

Table of Contents

Large Deviations and Applications	1
Robert Azencott	
Introduction.....	3
Chapter 1 Theorems a la Cramer-Chernof in dimension 1	13
Chapter 2 Large Deviations for Sums of i.i.d. Random Vectors	23
Chapter 3 Cramer Transforms and Fenchel-Legendre Duality	35
Chapter 4 Large Deviations for Random Vectors in Banach Spaces.....	43
Chapter 5 Cramer Transforms on \mathbb{R}^k : Botanic.....	59
Chapter 6 Large Deviations for Gaussian Measures and Processes.....	63
Chapter 7 Small Gaussian Perturbations of Dynamic Systems.....	77
Chapter 8 Stochastic Differential Equations with Small Diffusion Coefficients	85
Chapter 9 Rare events : Uniform Asymptotic Estimates	109
Chapter 10 Small Perturbations of Dynamic Systems on Differentiable Manifolds	119
Chapter 11 Rare Events Estimates for Diffusions on Differentiable Manifolds	137
Chapter 12 Exit Bottlenecks for Perturbed Equilibria	181
Chapter 13 Questions Awaiting Answers	205
Bibliography	209
Large Deviations and Applications	213
S.R.S. Varadhan	
1. Introduction	215
2. Basic General Facts	218
3. Large Deviations for Stationary Stochastic Processes	222
4. Independent Random Variables	225
5. Markov Chains	236
6. Stationary Gaussian Process.....	243
7. Continuous Time Markov Processes.....	245
8. Application to the Problem of the Wiener Sausage	250
9. The Polaron Problem	257
10. Large Deviations and Laws of the Iterated Logarithm	259
Concluding Remarks	260
Bibliographical Remarks	261
References.....	261

Semi-Linear PDE'S and Limit Theorems for Large Deviations.....	263
Mark I. Freidlin	
Introduction.....	265
1. Markov Processes and Differential Equations	267
2. Generalized KPP-equations and Large Deviations	276
3. Generalized KPP-equation Under Condition (N).....	283
4. Examples	290
5. General Result	299
6. Models of Evolution	307
7. Some Remarks and Generalizations.....	319
8. Weakly Coupled Reaction-Diffusion Equations	325
9. RDE systems of KPP Type.....	344
10. Random Perturbations of RDE's: Perturbed Boundary Conditions.....	351
11. Random Perturbations of RDE's: White Noise in the Equation	362
References.....	369
Index	371
