1	Introduction	1
1.1	From the Ancient Egypt to the Computer Era	1
1.2	Frictionless Contact between Solids	3
1.3	Methods of Introduction of Contact Constraints.....	5
1.4	The Finite Element Method in Contact Analysis.....	7
1.5	Friction Constraints	9
2	Frictionless Beam-to-Beam Contact.....	13
2.1	Assumptions	13
2.2	Penetration Function	15
2.3	Contact Search	19
2.4	Weak Form and Kinematic Variables for Contact.....	24
2.5	Discretisation of Kinematic Variables	27
2.6	Residual Vector and Tangent Stiffness Matrix	29
2.7	Numerical Examples.....	31
2.7.1	Introduction	31
2.7.2	Example 1	32
2.7.3	Example 2.....	34
2.7.4	Example 3.....	35
3	Friction in Beam-to-Beam Contact	39
3.1	Friction Model	39
3.2	Kinematic Variables for Friction	43
3.3	Weak Form Components due to Friction.....	47
3.4	Discretization of Friction Terms Present in Weak Form	49
3.5	Residual Vector and Tangent Stiffness Matrix for Friction.....	52
3.6	Numerical Examples.....	57
3.6.1	Introduction	57
3.6.2	Example 1	58
3.6.3	Example 2	61
3.6.4	Example 3	63
3.6.5	Example 4.....	66
3.6.6	Example 5.....	68

4	Contact between Smoothed Beams	71
4.1	General Remarks on Smoothing of Contact Facets	71
4.2	Smoothing of 3D Curves	72
4.2.1	General Remarks	72
4.2.2	Inscribed Curve Algorithm	72
4.2.3	Node-Preserving Algorithm	76
4.3	Discretisation and Smooth Beam Contact Finite Elements	79
4.3.1	Inscribed Curve Elements	79
4.3.2	Node-Preserving Elements	81
4.4	Numerical Examples	83
4.4.1	Introduction	83
4.4.2	Example 1	84
4.4.3	Example 2	86
4.4.4	Example 3	88
4.4.5	Example 4	91
4.4.6	Example 5	93
4.4.7	Example 6	95
5	Electric Contact	99
5.1	Introduction	99
5.2	Electro-mechanical Variables for Contact	99
5.3	Weak Formulation of Electro-mechanical Contact	103
5.4	Beam Finite Element for the Electric Current Flow	105
5.5	Discretisation and Electro-mechanical Contact Finite Element	106
5.6	Numerical Examples	109
5.6.1	Introduction	109
5.6.2	Example 1	110
5.6.3	Example 2	111
5.6.4	Example 3	113
5.6.5	Example 4	116
5.6.6	Example 5	117
6	Thermo-mechanical Coupling	121
6.1	Introduction	121
6.2	Thermo-mechanical Beam Finite Element	122
6.3	Variables for Thermo-mechanical Contact	125
6.4	Weak Form for Thermo-mechanical Contact	126
6.5	Discretisation and Thermo-mechanical Contact Beam Finite Element	127
6.6	Numerical Examples	131
6.6.1	Introduction	131
6.6.2	Example 1	131
6.6.3	Example 2	134

Contents	XI
7 Summary and Outlook	135
Appendix 1 Matrices D and E for Beams with Rectangular Cross-Sections	137
A1.1 Components of Matrix D	137
A1.2 Components of Matrix E	140
Appendix 2 Derivation of Variables $\Delta\delta\xi_{mn}$ and $\Delta\delta\xi_{sn}$	141
Appendix 3 Matrices G, H and M in Smoothing Procedures	147
A3.1 Components of Matrix G	147
A3.2 Components of Matrix H	150
A3.3 Components of Matrix M	152
Bibliography	155
