

Contents

Isotropically and Anisotropically Weighted Sobolev Spaces for the Oseen Equation	1
Chérif Amrouche and Ulrich Razafison	
A New Model of Diphasic Fluids in Thin Films	25
Guy Bayada, Laurent Chupin, and Bérénice Grec	
On the Global Integrability for Any Finite Power of the Full Gradient for a Class of Generalized Power Law Models $p < 2$	37
Hugo Beirão da Veiga	
Steady Flow Around a Floating Body: The Rotationally Symmetric Case .	43
Josef Bemelmans and Mads Kyed	
On a Stochastic Approach to Eddy Viscosity Models for Turbulent Flows .	55
Luigi C. Berselli and Franco Flandoli	
Numerical Study of the Significance of the Non-Newtonian Nature of Blood in Steady Flow Through a Stenosed Vessel	83
Tomáš Bodnár and Adélia Sequeira	
A Priori Convergence Estimates for a Rough Poisson-Dirichlet Problem with Natural Vertical Boundary Conditions	105
Eric Bonnetier, Didier Bresch, and Vuk Milišić	
Vortex Induced Oscillations of Cylinders at Low and Intermediate Reynolds Numbers	135
Roberto Camassa, Bong Jae Chung, Philip Howard, Richard McLaughlin, and Ashwin Vaidya	

One-dimensional Modelling of Venous Pathologies: Finite Volume and WENO Schemes	147
Nicola Cavallini and Vincenzo Coscia	
On the Energy Equality for Weak Solutions of the 3D Navier-Stokes Equations	171
Alexey Cheskidov, Susan Friedlander, and Roman Shvydkoy	
The $(p - q)$ Coupled Fluid-Energy Systems	177
Luisa Consiglieri	
A Potential-Theoretic Approach to the Time-Dependent Oseen System ...	191
Paul Deuring	
Regularity of Weak Solutions for the Navier-Stokes Equations Via Energy Criteria	215
Reinhard Farwig, Hideo Kozono, and Hermann Sohr	
Looking for the Lost Memory in Diffusion-Reaction Equations	229
José Augusto Ferreira and Paula de Oliveira	
Maximum Principle and Gradient Estimates for Stationary Solutions of the Navier-Stokes Equations: A Partly Numerical Investigation	253
Robert Finn, Abderrahim Ouazzi, and Stefan Turek	
A Study of Shark Skin and Its Drag Reducing Mechanism	271
Elfriede Friedmann, Julia Portl, and Thomas Richter	
Stability of Poiseuille Flow in a Porous Medium	287
Antony A. Hill and Brian Straughan	
Towards a Geometrical Multiscale Approach to Non-Newtonian Blood Flow Simulations	295
João Janela, Alexandra Moura, and Adélia Sequeira	
The Role of Potential Flow in the Theory of the Navier-Stokes Equations .	311
Daniel D. Joseph	
Small Perturbations of Initial Conditions of Solutions of the Navier-Stokes Equations in the L^3-Norm and Applications	319
Petr Kučera	
Streaming Flow Effects in the Nearly Inviscid Faraday Instability	329
Elena Martín and José M. Vega	

The Dirichlet Problems for Steady Navier-Stokes Equations in Domains with Thin Channels	339
Yuliya V. Namlyeyeva, Šarka Nečasová, and Igor Igorievich Skrypnik	
Existence of Weak Solutions to the Equations of Natural Convection with Dissipative Heating	367
Joachim Naumann and Jörg Wolf	
A Weak Solvability of the Navier-Stokes Equation with Navier's Boundary Condition Around a Ball Striking the Wall	385
Jiří Neustupa and Patrick Penel	
On the Influence of an Absorption Term in Incompressible Fluid Flows ...	409
Hermenegildo B. de Oliveira	
Adaptive FE Eigenvalue Computation with Applications to Hydrodynamic Stability	425
Rolf Rannacher	
Numerical Simulation of Laminar Incompressible Fluid-Structure Interaction for Elastic Material with Point Constraints	451
Mudassar Razzaq, Jaroslav Hron, and Stefan Turek	
On Stokes' Problem	473
Remigio Russo	
On a C^0 Semigroup Associated with a Modified Oseen Equation with Rotating Effect	513
Yoshihiro Shibata	
A New Approach to the Regularity of Weak L^q-Solutions of Stokes and Similar Equations via the Cosserat Operator	553
Christian G. Simader	
Large Time Behavior of Energy in Some Slowly Decreasing Solutions of the Navier-Stokes Equations	573
Zdeněk Skálák	
A Selected Survey of the Mathematical Theory of 1D Flows	581
Ivan Straškraba	
A Numerical Method for Nonstationary Stokes Flow	589
Werner Varnhorn	

A New Criterion for Partial Regularity of Suitable Weak Solutions to the Navier-Stokes Equations	613
Jörg Wolf	
An In Vitro Device for Evaluation of Cellular Response to Flows Found at the Apex of Arterial Bifurcations	631
Zijing Zeng, Bong Jae Chung, Michael Durka, and Anne M. Robertson
