

Contents

1	Introduction	1
1.1	Problem Description and Motivation	1
1.2	Objectives and Benefit	4
1.3	Structure of this Dissertation	8
2	Foundations	11
2.1	Cloud Computing	11
2.2	IT Risk Management	14
2.2.1	Risk-related Definitions	14
2.2.2	The Nature of Perceived Risk as Multi-Dimensional Construct	15
2.2.3	IT Risk Management Process	16
2.3	Risks in the Context of IT Outsourcing and Cloud Computing	22
3	Evaluation of Perceived IT Security Risks	27
3.1	Development of Measures Using a Structured Literature Review	29
3.1.1	Selection of Scientific Databases	29
3.1.2	Selection of Keywords	30
3.1.3	Search Filters	32
3.1.4	Successive Refinement of Risk Items	32
3.2	Scale Evaluation and Refinement Using the Q-Sort Method	37
3.3	Scale Evaluation and Refinement Using Qualitative Interviews among Security Researchers	40
3.4	Construct Conceptualization and Model Specification	42
3.4.1	Formal Measurement Specification	42
3.4.2	Descriptions of Security Risk Dimensions	44
3.5	Scale Assessment and Validation Using an Empirical Survey	49

3.5.1	Survey Development and Implementation	49
3.5.2	Methods of Validation	53
3.6	Analysis of Adoption Decisions	68
3.6.1	Theoretical Perspective and Hypothesis Development	68
3.6.2	Description of Measures	73
3.6.3	Results of the Statistical Analysis	75
3.6.4	Discussion of the Survey's Results	82
4	Risk Quantification Framework	85
4.1	Model Description	85
4.1.1	Parameter Descriptions	86
4.1.2	Calculations of the Overall Risk Distribution	91
4.1.3	Determination of Risk Measures	95
4.2	Simulations	98
4.2.1	Identification of Costs Drivers	98
4.2.2	Sensitivity Analysis	101
4.2.3	Trade-off: Accuracy and Performance	108
4.3	Model Applications	114
4.3.1	Dynamic Posted Pricing Service	114
4.3.2	Decision Support System Prototype	123
5	Recommended Actions	127
5.1	Recommended Actions for Risk Identification	129
5.2	Recommended Actions for Risk Quantification	131
5.3	Recommended Actions for Risk Treatment	136
5.4	Recommended Actions for Risk Review and Evaluation	138
5.5	Recommended Actions for Cloud Computing Providers	139
6	Limitations, Summary, and Prospect	141
6.1	Limitations and Critical Assessment	141
6.2	Summary	143
6.2.1	Theoretical Contributions	143
6.2.2	Practical Contributions	144
6.2.3	Conclusion	145
6.3	Recommendations for Future Work	148
Appendix	151
A.1	Sources for the Literature Review	152
A.2	Sources for each Risk Item	156
A.3	Q-Sort Statistics	158
A.4	Expert Interview Statistics	164

A.5 Questionnaire Items 165

A.6 Survey Questionnaire 167

A.7 Descriptive Sample Characteristics 174

A.8 Results for Other Structural Equation Models 176
