I General Considerations

1 Basic Principles of Ultrasound	3	Beam Steering of the Color Window	15
Physical Principles of B-mode Ultrasound Scanning ..	3	Color Gain	15
Influence of the Ultrasound Frequency	3	Wall Filter	15
Generation of Ultrasound	3	Temporal Averaging	15
Piezoelectric Effect	3	The Color Flow Line Density	15
Pulse-Echo Technique	4	Summary: Guide for Doppler Parameter Setting	15
Physical Laws of Sound Propagation	4	Summary: Guide to Understanding an	
Spatial Resolution	5	Ultrasound Image	16
Transmit Focusing	5		
B-mode Image Acquisition; 2D Imaging	5	3 Practical Tips on Ultrasound Examination	
Postprocessing	6	Technique	17
Artifacts	6	Resolution and Penetration	17
		Sound Field Characteristics	17
		Gain and Time Gain Compensation	17
		Clinical Examination of Neck Levels	20
2 Physical Principles of Doppler and		Level IA: Submental Group	20
Color Doppler Ultrasound	10	Level IB: Submandibular Group	20
Doppler Effect	10	Levels IIA and IIB: Superior Jugular Group	22
Doppler Techniques	10	Level III: Middle Jugular Group	22
Spectral Doppler Method: Pulsed-wave Doppler	10	Level IV: Lower Jugular Group	22
Aliasing and Nyquist Frequency	10	Levels VA and VB: Posterior Triangle Group	26
Angle Correction and Accuracy of Angle Correction		Level VI: Anterior Compartment Group	26
(Spectral Doppler)	11	Examination Sequence	26
Doppler Sampling Locations	11		
Color-coded Duplex Sonography, Color Doppler	12		
Power Doppler	12		
Wall Filter	12		
Aliasing with Color Doppler	12		
Influence of Angle in Color Doppler	13		
Spectral Doppler Parameters for Optimizing Spectral			
Doppler Recording	13		
PRF (Pulse Repetition Frequency)	13		
D-Gain (Gain for Spectral Doppler)	14		
Wall Filter	14		
Color Flow and Power Doppler Parameters	14		
Optimal PRF (Pulse Repetition Frequency)			
Setting	14		

II Sonographic Anatomy and Pathology

5 Thyroid Gland	41	Summary: Thyroid Gland	54
Topographic Anatomy	41	Parathyroid Glands	54
Ultrasound Examination	41	Bibliography	57
Normal Sonographic Findings	41		
Ultrasound Pathology of Diffuse Thyroid			
Disease	43		
Congenital Malformations	43		
Goiter (Diffuse, Nodular)	43		
Thyroiditis	43		
The Thyroid Gland after Surgery	46		
Thyroid Nodules	46		
Cysts	46		
Thyroid Nodules	47		
		6 Neck Lymph Nodes	58
		Anatomy	58
		Classification of the Cervical Lymph Nodes	58
		Size and Three-dimensional Proportions	58
		Echogenic Hilum ("Hilar Sign") and	
		Perfusion Pattern	58
		Lymph Node Shape	58
		Lymph Node Borders	58
		Homogeneity of the Intranodal Echotexture	59
		Lymph Node Distribution	59

Inflammatory Changes	68	Acute Sialadenitis	122
Acute and Chronic Lymphadenitis	68	Salivary Gland Abscess	122
Epstein–Barr Virus/Mononucleosis	68	Chronic Sialadenitis	122
Abscess Formation in Lymph Nodes	68	Enlarged Lymph Nodes	123
Cervical Abscess	70	Salivary Gland Cysts	123
Mycobacteria other than Tuberculosis (MOTT)	70	Sialolithiasis and Obstructive Disease	123
Tuberculosis	70	Sialadenosis	123
Actinomycosis	74	Benign Tumors	140
Differential Diagnosis in Lymphadenopathy	74	Malignant Tumors	147
Benign Tumors	75	10 Facial Soft Tissues	152
Lipomas	75	Anatomy	152
Lymphangioma/Cystic Hygroma	75	Inflammatory Changes	152
Malignant Tumors and Metastases	78	Furuncles and Abscesses	152
Malignant Lymphomas	78	Mastoiditis	152
Sarcoma	80	Preauricular Sinus	152
Metastases	80	Benign Tumors	152
Melanoma Metastases	80	Malignant Tumors	153
Cancer of Unknown Primary (CUP) Syndrome	83	11 Paranasal Sinuses and Midface	166
Ultrasound in Oncological Follow-up	83	Anatomy	166
Regional Follow-up	84	Inflammatory Changes	166
Primary Tumor Resection without Neck		Sinusitis	166
Dissection	84	Benign Tumors	166
Primary Tumor Resection and Neck Dissection		Malignant Tumors	169
with/without Subsequent Radiotherapy	84	Trauma	170
Primary Radiochemotherapy with/without Subsequent		12 Larynx and Hypopharynx	173
Neck Dissection	84	Anatomy	173
Ultrasound-guided Needle Biopsies	89	Inflammatory Changes	173
Ultrasound-guided Injection	89	Benign Tumors	173
7 Extracranial Nerves	91	Malignant Tumors	173
Anatomy	91	13 Extracranial Vessels	182
Inflammatory Changes	91	Introduction	182
Benign Tumors	91	Anatomy	182
Paragangliomas	91	Carotid Arteries	183
Neuromas	91	Examination	183
Malignant Tumors	91	Normal Imaging	185
8 Floor of the Mouth and Oropharynx	98	Intima–Media Thickness	185
Anatomy	98	Atherosclerotic Disease	186
Inflammatory Changes	98	Plaque Imaging	186
Benign Tumors	98	Grade of Stenosis	186
Branchial Cysts	98	Carotid Artery Occlusion	186
Infected Branchial Cysts	99	Carotid Aneurysm	186
Thyroglossal Duct Cysts and Fistulas	99	Vertebral Arteries	197
Other Benign Tumors	99	Examination	197
Malignant Tumors	99	Atherosclerotic Disease	197
9 Salivary Glands	118	Subclavian Steal Syndrome	197
Anatomy	118	Jugular Veins	200
Parotid Gland	118	Examination	200
Submandibular Gland	118	Thrombosis	200
Sublingual Gland	118	References	201
Inflammatory Changes	122		

III Advanced Ultrasound Methods and Outlook

14	Image Processing Methods	205	Elastography	206
	Panoramic Imaging	205	Sonohistology	206
	Harmonic Imaging; Tissue Harmonic Imaging	205	Outlook	206
	Broadband Harmonic Imaging, Phase			
	Inversion Technique	205		
	Spatial Compounding	205		
	Three-dimensional Ultrasound Imaging: 3D Image, 4D		Further Reading	219
	Image	205	Subject Index	223
	Ultrasound Contrast Enhancement	206
