1	Introduction	1
1.1	Outline	3
	References	4
2	The Experimental Setup	5
2.1	Brief Description of the New Apparatus	5
2.2	General Considerations	6
2.3	Magnetic Coils	7
2.4	Imaging Setup	9
2.4.1	The Imaging System Objective	9
2.4.2	Absorption Imaging with Very Short Delay Times Between Pictures	10
2.5	State Manipulation and Detection	14
2.6	The Trap Setup	17
2.7	Raman Sideband Cooling	19
2.8	Levitation	22
2.9	Lifetime Measurements	23
2.10	Trap Loading	25
2.11	Oscillation Frequency Measurements	26
2.11.1	Oscillation Frequency Measurement by a Rapid Trap Switching	26
2.11.2	Parametric Excitation of Atoms in a Dipole Trap	27
2.12	Evaporation to BEC	29
	References	31
3	Theoretical Framework	33
3.1	Atomic Motion in the Trap Without Collisions	33
3.2	The Hamiltonian and the Ensemble Coherence	34

3.3	How to Measure Coherence?	35
3.4	Dephasing in a 3D Harmonic Trap Without Collisions	36
3.5	The Ensemble Coherence with an External Control Field: A System-Reservoir Gaussian Framework	37
	References	37
4	Spectral Narrowing due to Elastic Collisions	39
4.1	Introduction to Motional Narrowing	39
4.2	Collisional Narrowing: Motional Narrowing due to Elastic Collisions	39
4.3	Experimental Observation of Collisional Narrowing	41
4.4	Universal Behavior of the Narrowed Linewidth	42
4.5	Monte-Carlo Numerical Simulations	43
4.6	Collisional Narrowing in a Symmetric Many-Body Coherent Superposition	43
	References	44
5	The Ensemble Spectrum with an Arbitrary Detuning Distribution	45
5.1	Discrete Fluctuations Model and the Resulting Spectrum	45
5.2	Comparison with a Gaussian Process	46
5.3	Application of the Discrete Fluctuations Model to Cold Atomic Ensembles	48
5.4	Comparison of the Theory to Experimental Results	50
	References	51
6	Motional Broadening in Ensembles with Heavy-Tail Detuning Distribution	53
6.1	The Case of Poisson Fluctuations	54
6.2	Motional Broadening for Stable Distributions	54
6.3	Generalization	56
	References	60
7	Suppression of Collisional Decoherence by Dynamical Decoupling	61
7.1	Introduction	61
7.2	Quantum Process Tomography of Dynamical Decoupling	62
7.3	Optimal Decoupling Sequence for Collisional Bath	63
7.4	Coherence Time Measurements with Dynamical Decoupling	64
	References	67

Contents	xiii
8 Summary and Outlook	69
8.1 Summary	69
8.2 Outlook	71
Appendix A: Collisional Narrowing Data Analysis	73
Appendix B: Derivation of the Spectrum for a Discrete Fluctuation Model	75
Appendix C: Numerical Simulations with Correlations in the Fluctuations	77
Appendix D: Optimal Decoupling Pulse Sequence for a Lorentzian Spectral Function	79
Appendix E: Publications Resulting from This Research	81
