FoSSaCS 2010 Invited Talk

Introduction to Decidability of Higher-Order Matching (Abstract)	1
<i>Colin Stirling</i>	

Semantics of Programming Languages

A Semantic Foundation for Hidden State	2
<i>Jan Schwinghammer, Hongseok Yang, Lars Birkedal, François Pottier, and Bernhard Reus</i>	
Linearly-Used Continuations in the Enriched Effect Calculus	18
<i>Jeff Egger, Rasmus Ejlers Møgelberg, and Alex Simpson</i>	
Block Structure vs. Scope Extrusion: Between Innocence and Omniscience	33
<i>Andrzej S. Murawski and Nikos Tzevelekos</i>	
Completeness for Algebraic Theories of Local State	48
<i>Sam Staton</i>	

Probabilistic and Randomised Computation

Fair Adversaries and Randomization in Two-Player Games	64
<i>Eugene Asarin, Raphaël Chane-Yack-Fa, and Daniele Varacca</i>	
Retaining the Probabilities in Probabilistic Testing Theory	79
<i>Sonja Georgievska and Suzana Andova</i>	

Concurrency and Process Theory

Forward Analysis of Depth-Bounded Processes	94
<i>Thomas Wies, Damien Zufferey, and Thomas A. Henzinger</i>	
Incremental Pattern-Based Coinduction for Process Algebra and Its Isabelle Formalization	109
<i>Andrei Popescu and Elsa L. Gunter</i>	
Parameterised Multiparty Session Types	128
<i>Nobuko Yoshida, Pierre-Malo Deniélou, Andi Bejleri, and Raymond Hu</i>	

On the Relationship between Spatial Logics and Behavioral
Simulations 146
Lucia Acciai, Michele Boreale, and Gianluigi Zavattaro

Modal and Temporal Logics

An Easy Completeness Proof for the Modal μ -Calculus on Finite
Trees 161
Balder ten Cate and Gaëlle Fontaine

When Model-Checking Freeze LTL over Counter Machines Becomes
Decidable 176
Stéphane Demri and Arnaud Sangnier

Model Checking Is Static Analysis of Modal Logic 191
Flemming Nielson and Hanne Riis Nielson

Counting CTL 206
François Laroussinie, Antoine Meyer, and Eudes Petonnet

Algorithmic Metatheorems for Decidable LTL Model Checking over
Infinite Systems 221
Anthony Widjaja To and Leonid Libkin

Verification

Toward a Compositional Theory of Leftist Grammars and
Transformations 237
Pierre Chambart and Philippe Schnoebelen

Degrees of Lookahead in Regular Infinite Games 252
Michael Holtmann, Lukasz Kaiser, and Wolfgang Thomas

Reachability Analysis of Communicating Pushdown Systems 267
*Alexander Heußner, Jérôme Leroux, Anca Muscholl, and
Grégoire Sutre*

The Complexity of Synchronous Notions of Information Flow
Security 282
Franck Cassez, Ron van der Meyden, and Chenyi Zhang

Categorical and Coalgebraic Methods

Monads Need Not Be Endofunctors 297
Thorsten Altenkirch, James Chapman, and Tarmo Uustalu

CIA Structures and the Semantics of Recursion 312
Stefan Milius, Lawrence S. Moss, and Daniel Schwencke

Coalgebraic Correspondence Theory	328
<i>Lutz Schröder and Dirk Pattinson</i>	

Lambda Calculus and Types

Untyped Recursion Schemes and Infinite Intersection Types	343
<i>Takeshi Tsukada and Naoki Kobayashi</i>	

Solvability in Resource Lambda-Calculus	358
<i>Michele Pagani and Simona Ronchi della Rocca</i>	

A Hierarchy for Delimited Continuations in Call-by-Name	374
<i>Alexis Saurin</i>	

Author Index	389
