

Contents

Chapter 1: Discrete Coulomb Frictional Systems Subjected to Periodic Loading	1
<i>Jim R. Barber, Young Ju Ahn</i>	
Chapter 2: Stability in Unilateral Contact Problems with Dry Friction	13
<i>Elaine Pratt, Alain Léger, Michel Jean</i>	
Chapter 3: On a Geometrically Exact Theory for Contact Interactions	31
<i>Alexander Konyukhov, Karl Schweizerhof</i>	
Chapter 4: Applications of an Existence Result for the Coulomb Friction Problem	45
<i>Vincent Acary, Florent Cadoux</i>	
Chapter 5: Size-Scale Effects on the Friction Coefficient: From Weak Faults at the Planetary Scale to Superlubricity at the Nanoscale	67
<i>Marco Paggi, Alberto Carpinteri</i>	
Chapter 6: A Residual Type Error Estimate for the Static Coulomb Friction Problem with Unilateral Contact	85
<i>Patrick Hild, Vanessa Lleras</i>	
Chapter 7: Frictional Contact Problems for Thin Elastic Structures and Weak Solutions of Sweeping Process	101
<i>Patrick Ballard</i>	
Chapter 8: Scalable TFETI Algorithm for Frictionless Contact Problems: Theory and Real World Problems	113
<i>Zdeněk Dostál, Tomáš Kozubek, Tomáš Brzobohatý, Alexandros Markopoulos, Vít Vondrák</i>	

Chapter 9: T-FETI Based Algorithm for 3D Contact Problems with Orthotropic Friction	131
<i>Jaroslav Haslinger, Radek Kučera</i>	
Chapter 10: A Primal-Dual Active Set Strategy for Finite Deformation Dual Mortar Contact	151
<i>Alexander Popp, Michael W. Gee, Wolfgang A. Wall</i>	
Chapter 11: Numerical Analysis of a Bone Remodelling Contact Problem	173
<i>José R. Fernández, Rebeca Martínez</i>	
Chapter 12: Postbuckling Behaviour of a Rectangular Plate Surrounded by Nonlinear Elastic Supports	189
<i>Aliki D. Muradova, Georgios E. Stavroulakis</i>	
Chapter 13: A Time-Stepping Scheme for Multibody Dynamics with Unilateral Constraints	205
<i>Laetitia Paoli</i>	
Chapter 14: Coupled Implicit Variational Inequalities and Dynamic Contact Interactions in Viscoelasticity	221
<i>Marius Cocou</i>	
Chapter 15: Comparisons of Contact Forces during Oblique Impact: Experimental vs. Continuum and Finite Element Results	239
<i>Philip P. Garland, Robert J. Rogers</i>	
Chapter 16: Dynamic Response of Masonry Walls Connected with a Reinforced Concrete Frame	257
<i>Maria E. Stavroulaki, Katerina Pateraki</i>	
Chapter 17: Beams Comprising Unilateral Material in Frictionless Contact: A Variational Approach with Constraints in Dual Spaces	275
<i>Franco Maceri, Giuseppe Vairo</i>	
Chapter 18: On the Separation Zones in Aluminium Base-Plate Connections. Numerical Simulation and Laboratory Testing	293
<i>Dimitrios N. Kaziolas, Evangelos Efthymiou, Michael Zygomalas, Charalambos C. Baniotopoulos</i>	
Chapter 19: Composite Slab: A Unilateral Contact Problem	309
<i>Themistoklis S. Tsalkatidis, Aris V. Avdelas</i>	
Chapter 20: The Influence of Sliding Friction on Optimal Topologies ...	327
<i>Niclas Strömberg</i>	

Chapter 21: Derivation of the Equation of Caustics for the Experimental Assessment of Distributed Contact Loads with Friction in Two Dimensions 337
Vasilios Spitas, Christos Spitas, George Papadopoulos, Theodore Costopoulos

Chapter 22: A Mathematical Method for the Determination of the Critical Axial Loads of Continuous Beams with Unilateral Constraints for Various Initial Geometric Imperfections 351
Konstantinos A. Tzaros, Euripides S. Mistakidis

Chapter 23: A Numerical Approach to the Non-convex Dynamic Problem of Steel Pile-Soil Interaction under Environmental and Second-Order Geometric Effects 369
Asterios Liolios, Konstantinos Liolios, George Michaltsos

Chapter 24: Effect of Different Types of Material Hardening on Hysteretic Behavior of Spherical Contact under Combined Normal and Tangential Loading 377
Yuri Kligerman, Vadim Zolotarevsky, Izhak Etsion

Chapter 25: Modelling of Piezoelectric Contact Problems 383
Mikael Barboteu, Mircea Sofonea

Chapter 26: A Multi Resolution Study on the Behavior of Fractal Interfaces with Unilateral Contact Conditions 401
Olympia K. Panagouli, Euripides S. Mistakidis

Author Index 419
