

Table of Contents

Trajectory-Based Dynamic Programming	1
<i>Christopher G. Atkeson, Chenggang Liu</i>	
Use of Compliant Actuators in Prosthetic Feet and the Design of the AMP-Foot 2.0	17
<i>Pierre Cherelle, Victor Grosu, Michael Van Damme, Bram Vanderborght, Dirk Lefeber</i>	
Modeling and Optimization of Human Walking	31
<i>Martin Felis, Katja Mombaur</i>	
Motion Generation with Geodesic Paths on Learnt Skill Manifolds	43
<i>Ioannis Havoutis, Subramanian Ramamoorthy</i>	
Online CPG-Based Gait Monitoring and Optimal Control of the Ankle Joint for Assisted Walking in Hemiplegic Subjects	53
<i>Rodolphe Héliot, Katja Mombaur, Christine Azevedo-Coste</i>	
The Combined Role of Motion-Related Cues and Upper Body Posture for the Expression of Emotions during Human Walking	71
<i>Halim Hicheur, Hideki Kadone, Julie Grèzes, Alain Berthoz</i>	
Whole Body Motion Control Framework for Arbitrarily and Simultaneously Assigned Upper-Body Tasks and Walking Motion	87
<i>Doik Kim, Bum-Jae You, Sang-Rok Oh</i>	
Structure Preserving Optimal Control of Three-Dimensional Compass Gait	99
<i>Sigrid Leyendecker, David Pekarek, Jerrold E. Marsden</i>	
Quasi-straightened Knee Walking for the Humanoid Robot	117
<i>Zhibin Li, Bram Vanderborght, Nikos G. Tsarakakis, Darwin G. Caldwell</i>	

Modeling and Control of Dynamically Walking Bipedal Robots	131
<i>Tobias Luksch, Karsten Berns</i>	
In Humanoid Robots, as in Humans, Bipedal Standing Should Come before Bipedal Walking: Implementing the Functional Reach Test	145
<i>Vishwanathan Mohan, Jacopo Zenzeri, Giorgio Metta, Pietro Morasso</i>	
A New Optimization Criterion Introducing the Muscle Stretch Velocity in the Muscular Redundancy Problem: A First Step into the Modeling of Spastic Muscle	155
<i>F. Moissenet, D. Pradon, N. Lampire, R. Dumas, L. Chèze</i>	
Forward and Inverse Optimal Control of Bipedal Running	165
<i>Katja Mombaur, Anne-Hélène Olivier, Armel Crétual</i>	
Synthesizing Human-Like Walking in Constrained Environments	181
<i>Jia Pan, Liangjun Zhang, Dinesh Manocha</i>	
Locomotion Synthesis for Digital Actors	187
<i>Julien Pettré</i>	
Whole-Body Motion Synthesis with LQP-Based Controller – Application to iCub	199
<i>Joseph Salini, Sébastien Barthélemy, Philippe Bidaud, Vincent Padois</i>	
Walking and Running: How Leg Compliance Shapes the Way We Move .	211
<i>Andre Seyfarth, Susanne Lipfert, Jürgen Rummel, Moritz Maus, Daniel Maykranz</i>	
Modeling and Simulation of Walking with a Mobile Gait Rehabilitation System Using Markerless Motion Data	223
<i>S. Slavnić, A. Leu, D. Ristić-Durrant, A. Graeser</i>	
Optimization and Imitation Problems for Humanoid Robots	233
<i>Wael Suleiman, Eiichi Yoshida, Fumio Kanehiro, Jean-Paul Laumond, André Monin</i>	
Motor Control and Spinal Pattern Generators in Humans	249
<i>Heiko Wagner, Arne Wulf, Sook-Yee Chong, Thomas Wulf</i>	
Modeling Human-Like Joint Behavior with Mechanical and Active Stiffness	261
<i>Thomas Wahl, Karsten Berns</i>	
Geometry and Biomechanics for Locomotion Synthesis and Control	273
<i>Katsu Yamane</i>	
Author Index	289
