## Part I Whole-Plant Regulation

<b>1 Oxygen Transport in Waterlogged Plants</b>	<b>3</b>
Lars H. Wegner	
1.1 Introduction	4
1.2 O <sub>2</sub> Transport in Plants: Some Basic Physics, and Modelling of O <sub>2</sub> Diffusion	5
1.3 A Survey of Methods to Study O <sub>2</sub> Transport and Related Parameters in Higher Plants	7
1.4 Anatomical Adaptations to Flooding Stress: Barriers to Radial Oxygen Loss	10
1.5 Anatomical Adaptations to Flooding Stress: Formation of Aerenchyma	11
1.6 Mechanisms of O <sub>2</sub> Transport in Plants	13
1.7 O <sub>2</sub> Transport in Plants: Ecological Implications	18
1.8 Open Questions and Directions of Further Research	18
References	19
<b>2 Waterlogging and Plant Nutrient Uptake</b>	<b>23</b>
J. Theo M. Elzenga and Hans van Veen	
2.1 Introduction	23
2.2 Effects of Hypoxia on Nutrient Uptake	26
2.2.1 Physiological Effects of Hypoxia Change Root Elongation Rate, $k$ , and Maximal Nutrient Uptake Rate, $I_{\max}$	26
2.2.2 Waterlogging Leads to Changes in the Availability, $C_{li}$ , and the Effective Diffusion Coefficient, $D_e$ , of Some of the Nutrients in the Soil	28
2.2.3 In Waterlogged Conditions, Some Plant Species Show More Root Hair Development, Longer and Thinner	

Roots and Increased Levels of Infection With Mycorrhizal Fungi – Effectively Increasing $k$ .....	29
2.2.4 Waterlogging Decrease Evaporation and Bulk Water Flow, $V_o$ .....	30
2.2.5 In Response to Waterlogging the Kinetics of Root Transport Systems, $K_m$ and $I_{max}$ , Can be Modified .....	31
2.3 Summary and Concluding Remarks .....	31
References .....	32
<b>3 Strategies for Adaptation to Waterlogging and Hypoxia in Nitrogen Fixing Nodules of Legumes .....</b>	<b>37</b>
Daniel M. Roberts, Won Gyu Choi, and Jin Ha Hwang	
3.1 Introduction: The Oxygen Diffusion Barrier in Nodules .....	38
3.1.1 Nodule Morphology and the Gas Diffusion Barrier .....	38
3.1.2 Modulation of the Gas Diffusion Barrier .....	40
3.1.3 Control of the Gas Diffusion Barrier in Response to Sub-Ambient $O_2$ and Flooding .....	40
3.1.4 Mechanism of Regulation of the Gas Diffusion Barrier in Response to $pO_2$ .....	41
3.2 Developmental and Morphological Adaptations of Nitrogen-Fixing Nodules to Low Oxygen Stress .....	43
3.2.1 Secondary Aerenchyma Formation .....	43
3.2.2 The Inner Cortex and Infected Zone .....	44
3.2.3 Influence of Adaptive Changes on Nitrogen Fixation Under Altered Rhizosphere $pO_2$ Conditions .....	45
3.3 Strategies of Adaptation: Flood-Tolerant Legumes and Oxygen Diffusion .....	46
3.3.1 Tropical Wetland Legumes .....	46
3.3.2 <i>Lotus uliginosus</i> : A Temperate Wetland Legume .....	49
3.4 Strategies of Adaptation: Alternate Nodulation Pathways for Flooding Tolerant Legumes .....	50
3.4.1 Intercellular-Based Mechanism of Nodulation: The Lateral Root Boundary Pathway .....	50
3.4.2 <i>Sesbania rostrata</i> : A Model Legume for Aquatic Nodulation .....	51
3.5 Summary and Concluding Remarks .....	53
References .....	55
<b>4 Oxygen Transport in the Sapwood of Trees .....</b>	<b>61</b>
Sergio Mugnai and Stefano Mancuso	
4.1 Brief Anatomy of a Woody Stem .....	62
4.2 Atmosphere Inside a Stem: Gas Composition and its Effects on Respiration .....	63
4.3 Gas Transport and Diffusion .....	66

4.4 Radial and Axial Oxygen Transport to Sapwood .....	68
4.5 Sapwood Respiration .....	70
References .....	73

## Part II Intracellular Signalling

<b>5 pH Signaling During Anoxia .....</b>	<b>79</b>
Hubert H. Felle	
5.1 Introduction .....	79
5.2 pH, Signal and Regulator .....	81
5.2.1 pH as Systemic Signal .....	82
5.2.2 The Nature of pH Transmission .....	83
5.2.3 What is the Information? .....	83
5.3 Anoxic Energy Crisis and pH Regulation .....	85
5.3.1 The Davis-Roberts-Hypothesis: Aspects of pH Signaling ....	85
5.3.2 Cytoplasmic Acidification, ATP and Membrane Potential .....	86
5.3.3 Cytoplasmic pH (Change), An Error Signal? .....	87
5.4 pH Interactions Between the (Major) Compartments During Anoxia .....	88
5.4.1 The pH Trans-Tonoplast pH Gradient .....	88
5.4.2 Cytoplasm and Apoplast .....	90
5.4.3 The Apoplast Under Anoxia .....	90
5.5 Anoxia Tolerance and pH .....	91
5.5.1 pH as a Stress Signal – Avoidance of Cytoplasmic Acidosis .....	92
5.6 pH as Signal for Gene Activation .....	93
5.7 pH Signaling and Oxygen Sensing .....	94
5.8 Conclusions .....	94
References .....	95
 <b>6 Programmed Cell Death and Aerenchyma Formation Under Hypoxia .....</b>	 <b>99</b>
Kurt V. Fagerstedt	
6.1 Introduction .....	100
6.2 Description of Aerenchyma Formation: Induced and Constitutive .....	102
6.3 Evidence for PCD During Lysigenous Aerenchyma Formation ....	103
6.4 Description of the sequence of events leading to induced lysigenous aerenchyma formation .....	104
6.4.1 Stimuli for Lysigenous Aerenchyma Development (Low Oxygen, Cytosolic Free Calcium, Ethylene, P, N, and S Starvation, and Mechanical Impedance) .....	105
6.4.2 PCD and the Clearing of the Cell Debris .....	110

6.4.3 What Determines the Architecture of Aerenchyma? – Targeting and Restricting PCD .....	112
6.5 Future Prospects .....	113
References .....	113
<b>7 Oxygen Deprivation, Metabolic Adaptations and Oxidative Stress .....</b>	<b>119</b>
Olga Blokhina and Kurt V. Fagerstedt	
7.1 Introduction .....	120
7.2 Anoxia: Metabolic Events Relevant for ROS Formation .....	121
7.2.1 “Classic” Metabolic Changes Under Oxygen Deprivation Related to ROS Formation .....	121
7.2.2 Changes in Lipid Composition and Role of Free Fatty Acids Under Stress .....	124
7.2.3 Modification of Lipids: LP .....	125
7.3 ROS and RNS Chemistry Overview and Sources of Formation Under Lack of Oxygen .....	126
7.3.1 Reactive Oxygen Species .....	126
7.3.2 Reactive Nitrogen Species .....	127
7.3.3 Plant Mitochondria as ROS Producers: Relevance for Oxygen Deprivation Stress .....	129
7.4 O <sub>2</sub> Fluxes in Tissues and Factors Affecting O <sub>2</sub> Concentration In Vivo .....	131
7.5 Microarray Experiments in the Study of Hypoxia-Associated Oxidative Stress .....	132
7.6 Update on Antioxidant Protection .....	133
7.6.1 Low Molecular Weight Antioxidants .....	134
7.6.2 Enzymes Participating in Quenching ROS .....	136
7.7 Concluding Remarks .....	138
References .....	139

### **Part III Membrane Transporters in Waterlogging Tolerance**

<b>8 Root Water Transport Under Waterlogged Conditions and the Roles of Aquaporins .....</b>	<b>151</b>
Helen Bramley and Steve Tyerman	
8.1 Introduction .....	151
8.2 Variable Root Hydraulic Conductance (L <sub>r</sub> ) .....	152
8.3 Changes in Root Morphology and Anatomy .....	153
8.3.1 Root Death and Adventitious Roots .....	153
8.3.2 Barriers to Radial Flow .....	154
8.3.3 Varying the Root or Root Region Involved in Water Uptake .....	157
8.4 Volatile and Toxic Compounds in Anaerobic Soils .....	158

8.5 Water Permeability of Root Cells and Aquaporins .....	158
8.5.1 Plant Aquaporins .....	159
8.5.2 Responses at the Cell Level Affecting Water Permeability and Potential Mechanisms .....	161
8.5.3 Other Changes Under Oxygen Deficiency that Could Affect Water Transport .....	169
8.5.4 Transport of Other Molecules Besides Water Through MIPs Relevant to Flooding .....	170
8.6 Signalling .....	171
8.7 Conclusion and Future Perspectives .....	172
References .....	173
<b>9 Root Oxygen Deprivation and Leaf Biochemistry in Trees .....</b>	<b>181</b>
Laura Arru and Silvia Fornaciari	
9.1 Introduction .....	182
9.2 Root O <sub>2</sub> Deprivation .....	183
9.2.1 Root O <sub>2</sub> Deprivation: Effects on Leaves .....	185
9.3 The Role of ADH .....	185
9.4 Carbon Recovery .....	186
9.5 Differential mRNA Translation .....	188
9.6 Effects on Cell Metabolism .....	189
9.7 Conclusions .....	191
References .....	192
<b>10 Membrane Transporters and Waterlogging Tolerance .....</b>	<b>197</b>
Jiayin Pang and Sergey Shabala	
10.1 Introduction .....	198
10.2 Waterlogging and Plant Nutrient Acquisition .....	198
10.2.1 Root Ion Uptake .....	198
10.2.2 Transport Between Roots and Shoots .....	199
10.2.3 Ionic Mechanisms Mediating Xylem Loading .....	200
10.2.4 Control of Xylem Ion Loading Under Hypoxia .....	201
10.3 Oxygen Sensing in Mammalian Systems .....	201
10.3.1 Diversity and Functions of Ion Channels as Oxygen Sensors .....	201
10.3.2 Mechanisms of Hypoxic Channel Inhibition .....	203
10.3.3 The Molecular Mechanisms of Oxygen Sensing in Plant Systems Remain Elusive .....	203
10.4 Impact of Anoxia and Hypoxia on Membrane Transport Activity in Plant Cells .....	204
10.4.1 Oxygen Deficiency and Cell Energy Balance .....	204
10.4.2 H <sup>+</sup> and Ca <sup>2+</sup> Pumps .....	204
10.4.3 Ca <sup>2+</sup> -Permeable Channels .....	205
10.4.4 K <sup>+</sup> -Permeable Channels .....	206

10.5 Secondary Metabolites Toxicity and Membrane Transport Activity in Plant Cells .....	206
10.5.1 Waterlogging and Production of Secondary Metabolites .....	206
10.5.2 Secondary Metabolite Production and Plant Nutrient Acquisition .....	207
10.6 Secondary Metabolites and Activity of Key Membrane Transporters .....	208
10.6.1 Pumps .....	208
10.6.2 Carriers .....	209
10.6.3 Channels .....	209
10.7 Breeding for Waterlogging Tolerance by Targeting Key Membrane Transporters .....	211
10.7.1 General Trends in Breeding Plants for Waterlogging Tolerance .....	211
10.7.2 Improving Membrane Transporters Efficiency Under Hypoxic Conditions .....	211
10.7.3 Reducing Sensitivity to Toxic Secondary Metabolites .....	212
References .....	213
<b>11 Ion Transport in Aquatic Plants .....</b>	<b>221</b>
Olga Babourina and Zed Rengel	
11.1 Introduction .....	221
11.2 Morphological and Physiological Adaptations of Aquatic Plants .....	222
11.3 Ion Transport .....	224
11.3.1 Cation Transport Systems .....	228
11.3.2 Anion Transport Systems .....	230
11.4 Root Versus Leaf Uptake .....	230
11.5 Molecular Characterisation of Transporter Genes .....	232
11.6 The Relevance of Aquatic Plants to Terrestrial Plants in Regards to Waterlogging and Inundation Stresses .....	233
11.7 Conclusions .....	233
References .....	234
 <b>Part IV Agronomical and Environmental Aspects</b>	
<b>12 Genetic Variability and Determinism of Adaptation of Plants to Soil Waterlogging .....</b>	<b>241</b>
Julien Parelle, Erwin Dreyer, and Oliver Brendel	
12.1 Introduction .....	242
12.2 Diversity Among Populations: Adaptation to Water-Logged Soils? .....	246
12.3 Genetic Control of Traits Related to Hypoxia Tolerance .....	249

12.4 Genetic Determinism of Tolerance to Waterlogging and Identification of the Involved Genome Regions .....	250
12.4.1 Methodology of the Detection of QTL for Hypoxia Tolerance: Caution and Strategies .....	251
12.4.2 Major Loci Detected for Hypoxia Tolerance .....	256
12.5 Conclusions .....	260
References .....	260
<b>13 Improvement of Plant Waterlogging Tolerance .....</b>	<b>267</b>
Meixue Zhou	
13.1 Introduction .....	267
13.2 Genetic Resources of the Tolerance .....	268
13.3 Selection Criteria .....	271
13.4 Genetic Studies on Waterlogging Tolerance .....	273
13.5 Marker-Assisted Selection .....	275
13.5.1 QTL Controlling Waterlogging Tolerance .....	275
13.5.2 Accurate Phenotyping is Crucial in Identifying QTLs for Waterlogging Tolerance .....	278
References .....	281
