	Summary: Anatomy of Acoustic Neuromas	45

Anatomy of Vascular Compression in the Middle	
Neurovascular Complex.....	50
Cochlear and Vestibular Nerve Compression Syndromes	55
Geniculate Neuralgia.....	58
Lower Neurovascular Complex	59
Neural Relationships	60
Anatomy of Glossopharyngeal Neuralgia.....	61
Vascular Relationships	63
Vascular Compression in the Lower	
Neurovascular Complex	63
Tumors Involving Multiple Neurovascular Complexes	63
Telovelar Approach to Fourth Ventricle.....	65
References.....	70

3 Neuropathology of the Cerebellopontine Angle

and Its Surroundings	73
Introductory Remarks	73
Pathology of the Peripheral Nervous System	73
Schwannoma	74
Malignant Peripheral Nerve Sheath Tumor (MPNST)	76
Pathology of the Autonomous Nervous System	77
Jugulotympanic Paraganglioma	77
Pathology of the Meninges	78
Meningioma	78
Hemangiopericytoma	81
Hemangioblastoma.....	82
Leptomeningeal Melanocytic Lesions	83
Meningiosis and Solid Metastatic Tumors.....	83
Acute Bacterial Sive Purulent Meningitis.....	84
Tuberculous Meningitis.....	85
Sarcoidosis	86
Aspergillosis	86
Cryptococcosis	88
Cysticercosis.....	89
Echinococcosis.....	89
Pathology of the Osseous Skull Base.....	89
Fibrous Dysplasia.....	90
Aneurysmal Bone Cyst	91
Osteochondroma.....	91
Chondroblastoma	91
Chondrosarcoma.....	91
Chordoma	91
Endolymphatic Sac Tumor.....	92
Pathology of the Sellar Region	93
Pituitary Adenoma	93
Pituitary Carcinoma	95
Spindle Cell Oncocytoma of the Adenohypophysis	96
Pituicytoma.....	96
Granular Cell Tumor of the Neurohypophysis.....	97

Craniopharyngioma.....	97
Xanthogranuloma of the Sellar Region.....	98
Pathology of Regional Glial Tumors	99
Pilocytic Astrocytoma.....	99
Pilomyxoid Astrocytoma	99
Ependymoma.....	100
Pathology of the Choroid Plexus of the Fourth Ventricle	100
Choroid Plexus Papilloma.....	100
Choroid Plexus Carcinoma	101
Pathology of the Hematopoietic System.....	101
Primary CNS Lymphomas	102
Langerhans Cell Histiocytosis.....	102
Non-Langerhans Cell Histiocytosis	103
Pathology of Germ Cells.....	104
Germ Cell Tumors.....	104
Tumorlike Dysontogenetic Cysts	105
Pathology of Blood Vessels and Circulation.....	105
Arteriovenous Malformation.....	105
Saccular Aneurysm	107
Ischemic Brain Infarct.....	109
Hypertensive Angiopathy and Brain Hemorrhage.....	109
Vasculitis	110

4 Approaches to the Cerebellopontine Angle	115
Middle Fossa Approach	115
Standard MF Approach.....	115
Extended MF Approach.....	118
Translabyrinthine Approach and Its Variations	119
Operative Technique.....	119
Mastoidectomy	119
Labyrinthectomy	120
Surgical Outcome.....	120
Retrolabyrinthine Approach.....	121
Partial Translabyrinthine Approach.....	121
Transcochlear Approach	121
Combined Approaches.....	121
Combined Translabyrinthine–Retrosigmoid Approach	122
Translabyrinthine–Transtentorial Approach	122
Retrosigmoid Approach.....	122
Benefits of the Approach.....	122
Patient Positioning and Anesthesia Considerations	123
Anesthetic Considerations	123
The Semi-sitting Position.....	126
Standard Instrument Sets Used in All CP Angle Surgeries	128
Skin Incision and Craniotomy.....	128
Dura Incision.....	131
Hemostasis, dural closure and mastoid occlusion.....	132
Reconstruction of the Posterior Skull Base.....	134

Drawbacks of the RS Approach.....	134
Limited Exposure of the Fundus	134
Need of Cerebellar Retraction.....	136
Postoperative Headache	136
Pneumocephalus and Tension Pneumocephalus	137
