1	Bottom-up Organisation of Metallic Nanoparticles	1
	Alastair Cunningham and Thomas Bürgi	
1.1	Introduction	2
1.1.1	Bottom-up vs. Top-down	2
1.1.2	Metallic Nanoparticles and Their Applications	3
1.1.3	Coupling Properties of Metallic Nanoparticles	6
1.1.4	Bottom-up Organisation of Metallic Nanoparticles	8
1.2	Manipulation of Metallic Nanoparticles at the Nanoscale	12
1.2.1	Gold Nanoparticle Preparation	13
1.2.2	Substrate Functionalisation	14
1.2.3	Fabrication of Gold Nanoparticle Arrays	15
1.2.4	Controlling Nanoparticle Density	16
1.2.5	Extending into Third Dimension—The Bulk-Assembly of Polyelectrolyte Layers and Multiple Gold Nanoparticle Arrays	20
1.2.6	Observation of Plasmon Splitting	22
1.2.7	Asymmetric Arrays of Metallic Nanoparticles	23
1.2.8	Core–Shell Nanoclusters	27
1.3	Conclusions	31
	References	33
2	Amorphous Metamaterials and Potential Nanophotonics Applications	39
	Filiberto Bilotti and Sergei Tretyakov	
2.1	Introduction	39
2.2	Cloaking Devices	40
2.2.1	General Concepts	40
2.2.2	Cloak Design Using Metamaterials	41
2.2.3	Cloaking Applications	49
2.3	Beaming and Spatial-Filtering Devices	55
2.3.1	General Concepts	55

2.3.2	Spatial Filters and Beaming Devices Obtained Using Amorphous Metamaterials	57
2.4	Superlens Devices	60
2.4.1	Superlenses Based on Two Grids of Plasmonic Nanoparticles	60
2.4.2	Near Field Enhancement and Focusing Using Multilayer Arrays of Plasmonic Nanoparticles	62
2.4.3	Real-Time Sub-wavelength Imaging Using a Single Grid of Plasmonic Nanoparticles	63
2.5	Conclusions	65
	References	65
3	Homogenization of Amorphous Media	67
	Ari Sihvola and Henrik Wallén	
3.1	Introduction	67
3.2	Mixing Rules	69
3.2.1	Maxwell Garnett Formula	69
3.2.2	Hashin–Shtrikman Bounds	70
3.2.3	Bruggeman Formula	70
3.2.4	Lord Rayleigh Formula and Extensions	71
3.2.5	Examples	71
3.2.6	Geometrical Structure and Anisotropy	74
3.2.7	Two-Dimensional (2D) Mixtures	74
3.3	Limitations and Applicability	75
3.4	Order and Disorder	78
3.4.1	Ordered Mixtures	78
3.4.2	Effect of Disorder	79
3.4.3	Disorder and Plasmonics	81
3.5	Inclusion Shape Effects	82
3.6	Dispersion	83
3.6.1	Effects of Mixing on Dispersion	83
3.6.2	Example of Mixtures Containing Drude Components	85
3.7	Conclusions	85
	References	86
4	Multipole Analysis of Self-assembled Metamaterials	89
	Stefan Mühlig and Carsten Rockstuhl	
4.1	Introduction	89
4.2	Periodic Metamaterials	94
4.3	Amorphous Metamaterials	96
4.3.1	Optical Response of Single Meta-atoms	97
4.3.2	Multipole Analysis of Meta-atoms	100
4.3.3	Exclusive Meta-atom Geometries	104
4.3.4	Light Propagation in Amorphous Metamaterials	110
4.4	Conclusion	113
