

Table of Contents – Part II

Workshop on e-Heritage

Historical Document Binarization Based on Phase Information of Images	1
<i>Hossein Ziaei Nafchi, Reza Farrahi Moghaddam, and Mohamed Cheriet</i>	
Can Modern Technologies Defeat Nazi Censorship?	13
<i>Simone Pentzien, Ira Rabin, Oliver Hahn, Jörg Krüger, Florian Kleber, Fabian Hollaus, Markus Diem, and Robert Sablatnig</i>	
Coarse-to-Fine Correspondence Search for Classifying Ancient Coins ...	25
<i>Sebastian Zambanini and Martin Kampel</i>	
Archiving Mural Paintings Using an Ontology Based Approach	37
<i>Anupama Mallik, Santanu Chaudhury, Shipra Madan, T.B. Dinesh, and Uma V. Chandru</i>	
Robust Image Deblurring Using Hyper Laplacian Model	49
<i>Yuquan Xu, Xiyuan Hu, and Silong Peng</i>	
SVD Based Automatic Detection of Target Regions for Image Inpainting	61
<i>Milind G. Padalkar, Mukesh A. Zaveri, and Manjunath V. Joshi</i>	
Presentation of Japanese Cultural Event Using Virtual Reality.....	72
<i>Liang Li, Woong Choi, Kozaburo Hachimura, Takanobu Nishiura, and Keiji Yano</i>	
High-Resolution and Multi-spectral Capturing for Digital Archiving of Large 3D Woven Cultural Artifacts	83
<i>Wataru Wakita, Masaru Tsuchida, Shiro Tanaka, Takahito Kawanishi, Kunio Kashino, Junji Yamato, and Hiromi T. Tanaka</i>	

ACCV Workshop on Color Depth Fusion in Computer Vision

Exploring High-Level Plane Primitives for Indoor 3D Reconstruction with a Hand-held RGB-D Camera.....	94
<i>Mingsong Dou, Li Guan, Jan-Michael Frahm, and Henry Fuchs</i>	

A Fusion Framework of Stereo Vision and Kinect for High-Quality Dense Depth Maps	109
<i>Yucheng Wang and Yunde Jia</i>	
Robust Fall Detection by Combining 3D Data and Fuzzy Logic	121
<i>Rainer Planinc and Martin Kampel</i>	
KinectAvatar: Fully Automatic Body Capture Using a Single Kinect ...	133
<i>Yan Cui, Will Chang, Tobias Nöll, and Didier Stricker</i>	
Essential Body-Joint and Atomic Action Detection for Human Activity Recognition Using Longest Common Subsequence Algorithm	148
<i>Sou-Young Jin and Ho-Jin Choi</i>	
Exploiting Depth and Intensity Information for Head Pose Estimation with Random Forests and Tensor Models	160
<i>Sertan Kaymak and Ioannis Patras</i>	
Dynamic Hand Shape Manifold Embedding and Tracking from Depth Maps	171
<i>Chan-Su Lee, Sung Yong Chun, and Shin Won Park</i>	
View-Invariant Object Detection by Matching 3D Contours	183
<i>Tianyang Ma, Meng Yi, and Longin Jan Latecki</i>	
Human Detection with Occlusion Handling by Over-Segmentation and Clustering on Foreground Regions	197
<i>Li Wang, Kap Luk Chan, and Gang Wang</i>	
Spin Image Revisited: Fast Candidate Selection Using Outlier Forest Search	209
<i>Young-Woon Cha, Hwasup Lim, Seong-Oh Lee, Hyoung-Gon Kim, and Sang Chul Ahn</i>	
MRF Guided Anisotropic Depth Diffusion for Kinect Range Image Enhancement	223
<i>Karthik Mahesh Varadarajan and Markus Vincze</i>	
 Workshop on Face Analysis: The Intersection of Computer Vision and Human Perception	
A Priori-Driven PCA	236
<i>Carlos Thomaz, Gilson Giralaldi, Joaquim Costa, and Duncan Gillies</i>	
The Face Speaks: Contextual and Temporal Sensitivity to Backchannel Responses	248
<i>Andrew J. Aubrey, Douglas W. Cunningham, David Marshall, Paul L. Rosin, AhYoung Shin, and Christian Wallraven</i>	

Virtual View Generation Using Clustering Based Local View Transition Model	260
<i>Xi Li, Tomokazu Takahashi, Daisuke Deguchi, Ichiro Ide, and Hiroshi Murase</i>	
3D Facial Expression Synthesis from a Single Image Using a Model Set	272
<i>Zhixin Shu, Lei Huang, and Changping Liu</i>	
Face Hallucination on Personal Photo Albums	284
<i>Yuan Ren Loke, Ping Tan, and Ashraf A. Kassim</i>	
Techniques for Mimicry and Identity Blending Using Morph Space PCA	296
<i>Fintan Nagle, Harry Griffin, Alan Johnston, and Peter McOwan</i>	
Facial and Vocal Cues in Perceptions of Trustworthiness	308
<i>Elena Tsankova, Andrew J. Aubrey, Eva Krumhuber, Guido Möllering, Arvid Kappas, David Marshall, and Paul L. Rosin</i>	
ACCV Workshop on Detection and Tracking in Challenging Environments (DTCE)	
Disagreement-Based Multi-system Tracking	320
<i>Quannan Li, Xinggang Wang, Wei Wang, Yuan Jiang, Zhi-Hua Zhou, and Zhuowen Tu</i>	
Monocular Pedestrian Tracking from a Moving Vehicle	335
<i>Zipei Fan, Zeliang Wang, Jinshi Cui, Franck Davoine, Huijing Zhao, and Hongbin Zha</i>	
Tracking the Untrackable : How to Track When Your Object Is Featureless	347
<i>Karel Lebeda, Jiri Matas, and Richard Bowden</i>	
A Robust Particle Tracker via Markov Chain Monte Carlo Posterior Sampling	360
<i>Fasheng Wang, Mingyu Lu, and Liran Shen</i>	
A Framework for Inter-camera Association of Multi-target Trajectories by Invariant Target Models	372
<i>Shahar Daliyot and Nathan S. Netanyahu</i>	
Colour Descriptors for Tracking in Spatial Augmented Reality	387
<i>Thijs Kooi, Francois de Sorbier, and Hideo Saito</i>	
Covariance Descriptor Multiple Object Tracking and Re-identification with Colorspace Evaluation	400
<i>Andrés Romero, Michèle Gouiffés, and Lionel Lacassagne</i>	

Iterative Hypothesis Testing for Multi-object Tracking with Noisy/Missing Appearance Features	412
<i>Amit Kumar K.C., Damien Delannay, Laurent Jacques, and Christophe De Vleeschouwer</i>	
Novel Adaptive Eye Detection and Tracking for Challenging Lighting Conditions	427
<i>Mahdi Rezaei and Reinhard Klette</i>	
Obstacles Extraction Using a Moving Camera	441
<i>Shaohua Qian, Joo Kooi Tan, Hyoungeop Kim, Seiji Ishikawa, and Takashi Morie</i>	
Scene Text Detection and Tracking for a Camera-Equipped Wearable Reading Assistant for the Blind	454
<i>Faustin Pégeot and Hideaki Goto</i>	
Object Tracking across Non-overlapping Cameras Using Adaptive Models	464
<i>Xiaotang Chen, Kaiqi Huang, and Tieniu Tan</i>	
Combining Fast Extracted Edge Descriptors and Feature Sharing for Rapid Object Detection	478
<i>Yali Li, Fei He, Wenhao Lu, and Shengjin Wang</i>	
Motion Segmentation by Velocity Clustering with Estimation of Subspace Dimension	491
<i>Liangjing Ding, Adrian Barbu, and Anke Meyer-Baese</i>	
International Workshop on Intelligent Mobile Vision (IMV)	
Beyond Spatial Pyramid Matching: Spatial Soft Voting for Image Classification	506
<i>Toshihiko Yamasaki and Tsuhan Chen</i>	
Efficient Geometric Re-ranking for Mobile Visual Search	520
<i>Junwu Luo and Bo Lang</i>	
Intelligent Photographing Interface with On-Device Aesthetic Quality Assessment	533
<i>Kuo-Yen Lo, Keng-Hao Liu, and Chu-Song Chen</i>	
Camera Pose Estimation of a Smartphone at a Field without Interest Points	545
<i>Ruiko Miyano, Takuya Inoue, Takuya Minagawa, Yuko Uematsu, and Hideo Saito</i>	

Hierarchical Scan-Line Dynamic Programming for Optical Flow Using Semi-global Matching	556
<i>Simon Hermann and Reinhard Klette</i>	
Novel Multi-view Synthesis from a Stereo Image Pair for 3D Display on Mobile Phone	568
<i>Chen-Hao Wei, Chen-Kuo Chiang, Yu-Wei Sun, Mei-Huei Lin, and Shang-Hong Lai</i>	
An Accurate Method for Line Detection and Manhattan Frame Estimation	580
<i>Ron Tal and James H. Elder</i>	
Hierarchical Stereo Matching Based on Image Bit-Plane Slicing	594
<i>Huei-Yung Lin and Pin-Zhi Lin</i>	
Author Index	607

Table of Contents – Part I

International Workshop on Computer Vision with Local Binary Pattern Variants

Noise Resistant Gradient Calculation and Edge Detection Using Local Binary Patterns	1
<i>Michael Teutsch and Jürgen Beyerer</i>	
Rotation Invariant Co-occurrence among Adjacent LBPs	15
<i>Ryusuke Nosaka, Chendra Hadi Suryanto, and Kazuhiro Fukui</i>	
3D LBP-Based Rotationally Invariant Region Description	26
<i>Jyotirmoy Banerjee, Adriaan Moelker, Wiro J. Niessen, and Theo van Walsum</i>	
Dynamic Texture Synthesis in Space with a Spatio-temporal Descriptor	38
<i>Rocio A. Lizarraga-Morales, Yimo Guo, Guoying Zhao, and Matti Pietikäinen</i>	
Adaptive Kernel Size Selection for Correntropy Based Metric	50
<i>Ying Tan, Yuchun Fang, Yang Li, and Wang Dai</i>	
Vitality Assessment of Boar Sperm Using an Adaptive LBP Based on Oriented Deviation	61
<i>Oscar García-Olalla, Enrique Alegre, Laura Fernández-Robles, and María Teresa García-Ordás</i>	
Background Subtraction Based on Multi-channel SILTP	73
<i>Fan Ma and Nong Sang</i>	
Elliptical Local Binary Patterns for Face Recognition	85
<i>Huu-Tuan Nguyen and Alice Caplier</i>	
Block LBP Displacement Based Local Matching Approach for Human Face Recognition	97
<i>Liang Chen and Ling Yan</i>	
Face Recognition with Learned Local Curvelet Patterns and 2-Directional L1-Norm Based 2DPCA	109
<i>Wei Zhou and Sei-ichiro Kamata</i>	
LBP-TOP Based Countermeasure against Face Spoofing Attacks	121
<i>Tiago de Freitas Pereira, André Anjos, José Mario De Martino, and Sébastien Marcel</i>	

An Efficient LBP-Based Descriptor for Facial Depth Images Applied to Gender Recognition Using RGB-D Face Data	133
<i>Tri Huynh, Rui Min, and Jean-Luc Dugelay</i>	
Face Spoofing Detection Using Dynamic Texture	146
<i>Jukka Komulainen, Abdenour Hadid, and Matti Pietikäinen</i>	
Workshop on Computational Photography and Low-Level Vision	
Class-Specified Segmentation with Multi-scale Superpixels	158
<i>Han Liu, Yanyun Qu, Yang Wu, and Hanzi Wang</i>	
A Flexible Auto White Balance Based on Histogram Overlap	170
<i>Tao Jiang, Duong Nguyen, and K.-D. Kuhnert</i>	
Region Segmentation and Object Extraction Based on Virtual Edge and Global Features	182
<i>Fumihiko Mori and Terunori Mori</i>	
Adaptive Sampling for Low Latency Vision Processing	194
<i>David Gibson, Henk Muller, Neill Campbell, and David Bull</i>	
Colorimetric Correction for Stereoscopic Camera Arrays	206
<i>Clyde Mouffranc and Vincent Nozick</i>	
Camera Calibration Using Vertical Lines	218
<i>Jing Kong, Xianghua Ying, Songtao Pu, Yongbo Hou, Sheng Guan, Ganwen Wang, and Hongbin Zha</i>	
Vehicle Localization Using Omnidirectional Camera with GPS Supporting in Wide Urban Area	230
<i>My-Ha Le, Van-Dung Hoang, Andrey Vavilin, and Kang-Hyun Jo</i>	
Workshop on Developer-Centred Computer Vision	
Efficient Development of User-Defined Image Recognition Systems	242
<i>Julia Moehrmann and Gunther Heidemann</i>	
Transforming Cluster-Based Segmentation for Use in OpenVL by Mainstream Developers	254
<i>Daesik Jang, Gregor Miller, and Sidney Fels</i>	
Efficient GPU Implementation of the Integral Histogram	266
<i>Mahdieh Poostchi, Kannappan Palaniappan, Filiz Bunyak, Michela Becchi, and Guna Seetharaman</i>	

Play Estimation with Motions and Textures in Space-Time Map Description	279
<i>Kyota Aoki and Takuro Fukiba</i>	
 Workshop on Background Models Challenge (BMC)	
A Benchmark Dataset for Outdoor Foreground/Background Extraction	291
<i>Antoine Vacavant, Thierry Chateau, Alexis Wilhelm, and Laurent Lequière</i>	
One-Class Background Model	301
<i>Assaf Glazer, Michael Lindenbaum, and Shaul Markovitch</i>	
Illumination Invariant Background Model Using Mixture of Gaussians and SURF Features	308
<i>Munir Shah, Jeremiah Deng, and Brendon Woodford</i>	
Foreground Detection via Robust Low Rank Matrix Decomposition Including Spatio-Temporal Constraint	315
<i>Charles Guyon, Thierry Bouwmans, and El-Hadi Zahzah</i>	
Temporal Saliency for Fast Motion Detection	321
<i>Hamed Rezazadegan Tavakoli, Esa Rahtu, and Janne Heikkilä</i>	
Background Model Based on Statistical Local Difference Pattern	327
<i>Satoshi Yoshinaga, Atsushi Shimada, Hajime Nagahara, and Rin-ichiro Taniguchi</i>	
 Author Index	 333
