

Contents

Synthesis of Modeling and Simulation Methods on Critical Infrastructure Interdependencies Research.....	1
<i>Gesara Satumtira, Leonardo Dueñas-Osorio</i>	
Interdependencies between Energy and Transportation Systems for National Long Term Planning	53
<i>Eduardo Ibáñez, Konstantina Gkritza, James McCalley, Dionysios Aliprantis, Robert Brown, Arun Somani, Lizhi Wang</i>	
A Framework for Assessing the Resilience of Infrastructure and Economic Systems	77
<i>Eric D. Vugrin, Drake E. Warren, Mark A. Ehlen, R. Chris Camphouse</i>	
Regional Infrastructure Investment Allocation for Sustainability	117
<i>Terry L. Friesz, Sung H. Chung, Robert D. Weaver</i>	
A Framework for the Manifestation of Tacit Critical Infrastructure Knowledge	139
<i>Ebrahim Bagheri, Ali A. Ghorbani</i>	
Intelligent Transportation Infrastructure Technologies for Condition Assessment and Structural Health Monitoring of Highway Bridges	159
<i>Kerop D. Janoyan, Matthew J. Whelan</i>	
Maintenance Optimization for Heterogeneous Infrastructure Systems: Evolutionary Algorithms for Bottom-Up Methods	185
<i>Hwasoo Yeo, Yoonjin Yoon, Samer Madanat</i>	

A Swarm Intelligence Approach for Emergency Infrastructure Inspection Scheduling.....	201
<i>Vagelis Plevris, Matthew G. Karlaftis, Nikos D. Lagaros</i>	
Optimal Highway Infrastructure Maintenance Scheduling Considering Deterministic and Stochastic Aspects of Deterioration	231
<i>Manoj K. Jha</i>	
Sustainable Rehabilitation of Deteriorated Concrete Highways: Condition Assessment Using Shuffled Complex Evolution (SCE) Global Optimization Approach	249
<i>Sunghwan Kim, Kasthurirangan Gopalakrishnan</i>
