3 Cathemerality</i>	18
<i>3.3.1 Behavioural observations</i>	18
<i>3.3.2 Climate and nocturnal luminance</i>	19
<i>3.3.3 Statistics</i>	20
<i>3.4 Endo- and ectoparasites</i>	21
<i>3.4.1 Collections</i>	21
<i>3.4.2 Faecal samples analysis</i>	22
<i>3.4.3 Ectoparasite analysis</i>	22
<i>3.4.4 Data analysis</i>	22
4. Results	23
<i>4.1 Habitat structure and forest characteristics</i>	23
<i>4.2 Habitat use</i>	26
<i>4.2.1 Use of plant families</i>	27
<i>4.2.2 Use of trees for feeding and resting</i>	27
<i>4.2.3 Forest cover and home range size</i>	28
<i>4.3 Cathemerality</i>	29
<i>4.3.1 Daily activity rhythms and effects of season</i>	29
<i>4.3.2 Effects of habitat structure</i>	32
<i>4.3.3 Effects of nocturnal luminosity</i>	32
<i>4.4 Parasites</i>	35
5. Discussion	43
<i>5.2 Habitat use</i>	43
<i>5.3 Cathemerality</i>	45

5.3.1 <i>Effects of habitat structure</i>	46
5.3.2 <i>Effects of nocturnal luminosity</i>	46
5.3.3 <i>Temporal behavioural plasticity in a variable environment</i>	47
5.4 <i>Parasites</i>	48
5.5 <i>Synopsis</i>	51
6. Conclusions	53
7. Summary	55
8. Zusammenfassung	57
9. References	59
10. Appendix	69
A- Structural variables of primary and secondary forest	78
B- Plant species of primary and secondary forest in Sahamalaza	81
C- Preferred feeding or sleeping trees	82
D- Ethogram of behaviours recorded during the observations	84
E- Photos of primary and secondary forest	87
11. Acknowledgements	89
