

I. Nomenclature, Definition, Structure, and Architecture of Common Polymers

1. Introduction.....	1
1.2 References for 1	5
2. Classification and Chemical Structure of Polymers.....	6
2.1 General Remarks.....	6
2.1.1 Origin of Polymers	6
2.1.2 Polymer Synthesis	9
2.1.3 Molecular Structure (Constitution)	10
2.1.4 Chemical Composition	10
2.1.5 Application.....	18
2.2 Examples.....	18
2.2.1 Polymers with C-Atoms in the Backbone	18
2.2.2 Polymers with Heteroatoms in the Backbone	25
2.2.3 Biopolymers (Natural Polymers).....	29
2.2.4 Ionic Polymers	33
2.3 References for 2	34
3. Architecture of Polymers	35
3.1 Constitution.....	35
3.2 Configuration	39
3.3 Conformation	40
3.4 References for 3	41
4. Important Parameters of Polymers.....	42
4.1 Molecular Structure	42
4.1.1 Molar Mass	42
4.1.2 Molar Mass Distribution	46
4.2 Supramolecular Structure (Morphology)	49
4.2.1 Amorphous Polymers.....	49
4.2.2 Crystallization	51
4.2.3 Liquid Crystalline Polymers.....	53
4.2.4 Multiple Polymer Systems	54
4.3 References for 4	55
5. Nomenclature of Polymers.....	57
5.1 General Remarks.....	57
5.2 Structure-Based Nomenclature of Polymers	57
5.3 Source-Based Nomenclature of Polymers.....	59
5.4 Abbreviations and Trivial Names of Polymers	60
5.5 CAS Registry Numbers of Polymers	71
5.6 Polymer Class Names (acc. IUPAC group)	80

5.7	Polymer Material Names	81
5.8	Codes for Thermoplastic Materials	82
5.9	Nomenclature for Copolymers	83
5.10	Nomenclature for Non-Linear Macromolecules and Macromolecular Assemblies	84
5.11	Nomenclature for Recycling of Polymers	86
5.12	International Standards and IUPAC Recommendations	88
5.12.1	International Standards for Nomenclature of Plastic	88
5.12.2	Sources for Information on Terminology and Nomenclature of Polymeric Materials Proposed by IUPAC	88
5.13	References for 5	90
II. Radiochemical Modifications in Polymers		
1.	Basic Processes in Radiation Chemistry of Polymers	93
1.1	Crosslinking	94
1.2	Degradation	103
1.3	Grafting	109
1.4	Preparation of Hydrogels	112
1.5	Lifetime/Durability	117
1.6	Recycling	126
1.7	Dosimetry	132
1.8	Macroscopic Effects of High Energy Irradiation	136
1.9	Conclusion	168
1.10	References	169
III. Application of Chemiluminescence in Polymer Research		
1.	Chemiluminescence on Polymers	185
1.1	Background of Chemiluminescence	185
1.2	References for 1	187
2.	Chemiluminescence on Polymers. Examples	189
2.1	Degradation of Polymers	189
2.2	Stabilization of Polymers by Antioxidants	226
2.3	Effects of Energetic Treatment	242
2.4	Involvement of Experimental Conditions on CL Emission Intensity	244
2.5	Conclusion	247
2.6	References for 2	248
IV. Infrared and Raman Spectra		
1.	Introduction	253
1.1	Infrared Spectroscopy	253
1.2	Raman Spectroscopy	254
1.3	Interpretation of Bands	254

1.3.1	General Remarks.....	254
1.3.2	Assignment of Bands	254
1.3.3	Vibrations of Methylene and Methyl Groups.....	256
1.3.4	Progression Bands.....	257
1.3.5	Vibrations of Aromatic Compounds	257
1.3.6	Vibrations of the Carbonate Group	258
1.3.7	Vibrations of the Amide Group.....	259
1.3.8	Fermi Resonance.....	260
1.4	Examples of IR and Raman spectra	260
1.4.1	Polyethylene.....	260
1.4.2	Polypropylene	262
1.4.3	Polycarbonate.....	263
1.4.4	Polymethylmethacrylate.....	263
1.5	References for I	265
2	Tables of Vibrational Modes.....	266
2.1	Comments and Explanations to the Data	266
2.1.1	Structure of the Tables	266
2.1.2	Spectral Positions of IR and Raman Bands.....	266
2.1.3	Band Intensities	267
2.1.4	Assignments	267
2.1.5	Symmetries.....	268
2.1.6	Abbreviations	269
2.2	Biopolymers.....	270
2.2.1	Polypeptides	270
2.2.2	Polysaccharides	283
2.2.3	Other Biopolymers	289
2.3	Co-Polymers	293
2.3.1	Ethylene-vinyl alcohol copolymer(EVOH copolymer).....	293
2.3.2	Polyesteramide	294
2.3.3	Poly(n-butyl acrylate)- <i>co</i> -polyurethane (BA / PUR).....	295
2.3.4	Thermoplastic polyurethanes- <i>co</i> -polyester	296
2.3.5	Thermoplastic polyurethane- <i>co</i> -polyether (TPU-ET)	297
2.4	Fluoropolymers	298
2.4.1	Polychlorotrifluoroethylene (PCTFE).....	298
2.4.2	Polytetrafluoroethylene (PTFE)	299
2.4.3	Polyvinylidene fluoride (PVDF)	301
2.5	Phenolic Resins.....	303
2.5.1	Epoxy	303

2.6	Polyacetylenes	305
2.6.1	Poly(2-pyridinium hydrochloride-2-pyridylacetylene) (P2EPH).....	305
2.7	Polyacrylics.....	306
2.7.1	Poly(acrylic acid) (PAA).....	306
2.7.2	Poly(acrylamide) (PAM).....	307
2.7.3	Poly(acrylonitrile) (PAN).....	308
2.7.4	Poly(butyl acrylate).....	311
2.7.5	Poly(butyl methacrylate) (PBMA)	313
2.7.6	Poly(<i>N</i> -isopropylacrylamide)	314
2.7.7	Poly(methyl methacrylate) (PMMA)	315
2.8	Polyalkenylenes	319
2.8.1	Natural Rubber (Latex)	319
2.8.2	1,4-Polybutadiene (PB)	320
2.8.3	Polychloroprene	324
2.8.4	Poly(isoprene)	325
2.8.5	trans-1,4-Polypentadiene.....	329
2.9	Polyalkylenes	331
2.9.1	Poly(allylamine hydrochlorid) (PAH).....	329
2.10	Polyamides.....	332
2.10.1	Polyamide 1.1 (PA 1.1).....	332
2.10.2	Polyamide 1.3 (PA 1.3).....	333
2.10.3	Polyamide 6 (PA 6).....	334
2.10.4	Polyamide 6.6 (PA 6.6).....	337
2.10.5	Polyamide 6.10 (PA 6.10).....	339
2.10.6	Polyamide 6.12 (PA 6.12).....	341
2.10.7	Polyamide 10.10 (PA 10.10).....	342
2.10.8	Poly- γ -benzyl-L-glutamate (PBLG).....	343
2.10.9	Poly(p-phenylene terephthalamide) (PPTA)	344
2.11	Polyamine	345
2.11.1	Polyaniline (PANI).....	345
2.11.2	Poly(o-phenylenediamine) (POPD)	347
2.11.3	Poly(o-toluidine)	348
2.12	Polyarylenealkylenes	350
2.12.1	Poly(1,4-phenylene vinylene) (PPV)	350
2.13	Polybenzimidazoles	351
2.13.1	Polybenzimidazole (PBI)	351
2.14	Polycarbonates	353
2.14.1	Polycarbonate-bisphenol-A (PC-BPA)	353

2.15	Polyester.....	355
2.15.1	Poly(heptamethylene terephthaloyl-bis-4-oxybenzoate) (PHMTOB).....	355
2.15.2	Poly-3-hydroxybutyrate (PH3B)	357
2.15.3	Poly(1,4-butylene adipate) (PBA).....	358
2.15.4	Poly(decamethylene-4,4'-diphenoxy terephthalate) (PDDPT)	359
2.15.5	Polyethylene terephthalate (PET).....	360
2.15.6	Poly(ethylene-2,6-naphthalate) (PEN)	362
2.15.7	Poly(glycolic acid) (PGA).....	363
2.15.8	Poly-L-lactic acid (PLA).....	365
2.15.9	Poly-ortho-ester.....	367
2.16	Polyether	368
2.16.1	Poly(aryl ether ether ketone) (PEEK).....	368
2.16.2	Poly(aryl ether ketone) (PEK).....	371
2.16.3	Poly(diglycidyl ether of Bisphenol A) epoxy resin	372
2.16.4	Poly(1,3-dioxolane).....	373
2.16.5	Polyethylene oxide (PEO).....	374
2.16.6	Polyglycidylazid (GAP)	377
2.16.7	Polyoxymethylene (POM).....	378
2.16.8	Poly(tetramethylene oxide) (PTMO).....	380
2.17	Polyimides	381
2.17.1	Polyimide (PI).....	381
2.18	Polyolefines	383
2.18.1	Polyethylene (PE).....	383
2.18.2	Polyethylene, chlorinated (CPE)	386
2.18.3	Poly(4-methyl-1-pentene)	387
2.18.4	Polypropylene (PP)	388
2.19	Polysilanes	393
2.19.1	Poly(γ -methacryloxypropyltrimethoxysilane) (PMPTS).....	393
2.19.2	Poly(vinyl trimethylsilane) (PVTMS).....	394
2.20	Polysiloxanes	395
2.20.1	Polydimethylsiloxane (PDMS).....	395
2.21	Polysulfides.....	396
2.21.1	Poly(ethylene sulfide) (PES).....	396
2.21.2	Poly(1,4-phenylene sulfide) (PPS).....	397
2.21.3	Poly(thio methylene).....	399
2.22	Polysulfones.....	400
2.22.1	Poly(aryl ether sulfone) (PAES).....	400
2.22.2	Polysulfone (PSU).....	402

2.23	Polyurethanes.....	403
2.23.1	4,6-Polyurethane (PUR).....	403
2.23.2	Polyurethane Foam (PUR)	405
2.24	Vinyl Polymers	406
2.24.1	Poly(<i>N</i> -vinylcarbazole) (PVK).....	406
2.24.2	Poly(<i>N</i> -vinyl formamide) (PVFA)	408
2.24.3	Polystyrene (PS).....	409
2.24.4	Poly(α -methyl styrene)	411
2.24.5	Polystyrene sulfonic Acid	412
2.24.6	Poly(vinyl acetate) (PVAC)	413
2.24.7	Poly(vinyl alcohol) (PVOH)	415
2.24.8	Poly(vinyl amine) (PVAm).....	418
2.24.9	Poly(<i>N</i> -vinylcaprolactam)	419
2.24.10	Poly(vinylchloride) (PVC)	420
2.24.11	Poly (vinyl fluoride) (PVF).....	422
2.24.12	Poly(vinylidene chloride) (PVDC).....	423
2.24.13	Poly(vinyl methyl ether) (PVME).....	425
2.24.14	Poly(vinyl nitrate) (PVN).....	427
2.24.15	Poly-4-vinylphenol.....	428
2.24.16	Poly(vinyl pyridine)	429
2.24.17	Polyvinylpyrrolidone (PVP).....	431
2.25	Others.....	433
2.25.1	Poly(3,4-ethylenedioxythiophene) (PEDOT).....	433
2.25.2	Poly(seleno methylene).....	434
2.25.3	Polythiophene (PT)	435
2.26	References for 2	436
