Foreword to the English translation	ix
Introduction	xi
List of figures	xiii
List of tables	xvii
Chapter 1. Riemann surfaces	1
§1.1. Riemann surfaces	1
§1.2. Homotopy of paths, fundamental groups	9
§1.3. Coverings	13
§1.4. Analytic continuation	24
§1.5. Branched meromorphic continuation	29
§1.6. The Riemann surface of an algebraic function	33
§1.7. Puiseux expansion	40
§1.8. The Riemann sphere	41
Chapter 2. Holomorphic functions of several variables	43
§2.1. Holomorphic functions of several variables	43
§2.2. Holomorphic maps and the implicit function theorem	57
§2.3. Local rings of holomorphic functions	60
§2.4. The Weierstrass preparation theorem	63
§2.5. Analytic sets	74
§2.6. Analytic set germs	76
§2.7. Regular and singular points of analytic sets	84

§2.8. Map germs and homomorphisms of analytic algebras	89
§2.9. The generalized Weierstrass preparation theorem	96
§2.10. The dimension of an analytic set germ	101
§2.11. Elimination theory for analytic sets	109
Chapter 3. Isolated singularities of holomorphic functions	113
§3.1. Differentiable manifolds	113
§3.2. Tangent bundles and vector fields	119
§3.3. Transversality	125
§3.4. Lie groups	127
§3.5. Complex manifolds	134
§3.6. Isolated critical points	140
§3.7. The universal unfolding	144
§3.8. Morsifications	149
§3.9. Finitely determined function germs	158
§3.10. Classification of simple singularities	165
§3.11. Real morsifications of the simple curve singularities	171
Chapter 4. Fundamentals of differential topology	181
§4.1. Differentiable manifolds with boundary	181
§4.2. Riemannian metric and orientation	183
§4.3. The Ehresmann fibration theorem	186
§4.4. The holonomy group of a differentiable fiber bundle	189
§4.5. Singular homology groups	194
§4.6. Intersection numbers	200
§4.7. Linking numbers	209
§4.8. The braid group	211
§4.9. The homotopy sequence of a differentiable fiber bundle	214
Chapter 5. Topology of singularities	223
§5.1. Monodromy and variation	223
§5.2. Monodromy group and vanishing cycles	226
§5.3. The Picard-Lefschetz theorem	229
§5.4. The Milnor fibration	238
§5.5. Intersection matrix and Coxeter-Dynkin diagram	249
§5.6. Classical monodromy, variation, and the Seifert form	252
§5.7. The action of the braid group	259

§5.8. Monodromy group and vanishing lattice	269
§5.9. Deformation	277
§5.10. Polar curves and Coxeter-Dynkin diagrams	283
§5.11. Unimodal singularities	292
§5.12. The monodromy groups of the isolated hypersurface singularities	298
Bibliography	303
Index	307
