Acronyms	xv
1 Metrology Through Ages	1
1.1 Introduction	1
1.2 History of Metrology in India	2
1.2.1 Legal Metrology	2
1.2.2 Town Planning	2
1.2.3 Length Measurements	2
1.2.4 Time Measurements	3
1.2.5 Units of Time and Angle	10
1.2.6 Mass Measurement	10
1.2.7 Volume Measurements	11
1.2.8 Numeration	12
References	13
Further Readings	13
2 System of Quantities and Units	15
2.1 Quantities	15
2.2 System of Quantities	16
2.2.1 Quantity	16
2.2.2 Base Quantity	16
2.2.3 System of Base Quantities	16
2.2.4 Derived Quantity	16
2.2.5 Quantity Equation	17
2.3 Measurement Unit	17
2.3.1 System of Measurement Units	18
2.3.2 System of Base Units	18
2.3.3 Derived Unit	19
2.3.4 Unit Equation	19

2.3.5	Properties of Units of Measurement.....	20
2.3.6	Coherent Derived Unit	20
2.4	Quantity of Dimension 1 or Dimensionless Quantity	21
2.4.1	Dimension of a Quantity	21
2.4.2	Quantities of Dimension 1 or Dimensionless Quantities	22
2.4.3	Ordinal Quantity	23
2.4.4	Quantity Scale, Measurement Scale	23
2.4.5	Ordinal Quantity Scale, Ordinal Scale	23
2.4.6	Nominal Property	24
2.5	Conversion Factor Between Units	24
2.6	Quantity Relations	24
2.6.1	Quantity Value.....	24
2.6.2	Numerical Quantity Value	25
2.6.3	Quantity Calculus	26
2.7	Units Used in Biology Biochemistry, Molecular Biology, Forensic Science for Biological Effects	26
2.7.1	Photochemical or Photo-biological Quantities and Their Units	26
2.8	Units Used in Photometry	27
2.8.1	Photometry	27
2.8.2	Actinic Action Spectrum.....	28
2.8.3	Types of Visions.....	28
2.9	Unit in the Field of Sound.....	28
2.10	Units in the Field of Ionizing Radiations	29
2.11	SI Units in the Framework of General Relativity	29
	References.....	29
3	Various Systems of Units.....	31
3.1	Introduction	31
3.2	Relations Between the Quantities.....	31
3.2.1	Derived Quantities by Definition	32
3.2.2	Derived Quantities by a Phenomenon	34
3.3	Three-Dimensional Systems of Units.....	36
3.3.1	Gauss System.....	36
3.3.2	CGS System	36
3.3.3	FPS System	37
3.4	Four-Dimensional Systems of Units	39
3.4.1	Giorgi System	39
3.4.2	Maxwell System.....	39
3.4.3	Hartree System	39
3.4.4	Units for Atomic and Molecular Measurements.....	40
3.4.5	McWeeny System	40
3.4.6	Ohm, Ampere, Second and Metre System	40
3.4.7	Force, Length and Time System.....	40
3.4.8	System in Terms of Universal Constants (G, H, E and Q)	41

3.4.9	System in Terms of Electric Charge, Flux, Length and Time	42
3.4.10	System in Terms of L, M, T and R	42
3.5	Derived Quantities in Terms of L, M, T and R: An Example	44
	References	45
4	Metre Convention and Evolution of Base Units	47
4.1	BIPM and Metre Convention	47
4.1.1	General Conference on Weights and Measures (CGPM)	47
4.1.2	International Committee for Weights and Measures (CIPM)	48
4.1.3	Consultative Committees	48
4.1.4	International Bureau of Weights and Measures (BIPM)	50
4.1.5	Linkages of Various Organs of Metre Convention	51
4.2	International System of Units (SI)	52
4.2.1	Base Units	53
4.3	Evolution of Base Units	53
4.3.1	Unit of Length	55
4.3.2	Unit of Mass	58
4.3.3	Unit of Time	60
4.3.4	Unit of Electric Current	61
4.3.5	Unit of Luminous Intensity	61
4.3.6	Unit of Temperature	62
4.3.7	Unit of Amount of Substance (Mole)	64
4.3.8	Dependence of Base Units	65
	References	65
5	Realization of Base Units	67
5.1	The Metre	67
5.1.1	Standard Radiations	68
5.2	The Kilogram	69
5.2.1	Method of Cleaning	69
5.2.2	Uncertainty in National Standards	71
5.3	The Second	72
5.4	The Ampere	72
5.4.1	Josephson and Klitzing Constants	73
5.4.2	Values of Josephson and Klitzing Constants	73
5.5	The Candela	73
5.6	The Kelvin	74
5.6.1	Triple Point of Water	74
5.6.2	Temperature Scales	75
5.6.3	ITS-90	75
5.7	The Mole	78
	References	79

6	Derived Quantities and Their Units	81
6.1	Derived Quantities	81
6.2	Units of Derived Quantities	81
6.3	SI Derived Units	82
6.3.1	Units Expressed in Terms of Base Units	82
6.3.2	Derived Units with Special Names	83
6.3.3	Derived Units Formed from the Derived Units with Special Names	83
6.3.4	Derived Quantities of Dimension 1	83
6.4	Units Outside the SI	89
6.4.1	Units Accepted for Use with the SI	89
6.4.2	Non-SI Units with Experimentally Obtained Values	89
6.4.3	Non-SI Units Used by Special Groups	90
6.4.4	Other Non-SI Units with Special Names	91
6.4.5	Other Non-SI Units Found in the Old Literature	93
	References	94
7	Expressing SI Units	95
7.1	Introduction	95
7.2	SI Prefixes	95
7.2.1	Rules for Using SI Prefixes	95
7.2.2	Prefix About the Kilogram	97
7.3	Writing of SI Unit Symbols	97
7.3.1	Unit Symbols and Their Combinations	97
7.3.2	Names of Units	98
7.3.3	Quantity Calculus	99
7.3.4	Stating Values of Quantities of Dimension 1	101
7.4	Expression of Numbers	103
7.4.1	Formatting Numbers, and the Decimal Marker	103
7.4.2	Expressing the Measurement Uncertainty	104
7.5	Advantages of SI Units	104
7.5.1	Harmonization of Units	104
7.5.2	Expressing the Values of μ_0 and ϵ_0 in Terms of SI Units	106
7.5.3	Expressing Electrostatic and Electromagnetic Quantities in SI Units	107
7.5.4	SI Units of Quantities in Magnetic Field	112
7.5.5	Homogenizing of Units of Energy in Heat	115
7.5.6	Coherent System	115
7.5.7	Well-Defined Units	116
	References	116
8	Future Definitions of SI Units	117
8.1	In Terms of Physical Constants	117
8.1.1	Basis of SI Units	117
8.2	From Single Source	118

8.2.1	In Terms of Hydrogen Atom.....	118
8.2.2	In Terms of Only One Standard (Frequency)	119
8.2.3	In Terms of Fundamental Constants Using Maxwell Equations.....	120
8.2.4	A Consistent Set of Fundamental Constants by BIPM	120
8.3	CIPM Recommendation 1 (CI-2005)	121
8.4	A Proposal to Redefine Kilogram, Ampere, Kelvin and Mole	122
8.4.1	Kilogram.....	122
8.4.2	Ampere	122
8.4.3	Kelvin	122
8.4.4	Mole	123
8.5	The Values of h , e , k and N_A	123
8.5.1	Observations	124
8.6	Practical Standards to Realize Kilogram	124
8.6.1	Other Methods of Redefining Kilogram	124
8.6.2	Conclusion in Regard to the Kilogram	125
8.6.3	Measurement Standards.....	125
	References.....	126
9	Scientists Associated with Units of Measurements.....	127
9.1	Scientists Associated with Base Units	127
9.1.1	Lord Kelvin.....	127
9.1.2	Anders Celsius	128
9.1.3	Andre Marie Ampere	129
9.2	Scientists Associated with Derived Units	130
9.2.1	Sir Isaac Newton	130
9.2.2	Heinrich Rudolf Hertz	131
9.2.3	Blaise Pascal.....	132
9.2.4	James Prescott Joule	133
9.2.5	James Watt.....	134
9.2.6	Charles Augustin Coulomb	135
9.2.7	Alessandro Volta	137
9.2.8	Michael Faraday.....	138
9.2.9	Wilhelm Eduard Weber	139
9.2.10	Nickola Tesla	140
9.2.11	Joseph Henry	141
9.2.12	Antoine Henri Becquerel	142
9.2.13	Louis Harold Gray	143
9.2.14	Rolf M. Sievert	144
9.2.15	Georg Simon Ohm	146
9.2.16	Werner von Siemens	148
9.3	Some Units Not Named After Any Scientist	149

Appendix A: National Physical laboratory	151
A.1 Metre	151
A.2 Kilogram	151
A.3 Second.....	152
A.4 Ampere	152
A.5 Kelvin	152
A.6 Candela.....	153
A.7 Mole	153
A.8 Radiation	153
References.....	153
Index	155
