

Contents

1	Introduction and Theoretical Background.	1
1.1	The Standard Model.	1
1.2	Scattering Amplitudes.	3
1.3	Electroweak Interactions.	3
1.4	Strong Interactions.	6
1.5	The Drell-Yan Process.	8
1.5.1	Factorisation.	8
1.5.2	Higher Order Corrections.	9
1.5.3	Monte Carlo Event Generators.	11
1.5.4	Drell-Yan Transverse Momentum Distribution.	13
1.6	Electroweak Diboson Production.	13
1.6.1	Previous Measurements.	14
	References.	15
2	Experimental Apparatus	17
2.1	The Accelerator Chain.	17
2.1.1	The Initial Accelerator Chain.	17
2.1.2	The Main Injector and Antiproton Source.	18
2.1.3	The Tevatron.	19
2.2	The D0 Detector.	19
2.2.1	Inner Tracker.	20
2.2.2	Calorimeter.	22
2.2.3	Muon System.	24
2.2.4	Trigger.	25
	References.	27
3	Experimental Techniques	29
3.1	Detector Alignment and Calibration.	29
3.1.1	Calorimeter Calibration.	29

3.2	Particle Reconstruction	30
3.2.1	Charged Tracks	30
3.2.2	Electrons and Photons	30
3.2.3	Muons	32
3.2.4	Hadronic Taus	33
3.2.5	IC Electrons	33
3.2.6	Hadronic Jets.	33
3.2.7	Missing Transverse Energy	34
3.3	Monte Carlo Simulation	34
3.4	Unfolding	35
3.5	Multivariate Classifiers	35
	References	35
4	Electron and Photon Energy Calibration	37
4.1	Introduction.	37
4.2	Dataset	39
4.3	Correction of the ϕ -Bias	39
4.4	Energy Calibration	40
4.4.1	Additional Calibrations	40
4.4.2	A ϕ_{mod} Dependence Energy Calibration	41
4.4.3	Shower Shape Dependence	49
4.4.4	Pseudorapidity Dependence	49
4.4.5	Fits for the ϕ_{mod} Dependence	49
4.4.6	Iteration of the Corrections	49
4.4.7	Resolution Improvements	50
4.4.8	Energy Dependence	53
4.5	Monte Carlo Over-Smearing	53
4.5.1	The Crystal Ball Function	56
4.5.2	Method to Fit for the Crystal Ball Parameters	59
4.5.3	Results	62
4.5.4	Data Versus MC Comparisons	63
	References	63
5	Novel Variables for Studying the Drell-Yan	
	Transverse Momentum	65
5.1	Previous Measurements.	65
5.2	First Idea: the a_T Variable	65
5.3	Second Idea: M_{ac}	67
5.4	Third Idea	68
5.5	Simp.	69
5.6	Scaling	69
5.7	Experim.	70
5.8	Experim	70
5.9	Acceptan	72

5.10	Sensitivity to the Physics	74
5.11	Discussion on the Different Variables	76
	References	80
6	Measurement of the Drell-Yan ϕ_η^* Distribution	81
6.1	The Observables	81
6.2	Event Selection	82
6.2.1	Event Selection Strategy	82
6.2.2	Data Sample and Skims	84
6.2.3	Monte Carlo Samples	85
6.2.4	Common Dielectron and Dimuon Requirements	85
6.2.5	Dielectron Event Selection	85
6.2.6	Dimuon Event Selection	86
6.3	Corrections to the Fully Simulated Monte Carlo Events	89
6.3.1	Instantaneous Luminosity Profile	91
6.3.2	Generator Level Physics Re-Weightings	91
6.3.3	Electron Energy and Muon Momentum Smearing	92
6.3.4	Track ϕ and η Smearing	92
6.3.5	Electron Track p_T Smearing	92
6.3.6	Local Muon p_T Smearing	94
6.3.7	Trigger and Offline Efficiencies	94
6.4	Backgrounds	107
6.5	Comparison of Data with Simulation	110
6.6	Unfolding	133
6.6.1	Binning in ϕ_η^*	133
6.6.2	Bin-by-Bin Unfolding	133
6.7	Systematic Uncertainties	134
6.8	Results	135
6.8.1	Theoretical Predictions	135
6.8.2	Comparison of Data and ResBos	137
6.8.3	Fitting for g_2	137
6.9	Cross Checks	137
6.9.1	Dielectron Versus Dimuon Comparison	137
6.9.2	ϕ -Gap Checks	138
6.9.3	Unfolding Closure Test Using g_2	138
6.9.4	Data Subset Checks Using g_2	139
	References	139
7	Measurement of the ZZ and WZ Production Cross Sections	141
7.1	Introduction	141
7.2	Dataset and MC Samples	141
7.2.1	Dataset	141
7.2.2	MC Samples	141

7.3	Dilepton Preselection	142
7.3.1	Trigger Requirements	143
7.3.2	Lepton Quality Definitions	143
7.3.3	$ZZ/\gamma^* \rightarrow \nu\bar{\nu}\ell^+\ell^-$ Dilepton Preselection Requirements.	143
7.3.4	$WZ/\gamma^* \rightarrow \ell\nu\ell^+\ell^-$ Dilepton Preselection Requirements.	145
7.4	Additional Objects	145
7.4.1	Jets.	145
7.4.2	Missing Transverse Energy	145
7.4.3	Additional Leptons.	146
7.5	Corrections to the Simulation	146
7.6	Comparison of Data and Simulation After Dilepton Selection	149
7.7	Missing Transverse Momentum Estimators	151
7.7.1	Construction of the Variables, $\not{p}'_T$ q'_T q'_L	152
7.7.2	Calorimeter Recoil.	155
7.7.3	Weighted Combination of q'_T and q'_L	158
7.7.4	Comparison of the Discriminating Variables	159
7.7.5	Performance of the Variables	160
7.8	Lepton Fake Rate Measurement.	164
7.9	$W(\text{+jet})$ Background Estimation	165
7.10	$Z/\gamma^* \rightarrow \ell^+\ell^-$ Candidate Selection	167
7.10.1	Signal-Free Control Regions	170
7.11	$WZ/\gamma^* \rightarrow \ell\nu\ell^+\ell^-$ Signal Selection	173
7.11.1	Selection Cuts	173
7.11.2	Normalisation of $Z/\gamma^* + \text{jet}$ Backgrounds	179
7.11.3	Trigger Efficiencies	182
7.11.4	Signal-Free Control Regions	184
7.12	$ZZ/\gamma^* \rightarrow \nu\bar{\nu}\ell^+\ell^-$ Multivariate Analysis.	185
7.13	Signal Cross Section Measurements	189
7.14	Systematic Uncertainties	192
7.15	Results	199
