|-------------------------------------------------------------------------------------------------------------------|-----|
| <b>Design Methodologies of Wireless Sensors Instrumentation Systems for Monitoring and Control</b> .....          | 1   |
| <i>Essa Jafer</i>                                                                                                 |     |
| <b>Distributed Energy Management System within Residential Sensor-Based Heterogeneous Network Structure</b> ..... | 35  |
| <i>Yueh-Min Huang, Ying-Xun Lai</i>                                                                               |     |
| <b>Use of MEMS Technology in Realizing Single-Parameter and Multi-parameter Sensing Systems</b> .....             | 61  |
| <i>M.T. Ke, Chia-Yen Lee</i>                                                                                      |     |
| <b>Hybrid Networks and Ecological Sensing</b> .....                                                               | 99  |
| <i>John H. Porter, Chau Chin Lin</i>                                                                              |     |
| <b>Management Protocols for Sensors in Smart Grid Networks</b> .....                                              | 125 |
| <i>Quincy Wu, Hui-Hsiung Chung</i>                                                                                |     |
| <b>Application of Microbial Fuel Cells to Power Sensor Networks for Ecological Monitoring</b> .....               | 151 |
| <i>Chris Knight, Kate Cavanagh, Christopher Munnings, Tim Moore, Ka Yu Cheng, Anna H. Kaksonen</i>                |     |
| <b>Remote Sensing in Agricultural Livestock Welfare Monitoring: Practical Considerations</b> .....                | 179 |
| <i>Bruce Stephen, C. Michie, I. Andonovic</i>                                                                     |     |
| <b>Design of a Wireless Sensor Network for Structural Health Monitoring of Bridges</b> .....                      | 195 |
| <i>M. Reyer, S. Hurlebaus, John Mander, Osman E. Ozbulut</i>                                                      |     |
| <b>A Sensing Approach to Fruit-Growing</b> .....                                                                  | 217 |
| <i>Takaharu Kameoka, Atsushi Hashimoto</i>                                                                        |     |

**A Wi-Fi Based Smart Wireless Sensor Network for an Agricultural Environment** ..... 247  
*Gerard Rudolph Mendez, Subhas Chandra Mukhopadhyay*

**Adaptive Classification of Special Events in Agroecological Monitoring Systems for Pest Management** ..... 269  
*Chia-Pang Chen, Min-Sheng Liao, Joe-Air Jiang*

**Author Index** ..... 297
