Contents

1 An Introduction to Contemporary Achievements in Intelligent Systems 1
Jeffrey W. Tweedale, Ivan Jordanov
1 Introduction 1
1.1 What Is a System? 2
1.2 What Is Intelligence? 3
1.3 What Is an Intelligent System? 4
1.4 What Is AI? 4
1.5 Putting AI to Work 5
1.6 New AI 6
1.7 Intelligent Paradigms 6
1.8 Knowledge 7
1.9 Other Effects 8
1.10 Why Agents? 9
2 Chapters Included in the Book 9
3 Conclusion 12
References 13

2 Market Power Assessment Using Hybrid Fuzzy Neural Network 15
Kirti Pal, Manjaree Pandit, Laxmi Srivastava
1 Nomenclature 15
2 Introduction 16
3 Market Power 17
4 FNN Approach for Open Electricity Market 19
5 Hybrid Fuzzy Neural Network Based Power Market Assessment 23
6 Training and Testing Detail 27
7 Conclusion 34
References 35

3 Coaching Robots: Online Behavior Learning from Human Subjective Feedback 37
Masakazu Hirkoawa, Kenji Suzuki
1 Introduction 37
2 Methodology 39
2.1 Coaching 39
2.2 Reinforcement Learning in Continuous State-Action Space 42
2.3 Implementation of Coaching 42
2.4 The Basic Problem and the Solution Approach 43
3 Reward Function and Its Learning Efficiency 44

Bibliografische Informationen
http://d-nb.info/1023815605

digitalisiert durch DEUTSCHE NATIONAL BIBLIOTHEK

4 Evaluation of Behavior Learning 47
4.1 Characteristics of Human Evaluation 47
4.2 Experiment with a Simulated Robotic Agent 48
4.3 Results 48
4.4 Experiment with a Real Robotic Agent 50
5 Conclusions 50
References 51

4 Persian Vowel Recognition Using the Combination of Haar Wavelet and Neural Network 53
Mohammad Mehdi Hosseini, Abdorreza Alavi Gharahbagh
1 Introduction 53
2 Proposed Method 54
2.1 Lip Localization 54
2.1.1 Face Detection 55
2.1.2 Lip Region of Interest 55
2.2 Lip Segmentation 56
2.2.1 Pre Processing 56
2.2.2 Color Transform 56
2.2.3 Wavelet 58
2.2.4 Lip Segmentation 58
2.2.5 Morphological Filtering 59
2.2.6 Post Processing 59
3 Vowel Recognition 59
3.1 Feature Vector 59
3.2 Neural Network 60
4 Material and Methods 62
5 Results 65
6 Conclusion 67
References 67

5 The Reproduction of the Physiological Behaviour of the Axon of Nervous Cells by Means of Finite Element Models 69
Simona Elia, Patrizia Lamberti
Introduction 69
1 Proposed FEM Axon Models 71
1.1 Model A – Axon with Membrane Domain 73
1.2 Model B – Axon with Thin Layer Approximation 76
1.3 Model A vs. Model B 77
2 AP Temperature Dependence and Feature of a FEM Approach 80
3 Best Numerical Model with Respect to the Objective of the Analysis 82
3.1 Temperature Dependence of the Firing Effect 82
3.2 The Propagation of the AP along the Membrane Domain 84
Conclusions and Future Work 85
References 86

6 A Study of a Single Multiplicative Neuron (SMN) Model for Software Reliability Prediction 89
S. Chatterjee, J.B. Singh, S. Nigam, L.N. Upadhyaya
1 Introduction 89
2 The Single Multiplicative Neuron Model 91
3 Learning Rule for the Single Multiplicative Neuron Model 91
3.1 Back Propagation (BP) Learning Algorithm 91
3.2 The Genetic Algorithm 92
4 Results and Discussion 94
5 Comparison 96
6 Concluding Remark 100
References 100

7 Numerical Treatment for Painlevé Equation I Using Neural Networks and Stochastic Solvers 103
Muhammad Asif Zahoor Raja, Junaid Ali Khan, Siraj-ul-Islam Ahmad, Ijaz Mansoor Qureshi
1 Introduction 103
2 Neural Network Mathematical Model 104
3 Stochastic Solvers 106
4 Simulation and Results 110
5 Conclusion 116
References 116

8 An Investigation into the Adaptive Capacity of Recurrent Neural Networks 119
N.H. Siddique, B.P. Amavasai
1 Introduction 119
2 Overview of Recurrent Architectures 120
3 Proposed Network Architecture 122
4 Training Algorithm of the RNN 128
5 Experimentation and Analysis of Results 129
6 Conclusion 135
References 136

9 An Extended Approach of a Two-Stage Evolutionary Algorithm in Artificial Neural Networks for Multiclassification Tasks 139
Antonio J. Tallón-Ballesteros, César Hervás-Martínez, Pedro A. Gutiérrez
1 Introduction 139
2 Methodology 140
2.1 Evolutionary Artificial Neural Networks Based on Sigmoidal and Product Units 140
2.2 Two-Stage Evolutionary Algorithm 141
3 Proposal Description 143

4 Experimentation 144
4.1 Data Sets and Validation Technique 144
4.2 Common Parameters of the Different Methodologies and Specific Parameters Depending on the Dataset 145
4.3 Nonparametric Statistical Analysis 147
5 Results 147
5.1 Results Applying TSEA, EDDSig and TSEASig 147
5.1.1 Statistical Analysis 148
5.1.2 Analysis of Computational Cost 149
5.2 Results Obtained with a Good Number of Classifiers 150
6 Conclusions 151
References 152
