Notations	xi
1 Introduction and Motivations	1
1.1 Introduction	1
1.2 Motivational Models	8
1.2.1 Kruger–Thiemer Model	8
1.2.2 Lotka–Volterra Model	8
1.2.3 Pulse Vaccination Model	9
1.2.4 Management Model	9
1.2.5 Some Examples in Economics and Biomathematics	10
2 Preliminaries	11
2.1 Some Definitions	11
2.2 Some Properties in Fréchet Spaces	12
2.3 Some Properties of Set-valued Maps	13
2.3.1 Hausdorff Metric Topology	15
2.3.2 Vietoris Topology	18
2.3.3 Continuity Concepts and Their Relations	20
2.3.4 Selection Functions and Selection Theorems	28
2.3.5 Hausdorff Continuity	30
2.3.6 Measurable Multifunctions	32
2.3.7 Decomposable Selection	35
2.4 Fixed Point Theorems	36
2.5 Measures of Noncompactness: MNC	37
2.6 Semigroups	40
2.6.1 C_0 -semigroups	40
2.6.2 Integrated Semigroups	42
2.6.3 Examples	44
2.7 Extrapolation Spaces	45
3 FDEs with Infinite Delay	47
3.1 First Order FDEs	47
3.1.1 Examples of Phase Spaces	48

3.1.2	Existence and Uniqueness on Compact Intervals	50
3.1.3	An Example	57
3.2	FDEs with Multiple Delays	58
3.2.1	Existence and Uniqueness Result on a Compact Interval	58
3.2.2	Global Existence and Uniqueness Result	65
3.3	Stability	66
3.3.1	Stability Result	67
3.4	Second Order Impulsive FDEs	69
3.4.1	Existence and Uniqueness Results	71
3.5	Global Existence and Uniqueness Result	76
3.5.1	Uniqueness Result	77
3.5.2	Example	82
3.5.3	Stability	83
4	Boundary Value Problems on Infinite Intervals	86
4.1	Introduction	86
4.1.1	Existence Result	87
4.1.2	Uniqueness Result	92
4.1.3	Example	96
5	Differential Inclusions	98
5.1	Introduction	98
5.1.1	Filippov's Theorem	98
5.1.2	Relaxation Theorem	111
5.2	Functional Differential Inclusions	113
5.2.1	Filippov's Theorem for FDI's	114
5.2.2	Some Properties of Solution Sets	123
5.3	Upper Semicontinuity without Convexity	125
5.3.1	Nonconvex Theorem and Upper Semicontinuity	126
5.3.2	An Application	130
5.4	Inclusions with Dissipative Right Hand Side	131
5.4.1	Existence and Uniqueness Result	131
5.5	Directionally Continuous Selection and IDIs	136
5.5.1	Directional Continuity	136
6	Differential Inclusions with Infinite Delay	140
6.1	Existence Results	140
6.2	Boundary Differential Inclusions	150

7	Impulsive FDEs with Variable Times	154
7.1	Introduction	154
7.1.1	Existence Results	154
7.1.2	Neutral Functional Differential Equations	155
7.2	Impulsive Hyperbolic Differential Inclusions with Infinite Delay	156
7.3	Existence Results	157
7.3.1	Phase Spaces	157
7.3.2	The Nonconvex Case	168
8	Neutral Differential Inclusions	171
8.1	Filippov's Theorem	171
8.2	The Relaxed Problem	182
8.2.1	Existence and Compactness Result: an MNC Approach	189
9	Topology and Geometry of Solution Sets	199
9.1	Background in Geometric Topology	199
9.2	Aronszajn Type Results	201
9.2.1	Solution Sets for Impulsive Differential Equations	206
9.3	Solution Sets of Differential Inclusions	208
9.4	σ -selectionable Multivalued Maps	208
9.4.1	Contractible and R_δ -contractible	212
9.4.2	R_δ -sets	218
9.5	Impulsive DIs on Proximate Retracts	219
9.5.1	Viable Solution	220
9.6	Periodic Problems	226
9.6.1	Poincaré Translation Operator	226
9.6.2	Existence Result	227
9.7	Solution Set for Nonconvex Case	231
9.7.1	Continuous Selection and AR of Solution Sets	232
9.8	The Terminal Problem	245
9.8.1	Existence and Solution Set	245
10	Impulsive Semilinear Differential Inclusions	254
10.1	Nondensely Defined Operators	254
10.2	Integral Solutions	255
10.3	Exact Controllability	267
10.3.1	Controllability of Impulsive FDIs	267
10.3.2	Controllability of Impulsive Neutral FDIs	276

10.4 Controllability in Extrapolation Spaces	282
10.5 Second Order Impulsive Semilinear FDIs	290
10.5.1 Mild Solutions	291
10.5.2 Filippov's Theorem	292
10.5.3 Filippov–Wazewski's Theorem	303
11 Selected Topics	306
11.1 Stochastic Differential Equations	306
11.1.1 Itô Integral	307
11.1.2 Definition of a Mild Solution	308
11.1.3 Existence and Uniqueness	311
11.1.4 Global Existence and Uniqueness	321
11.2 Impulsive Sweeping Processes	327
11.2.1 Preliminaries in Nonsmooth Analysis	327
11.2.2 Uniqueness Result	328
11.3 Integral Inclusions of Volterra Type in Banach Spaces	331
11.3.1 Resolvent Family	332
11.3.2 Existence results	334
11.3.3 The Convex Case: an MNC Approach	339
11.3.4 The Nonconvex Case	342
11.4 Filippov's Theorem	346
11.4.1 Filippov's Theorem on a Bounded Interval	346
11.5 The Relaxed Problem	351
Appendix	357
A.1 Čech Homology Functor with Compact Carriers	357
A.2 The Bochner Integral	359
A.3 Absolutely Continuous Functions	361
A.4 Compactness Criteria in $C([a, b], E)$, $C_b([0, \infty), E)$, and $PC([a, b], E)$	363
A.5 Weak-compactness in L^1	365
A.6 Proper Maps and Vector Fields	367
A.7 Fundamental Theorems in Functional Analysis	367
Bibliography	369
Index	399
