

Contents

Preface to the special collection in honour of Vincenzo Barone.....	1
Nino Russo, Nadia Rega, Carlo Adamo	
Ab initio classical trajectory calculations of 1,3-cyclobutanedione radical cation dissociation.....	5
Jia Zhou, H. Bernhard Schlegel	
New insights into oxidation properties and band structure of fluorescein dyes from ab initio calculations.....	11
Francesco Buonocore, Andrea di Matteo	
Thermodynamic and stereochemical aspects of the polymerizability of glycolide and lactide	21
Carlos Alemán, Oscar Bertran, K. N. Houk, Anne Buyle Padías, Henry K. Hall Jr.	
A theoretical study on CH₂N₂ isomers: structure and energetics	31
Cristina Puzzarini, Alberto Gambi	
Computational ¹⁹F NMR. 1. General features	41
Giacomo Saielli, Riccardo Bini, Alessandro Bagno	
The nature of the C–As bonds in arsaalkynes: an atoms in molecules and electron localization function study	53
Tiziana Marino, Maria C. Michelini, Nino Russo, Emilia Sicilia, Marirosa Toscano	
The fate of branched and linear isomers in the rhodium-catalyzed hydroformylation of 3,4,4-trimethylpent-1-ene	67
Giuliano Alagona, Caterina Ghio	
First-principles simulations of the ²⁷Al and ¹⁷O solid-state NMR spectra of the CaAl₂Si₃O₁₀ glass	87
Alfonso Pedone, Elisa Gambuzzi, Gianluca Malavasi, Maria Cristina Menziani	
On the kinetics and thermodynamics of S–X (X = H, CH₃, SCH₃, COCH₃, and CN) cleavage in the formation of self-assembled monolayers of alkylthiols on Au(111)	99
Madhavan Jaccob, Gopalan Rajaraman, Federico Totti	
A relativistic DFT study of magnetic exchange coupling in ketimide bimetallic uranium(IV) complexes	111
Samir Meskaldji, Abdellah Zaiter, Lotfi Belkhiri, Abdou Boueckkine	
Theoretical investigation of molecular excited states in polar organic monolayers via an efficient embedding approach	121
Aleksandrs Terentjevs, Eduardo Fabiano, Fabio Della Sala	

Deactivation of Ru-benzylidene Grubbs catalysts active in olefin metathesis	129
Albert Poater, Luigi Cavallo	
Is the dynamical polarization a significant part of the contribution of the triples to the correlation energy?	135
Jean-Paul Malrieu, Hongjiang Zhang, Jing Ma	
Modelling vibrational coupling in DNA oligomers: a computational strategy combining QM and continuum solvation models	143
Alessandro Biancardi, Roberto Cammi, Chiara Cappelli, Benedetta Mennucci, Jacopo Tomasi	
Relativistic coupled cluster calculations of the electronic structure of KrH^+, XeH^+ and RnH^+	153
Francesco Ferrante, Giampaolo Barone, Dario Duca	
$[\text{Zn}_{10}(\mu_4\text{-S})(\mu_3\text{-S})_6(\text{Py})_9(\text{SO}_4)_3]$ as a molecular model of ZnS surfaces: an experimental and theoretical study	161
Francesco Avanzini, Maurizio Casarin, Daniel Forrer, Luciano Pandolfo, Mauro Sambi, Andrea Vittadini	
Validation of a hybrid MD-SCF coarse-grained model for DPPC in non-lamellar phases	169
Antonio De Nicola, Ying Zhao, Toshihiro Kawakatsu, Danilo Roccatano, Giuseppe Milano	
Thermal and environmental effects on Oligothiophene low-energy singlet electronic excitations in dilute solution: a theoretical and experimental study	185
Massimiliano Aschi, Andrea Amadei, Andrea Pellegri, Nicola Perin, Riccardo Po'	
Improving the study of proton transfers between amino acid side chains in solution: choosing appropriate DFT functionals and avoiding hidden pitfalls	199
Pedro J. Silva, Marta A. S. Perez, Natércia F. Brás, Pedro A. Fernandes, M. J. Ramos	
Franck–Condon factors in curvilinear coordinates: the photoelectron spectrum of ammonia	207
Amedeo Capobianco, Raffaele Borrelli, Canio Noce, Andrea Peluso	
Computational modelling of de novo synthesis of Dibenzofuran: oxidative pathways of Pyrene and Benzodibenzofuran	217
Ugo Cosentino, Demetrio Pitea, Giorgio Moro	
Modelization of vibrational spectra beyond the harmonic approximation from an iterative variation–perturbation scheme: the four conformers of the glycolaldehyde	229
Philippe Carbonniere, Claude Pouchan	
Generalized gradient exchange functionals based on the gradient-regulated connection: a new member of the TCA family	237
Éric Brémond, Diane Pilard, Ilaria Ciofini, Henry Chermette, Carlo Adamo, Pietro Cortona	

Giant correlation effects in the photoelectron spectrum of Ni(C₃H₅)₂: clues from accurate calculation of ionization cross-sections	245
P. Decleva, G. Fronzoni, M. Stener	
Copper coordination to the putative cell binding site of angiogenin: a DFT investigation	255
Luca Bertini, Maurizio Bruschi, Marco Romaniello, Giuseppe Zampella, Matteo Tiberti, Valentina Barbieri, Claudio Greco, Diego La Mendola, Raffaele P. Bonomo, Piercarlo Fantucci, Luca De Gioia	
Impact of DFT functionals on the predicted magnesium–DNA interaction: an ONIOM study	271
José P. Cerón-Carrasco, Alberto Requena, Denis Jacquemin	
Adsorption of successive layers of H₂ molecules on a model copper surface: performances of second- to fifth-rung exchange-correlation functionals	281
Géraldine Cilpa, Jonathan Colin, Frédéric Labat, Carlo Adamo, Gilberte Chambaud	
Heuristic approaches to the optimization of acceptor systems in bulk heterojunction cells: a computational study	291
Silvia Carlotto, Laura Orian, Antonino Polimeno	
The first solvation shell of Reichardt’s dye in ionic liquids: a semiempirical study	299
Cinzia Chiappe, Christian Silvio Pomelli	
Comparison of the mechanism of deamination of 5,6-dihydro-5-methylcytosine with other cytosine derivatives	307
André Grand, Jean Cadet, Leif A. Eriksson, Vanessa Labet, Nelly L. Jorge, Maria L. Schreiber, Thierry Douki, Christophe Morell	
Integrated computational approaches for spectroscopic studies of molecular systems in the gas phase and in solution: pyrimidine as a test case	319
Malgorzata Biczysko, Julien Bloino, Giuseppe Brancato, Ivo Cacelli, Chiara Cappelli, Alessandro Ferretti, Alessandro Lami, Susanna Monti, Alfonso Pedone, Giacomo Prampolini, Cristina Puzzarini, Fabrizio Santoro, Fabio Trani, Giovanni Villani	
Effects of molecular dynamics and solvation on the electronic structure of molecular probes	339
Pasquale Caruso, Mauro Causà, Paola Cimino, Orlando Crescenzi, Maddalena D’Amore, Roberto Improta, Michele Pavone, Nadia Rega	
Theoretical and experimental investigation on the near-infrared and UV–vis spectral regions of a newly synthesized triarylamine electrochromic system	351
Bruna Clara De Simone, Angelo Domenico Quartarolo, Sante Cospito, Lucia Veltri, Giuseppe Chidichimo, Nino Russo
