|-------------------------------------------------------------------------------------------------------|-----|
| Preface .....                                                                                         | vii |
| Laudatio for M.A. (Rien) Kaashoek and J.A. (Joe) Ball .....                                           | ix  |
| <i>J.A. Ball and S. ter Horst</i>                                                                     |     |
| Multivariable Operator-valued Nevanlinna-Pick Interpolation:<br>a Survey .....                        | 1   |
| <i>O. Blasco</i>                                                                                      |     |
| On the Unit Ball of Operator-valued $H^2$ -functions .....                                            | 73  |
| <i>V. Bolotnikov</i>                                                                                  |     |
| On an Interpolation Problem for Generalized Schur Functions .....                                     | 83  |
| <i>J. Conradie and C. Crowther</i>                                                                    |     |
| The Algebra of $\tau$ -measurable Operators .....                                                     | 103 |
| <i>A. El-Sayed Ahmed and M.A. Bahkit</i>                                                              |     |
| Holomorphic $\mathcal{N}_K$ and Bergman-type Spaces .....                                             | 121 |
| <i>A.E. Frazho, S. ter Horst and M.A. Kaashoek</i>                                                    |     |
| A Time-variant Norm Constrained Interpolation Problem<br>Arising from Relaxed Commutant Lifting ..... | 139 |
| <i>F.J. García-Pacheco</i>                                                                            |     |
| Nowhere Density of the Set of Non-norm-attaining Functionals .....                                    | 167 |
| <i>R.L. Hudson</i>                                                                                    |     |
| A Stochastic Double Product in Non-Fock Quantum<br>Stochastic Calculus .....                          | 173 |
| <i>A.Yu. Karlovich</i>                                                                                |     |
| Singular Integral Operators on Variable Lebesgue Spaces<br>with Radial Oscillating Weights .....      | 185 |
| <i>M. Korostenski, C.C.A. Labuschagne and B.A. Watson</i>                                             |     |
| Reverse Martingales in Riesz Spaces .....                                                             | 213 |
| <i>Ch. Kriegler and L. Weis</i>                                                                       |     |
| Contractivity of the $H^\infty$ -calculus and Blaschke Products .....                                 | 231 |

|                                                                                  |     |
|----------------------------------------------------------------------------------|-----|
| <i>I.D. Tembo</i>                                                                |     |
| Invertibility in the Algebra of $\tau$ -measurable Operators .....               | 245 |
| <i>C. Trunk</i>                                                                  |     |
| Analyticity of Semigroups Related to a Class<br>of Block Operator Matrices ..... | 257 |
| <i>M. Weigt</i>                                                                  |     |
| Derivations of $\tau$ -measurable Operators .....                                | 273 |
| <i>W. Żelazko</i>                                                                |     |
| On Hyperinvariant Subspaces for Linear Maps<br>of Real Vector Spaces .....       | 287 |
| List of Participants: IWOTA 2007 .....                                           | 293 |
