1 Cotton: An Introduction	1
B.M. Khadi, V. Santhy, and M.S. Yadav	
1.1 Introduction	1
1.2 History and Taxonomy	2
1.3 Origin and Distribution	5
1.3.1 Origin, Domestication and Distribution of Diploids	6
1.3.2 Origin, Domestication and Distribution of Allotetraploid Cottons	7
1.4 Germplasm Resources in Cotton	10
1.4.1 Primary Gene Pool	10
1.4.2 Secondary Gene Pools	11
1.4.3 Tertiary Gene Pool	11
References	12
2 Cotton in India	15
B.M. Khadi, V. Santhy, and M.S. Yadav	
2.1 Introduction	15
2.2 Cotton Improvement in India	18
2.2.1 General Selection Procedures	19
2.2.2 Methods to Exploit Heterosis and/or Recombination	19
2.2.3 Population Improvement Approaches	20
2.2.4 Breeding Methods for Specific Purposes	21
2.2.5 Composite Crossing	23
2.3 Heterosis Breeding in Cotton	23
2.3.1 General Features of Hybrid Vigor in Cotton	24
2.3.2 Hybrid Seed Production Techniques in Cotton	24
2.3.3 Identification of Good Combiners	24
2.3.4 Hand Emasculation and Pollination	25
2.4 Use of Male Sterility	25
2.4.1 Male Sterility in Tetraploid	25
2.4.2 Male Sterility in Diploids	26
2.4.3 Thermo Sensitive Genetic Male Sterility	27

2.5	Bee Pollination	27
2.6	Factors Affecting Yield and Quality of Hybrid Seed	28
2.7	Apomixis	28
2.8	Breeding for Insect Resistance	29
2.8.1	Conventional Breeding Approach	29
2.8.2	Biotechnological Approach	31
2.9	Bt Cotton	32
2.9.1	Development of Bt Kits	35
2.9.2	Disease Resistance	35
2.9.3	Fiber Quality and Its Improvement	37
2.10	Value Addition for Cotton	37
2.11	Export	38
2.12	Naturally Colored Cotton	39
2.13	Molecular Marker Techniques Used in Cotton Improvement	39
2.14	Future Strategies	39
