

Contents

1	Introduction	1
1.1	Fundamentals of Fuzzy Sets Theory	1
1.1.1	Fuzzy Sets and Possibility Theory	2
1.1.2	Fuzzy Relations	9
1.1.3	Fuzzy Numbers	21
1.2	Basic Methods of Fuzzy Clustering	24
1.2.1	Optimization Methods of Fuzzy Clustering	24
1.2.2	Heuristic Algorithms of Fuzzy Clustering	41
1.2.3	Hierarchical Methods of Fuzzy Clustering	44
1.3	Methods of Possibilistic Clustering	47
1.3.1	A Brief Review of Prototype-Based Methods	49
1.3.2	A Relational Algorithm of Possibilistic Clustering	54
1.3.3	Hybrid Clustering Techniques	54
2	Heuristic Algorithms of Possibilistic Clustering	59
2.1	Outline of the Approach	59
2.1.1	Basic Definitions	59
2.1.2	Illustrative Examples	65
2.1.3	A Note on the Data Preprocessing	70
2.2	Relational Clustering Algorithms	72
2.2.1	The Basic Algorithm	72
2.2.2	An Algorithm with Partial Supervision	73
2.2.3	An Algorithm for Detecting the Minimal Number of Disjointed Clusters	75
2.2.4	Evaluation of the Fuzzy Clusters	76
2.2.5	Validity Measures for the Basic Algorithm	79
2.2.6	Experimental Results	81
2.3	Prototype-Based Clustering Algorithms	104
2.3.1	Direct Clustering Algorithms	104
2.3.2	An Algorithm of Hierarchical Clustering	110
2.3.3	Numerical Examples	113
3	Clustering Approaches for Uncertain Data	119
3.1	A Clustering Approach Based on Intuitionistic Fuzzy Relations	120
3.1.1	A Brief Review of the Existing Intuitionistic Fuzzy Clustering Techniques	120
3.1.2	Basic Concepts of the Intuitionistic Fuzzy Set Theory	122

3.1.3	A Method of the Decomposition of Intuitionistic Fuzzy Tolerances.....	126
3.1.4	Basic Concepts of an Intuitionistic Fuzzy Generalization of the Clustering Approach.....	131
3.1.5	An Outline of the D-PAIFC-Algorithm.....	135
3.1.6	Experimental Results	137
3.2	A Method of Clustering the Fuzzy Data	143
3.2.1	Related Works	143
3.2.2	Notes on Fuzzy Data Preprocessing.....	144
3.2.3	Illustrative Examples	149
3.3	Clustering the Three-Way Data	154
3.3.1	Preliminary Remarks	154
3.3.2	A Technique of the Three-Way Data Preprocessing.....	156
3.3.3	An Illustrative Example	158
3.4	A Method for the Clustering of Interval-Valued Data	164
3.4.1	Techniques for the Preprocessing of Interval-Valued Data	164
3.4.2	Construction of the Stationary Cluster Structure	166
3.4.3	An Illustrative Example	173
4	Applications of Heuristic Algorithms of Possibilistic Clustering.....	183
4.1	A Methodology of Fuzzy Clustering with Partial Supervision	183
4.1.1	Constructing the Set of Labeled Objects.....	183
4.1.2	An Illustrative Example	186
4.2	Dimensionality Reduction of the Analyzed Attribute Space	188
4.2.1	A Method of Attribute Clustering.....	188
4.2.2	An Illustrative Example	190
4.3	Clustering the Asymmetric Data.....	193
4.3.1	A Technique for the Asymmetric Data Processing	193
4.3.2	An Illustrative Example	195
4.4	Discrimination of the Weak Fuzzy Preference Relations	197
4.4.1	Decision Making Based on Fuzzy Preference Relations	198
4.4.2	A Clustering Approach to the Selection of a Unique Fuzzy Preference Relation	199
4.4.3	An Illustrative Example	201
4.5	Automatic Generation of a Fuzzy Inference Systems from Data.....	207
4.5.1	Preliminary Remarks	208
4.5.2	Extracting Fuzzy Rules from Fuzzy Clusters	209
4.5.3	Illustrative Examples	214
