Invited Talks

Model-Driven Design-Space Exploration for Software-Intensive Embedded Systems (Extended Abstract)	1
<i>Twan Basten, Martijn Hendriks, Lou Somers, and Nikola Trčka</i>	
Statistical Model Checking, Refinement Checking, Optimization, ... for Stochastic Hybrid Systems	7
<i>Kim G. Larsen</i>	

Regular Papers

Robustness of Time Petri Nets under Architectural Constraints	11
<i>S. Akshay, Loïc Hélouët, Claude Jard, Didier Lime, and Olivier H. Roux</i>	
Toward a Timed Theory of Channel Coding	27
<i>Eugene Asarin, Nicolas Basset, Marie-Pierre Béal, Aldric Degorre, and Dominique Perrin</i>	
Playing Optimally on Timed Automata with Random Delays	43
<i>Nathalie Bertrand and Sven Schewe</i>	
Dynamically-Driven Timed Automaton Abstractions for Proving Liveness of Continuous Systems	59
<i>Rebekah Carter and Eva M. Navarro-López</i>	
Revisiting Timed Specification Theories: A Linear-Time Perspective	75
<i>Chris Chilton, Marta Kwiatkowska, and Xu Wang</i>	
Multi-core Reachability for Timed Automata	91
<i>Andreas E. Dalsgaard, Alfons Laarman, Kim G. Larsen, Mads Chr. Olesen, and Jaco van de Pol</i>	
Counterexample-Guided Synthesis of Observation Predicates	107
<i>Rayna Dimitrova and Bernd Finkbeiner</i>	
Confidence Bounds for Statistical Model Checking of Probabilistic Hybrid Systems	123
<i>Christian Ellen, Sebastian Gerwinn, and Martin Fränzle</i>	
Region-Based Analysis of Hybrid Petri Nets with a Single General One-Shot Transition	139
<i>Hamed Ghasemieh, Anne Remke, Boudewijn Haverkort, and Marco Gribaudo</i>	

Reducing Quasi-Equal Clocks in Networks of Timed Automata	155
<i>Christian Herrera, Bernd Westphal, Sergio Feo-Arenis, Marco Muñoz, and Andreas Podelski</i>	
SMT-Based Induction Methods for Timed Systems	171
<i>Roland Kindermann, Tommi Junttila, and Ilkka Niemelä</i>	
Timed Automata with Disjoint Activity	188
<i>Marco Muñoz, Bernd Westphal, and Andreas Podelski</i>	
The Complexity of Bounded Synthesis for Timed Control with Partial Observability	204
<i>Hans-Jörg Peter and Bernd Finkbeiner</i>	
Static Detection of Zeno Runs in UPPAAL Networks Based on Synchronization Matrices and Two Data-Variable Heuristics	220
<i>Jonas Rinast and Sibylle Schupp</i>	
Frequencies in Forgetful Timed Automata	236
<i>Amélie Stainer</i>	
Mcta: Heuristics and Search for Timed Systems	252
<i>Martin Wehrle and Sebastian Kupferschmid</i>	
Author Index	267
