

Contents

Contents	i
1 Frege systems	1
1.1 Language of modal logic	1
1.2 The calculi of modal logic	1
1.3 Kripke models	3
1.4 Completeness	4
1.5 Finiteness	6
2 Gentzen systems	7
2.1 Strategies in and-or-trees	7
2.2 The language of modal logic	8
2.3 The basic modal system K	9
2.4 Many worlds semantics	13
2.5 Other systems	14
3 Interpolation and diagonalization	19
3.1 Classical logic	19
3.2 Modal logic	23
3.3 Fixpoint theorem	25
3.4 Cantors diagonal argument	26
3.5 Russells paradox	29
3.6 Fixed point of functions	29
3.7 Coding	30
3.8 The halting problem	31
3.9 The fix point theorem	32

3.10	Diagonal lemma	32
4	Provability	35
4.1	Expressing syntax	35
4.2	Calculi of syntax	37
4.3	Gödel - Löb modal logic	39
5	Incompleteness	45
5.1	Gödel's zeroth incompleteness theorem	45
5.2	Gödel's first incompleteness theorem	45
5.3	Gödel's second incompleteness theorem	47
5.4	Tarski's theorem	48
6	Provability logic	49
6.1	Solovay's first completeness theorem	49
6.2	Solovay's second completeness theorem	52
7	Multi modal logic	57
7.1	Many modal operators	57
7.2	Temporal logic	59
7.3	Description logic	61
7.4	Epistemic logic	62
7.5	The Byzantine generals	65
8	Games on finite arenas	73
8.1	Arena	73
8.2	Game trees	74
8.3	Choices	77
8.4	Infinite positional strategies	81

9	Decision problems	83
9.1	Games using input	83
9.2	Second order monadic theory — S2S	84
9.3	Decidability of arithmetic	87
9.4	Processes	92
