
Contents

Part I Molecular Imaging Theory and System..... 1

1 Introduction..... 3

1.1 Development of Molecular Imaging..... 3

1.2 Advantages of Molecular Imaging..... 5

1.3 Basic Principles of Molecular Imaging Modalities..... 7

1.4 Generous Development of Molecular Imaging Probe.....10

1.5 Application Involving Molecular Imaging.....11

References.....12

2 Molecular Optical Simulation Environment.....15

2.1 Introduction.....15

2.2 Review of the Current Simulation Platform.....16

2.3 Introduction of MOSE.....18

2.4 Introduction of the Algorithm.....27

2.5 Validation of the Simulation Experiment Results.....40

References.....45

3 Diffuse Optical Tomography.....47

3.1 Outline.....47

3.2 Medical Background and Optical Properties of Human Tissue.....77

3.3 Photon Transport Model in Tissues and Image Reconstruction Algorithms.....93

3.4 Simulative and Experimental Tomographic and Topographic Imaging on a Phantom.....136

References.....176

4 Fluorescence Molecular Tomography.....185

4.1 Overview.....185

4.2 Fundamental Principles in Fluorescence Molecular Tomography.....186

4.3 Experimental System in Fluorescence Molecular Tomography.....189

4.4 The Reconstruction Algorithms in Fluorescence Molecular

Tomography	191
4.5 Experiment in Fluorescence Molecular Tomography	201
References	211
5 Bioluminescence Tomography	217
5.1 Introduction.....	217
5.2 The Forward Model for BLT.....	219
5.3 BLT Reconstruction Algorithms	221
5.4 Experiments and Applications	233
References	238
6 Positron Emission Tomography.....	241
6.1 Prologue	241
6.2 The Principle of PET	243
6.3 Positron Emission Tomography Scanner	246
6.4 Reconstruction Algorithms and Correction Techniques in PET.....	255
6.5 PET/CT Image Fusion	289
6.6 Experimental PET Imaging.....	296
References	303
7 Radioisotope Labeled Molecular Imaging in SPECT	313
7.1 Outline of Molecular Imaging in SPECT.....	313
7.2 Key Technologies of Animal Pinhole SPECT.....	319
References	330
8 MRI Facility-Based Molecular Imaging.....	333
8.1 Outline of the MRI Facility-Based Molecular Imaging	333
8.2 Main mMRI Contrasts	337
References	359
9 Other Molecular Imaging Technology	361
9.1 Photoacoustic Tomography.....	361
9.2 Optical Coherence Tomography	367
9.3 Confocal Laser Scanning Microscopy	372
9.4 Ultrasound in Molecular Imaging	375
9.5 X-Ray Micro-Computed Tomography	378
References	382
10 Optical Multi-Modality Molecular Imaging	389
10.1 Fusion of BLT and Nicro-CT System	390
10.2 Fusion of DOT and BLT Systems.....	393
10.3 Multi-Modality Imaging of FMT and CT.....	395
10.4 Image Registration and Fusion Between SPECT and CT	400

References	410
11 Medical Image Processing and Analysis.....	415
11.1 Overview	415
11.2 Medical Image Segmentation	416
11.3 Medical Image Registration	423
11.4 New Techniques of Image Fusion	439
11.5 Medical Image Visualization	455
References	466
Part II Molecular Probes	471
12 Opportunities and Challenges of Radiolabeled Molecular Probes	473
12.1 Introduction	473
12.2 The Opportunities of Radiolabeled Molecular Probes	474
12.3 The Challenges of Radiolabeled Molecular Probes	476
12.4 Summary	480
References	480
13 Oligonucleotide Probes	483
13.1 Design Principle of Oligonucleotide Probes.....	483
13.2 Anti-Nuclease Modification of Oligonucleotide Probes	489
13.3 Delivery of Probes into Cells	491
References	494
14 Quantum Dots for Biological Imaging.....	501
14.1 QDs Based on CdTe	501
14.2 QDs Based on CdSe	502
14.3 QDs Based on CdSe/ZnS.....	503
14.4 QDs Based on CdSe/CdS/ZnS.....	503
14.5 QDs Based on InP/ZnS.....	505
14.6 QDs Based on CdHgTe	505
14.7 QDs Based on Lead Salts	506
14.8 Other QDs	506
References	508
15 RGD-Based Molecular Probes for Integrin $\alpha_v\beta_3$ Imaging.....	513
15.1 Introduction	513
15.2 Multi-Modality RGD Probes Targeting Integrin $\alpha_v\beta_3$	516
15.3 Dual Functional RGD Probes for Integrin $\alpha_v\beta_3$ Targeting	525
15.4 Optimization of RGD Probes	526
15.5 Conclusions and Future Perspectives	532

References	533
Part III Applications of Molecular Imaging	539
16 Basics of Molecular Biology	541
16.1 Introduction	541
16.2 Techniques of Molecular Biology	547
16.3 Cells and Viruses	552
16.4 Transcription.....	556
16.5 Transcription and Translation in Eukaryotes	559
16.6 Post-Transcriptional Events.....	568
16.7 DNA Replication and Recombination	573
16.8 DNA Damage and Repair	581
16.9 Translation.....	590
References	592
17 Molecular Imaging Techniques in Clinical Practice of Tumors.....	603
17.1 Application of Molecular Imaging Techniques in Tumor Diagnosis and Differentiation.....	603
17.2 Application of Molecular Imaging Techniques in the Clinical Staging of Malignancies	608
17.3 Application of Molecular Imaging Techniques in Lymph Nodes Evaluation.....	611
17.4 Application of Molecular Imaging Techniques in Tumor Therapeutic Monitoring and Efficacy Evaluation	616
17.5 Application of Molecular Imaging Techniques in Other Aspects of Cancer Therapy	619
17.6 Conclusions and Prospects	622
References	622
18 Using Molecular Imaging Techniques to Study Protein-Protein Interactions	633
18.1 The Yeast Two-Hybrid System	633
18.2 FRET	639
18.3 BRET.....	646
18.4 PCA	650
18.5 Concluding Remarks	653
References	654
19 Application of Molecular Imaging in Transgenic Animals.....	661
19.1 The Stem Cells	661
19.2 Molecular Imaging in Stem Cell Research for Heart Repair	662
19.3 Molecular Imaging in Stem Cell Research for Kidney Repair	665

19.4	Molecular Imaging in Stem Cell Research for Liver Repair	666
19.5	Molecular Imaging in Neural Stem Cell Research	667
19.6	Conclusion.....	668
	References	668
20	Molecular Imaging Methods in Diabetes-Related Studies.....	671
20.1	Molecular Imaging Applications in Diabetes-Related Fundamental Research	672
20.2	Molecular Imaging Assists Diabetic-Related Therapeutic Research ..	679
20.3	Recent Advances in Molecular Imaging	687
20.4	Concluding Remarks	689
	References	689
	Index.....	695
